

Grinner Knot

For tying **braid** to hooks, swivels etc

For nylon, see **tucked half blood knot**

| | |
|---|---|
| <p>Two turns through eye of hook or swivel</p> |  |
| <p>Form loop then tuck through loop 4 or preferably 5 times</p> |  |
| <p>Tighten to secure</p> | |

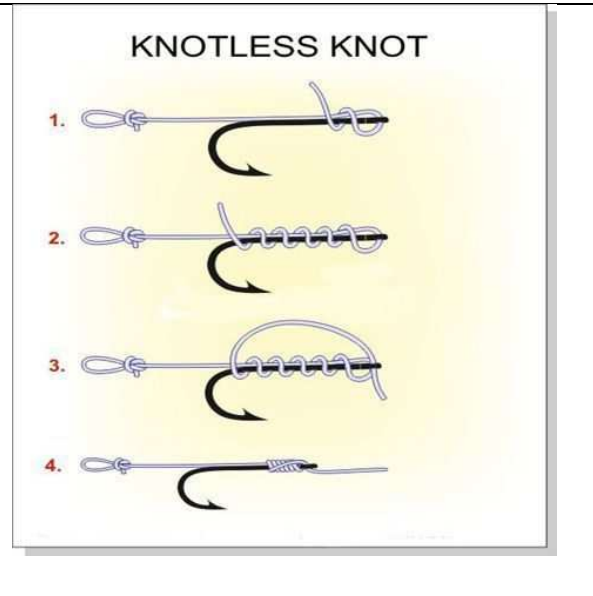

Knotless Knot

Tie a small loop onto the end of a length of braid or nylon.

Position along the shank of the hook, allowing the desired length of hair.

Whip with 6-12 turns of line to secure, and pass end of line back through the TOP of the hook eye as shown

Tighten and preferably secure with superglue

Line Aligner

Add shrink tube to form line aligner over finished hook as shown

Optional additional shrink tube near bend of hook to also align bait

Immerse in boiling water to shrink the tube tightly onto the hook, and to bend the protruding tube as shown
