

Presented by  
**TAMMY WRIGHT**  
Executive Director

## January 2018 Program

### *Environmental Stewardship by Recycling*

Tammy discussed a common-sense approach to recycling;  
don't try to recycle everything, but don't do too little.

Affiliated with Keep America Beautiful, KFCB focuses on solid waste reduction and recycling,  
as well as beautification/greening and water quality.

In cooperation with Forsyth County, monitoring of landfills includes testing water from surrounding  
wells to correct any contamination leakage.

#### KFCB gets the community involved

Tammy and her crew work with businesses to set up in-house recycling centers. Coordinating with the county, KFCB convinced the Forsyth County School Board to install containers and encourage recycling in its schools.

#### Recycling is a Business

Recycling in Forsyth County is self-sufficient. Materials dropped off at three recycling sites are sold to manufacturers such as Mohawk that puts plastics through a multiple stage process to produce fibers for carpets.
