

Accessing TeamViewer for Consulting Sessions

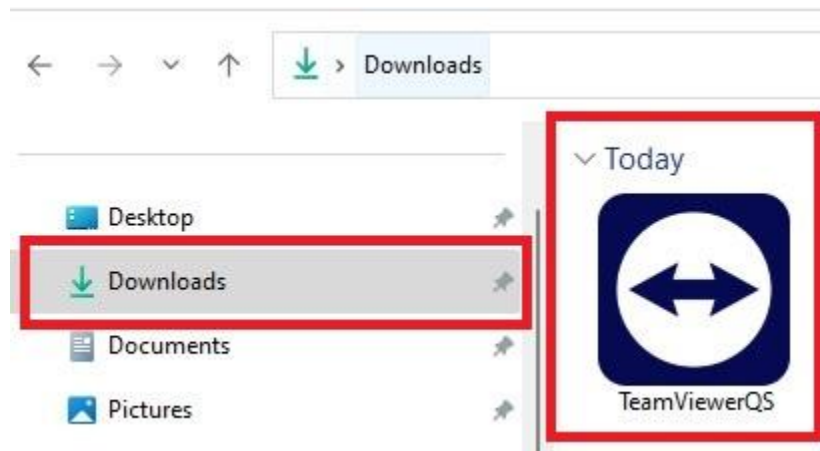

Step 1. Download the free TeamViewer software. There is no need to create an account.
<https://www.teamviewer.com/en-us/info/free-remote-access-software/>

Step 2. Select your operating system, then chose “TeamViewer QuickSupport” and download the application.

Step 3. It will show up in your downloads folder. If you want, you can create a shortcut to this download on your desktop.

Step 4. When we start our session, open the application. First, we will ask for your user ID. Next, we will need your password. The password is always lowercase letters and numbers.
