

Releasement Therapy Class!

*A four-day program to help you to
become a complete hypnotherapist!*

Developed by Donald Hood, CHt, CDP

Have you ever encountered a situation with a client
that does not fit into the "normal" paradigm of standard hypnosis?

**This program will give you the tools that you need to
be the complete hypnotherapist!**

In this four-day program, Don will help **put you at ease** and explain the **amazing potential** of this fascinating work. The program will provide tools and techniques for the **complete hypnotherapist** including the history of deposesession, and case histories drawn from Don's thirty years in the field. Methods of **protection for you and your client, detection and discernment** of the various **types of attachments, releasement techniques**, and follow-up will be addressed. Don will also discuss the differences and advantages of **one-on-one and remote techniques**.

Also, the history and effects of cults, adolescent issues, multiple personality disorder, and more! This is profound work and it will come up sooner or later in your practice.

Participants will **gain hands-on experience** and have an **opportunity to work with others** in this **very important and profound work**. Each one will gain experience and **be able to help their own clients with this valuable technique**.

We open the class up to only a small group because of the nature of the work and the hands-on practice sessions. **Only the therapists who feel drawn to do this work should apply to the program.**

Just \$697 brings you:

- ✓ Lectures
- ✓ Workbook
- ✓ Guided practice sessions
