

M-Class Mark II

The M-Class is a compact, industrial-strength printer that offers outstanding value with a broad range of features. The smaller footprint is ideal when users need the power of industrial printers but must consider space limitations. The M-Class has proven to be the perfect solution for warehouse, healthcare, logistics and retail applications. The modular design of the M-Class makes maintenance and part replacement easy, and the flexible design allows for a variety of options to be upgraded in the field.

H-8308p

The H-8308p printer is for wide label/thermal printing customers who are looking for a high quality printer that is easy to integrate, user friendly and will save them money. For years customers have been asking for a 9 inch/228.6mm wide HP compatible thermal printer to replace their laser printers. The H-8308p delivers the power of the PCL print language, LINUX operating system and Managed Print Service (MPS) support to create a truly laser replacement thermal printer.

Performance Series

The Datamax-O'Neil Performance Series is a new, innovative family of printers that was designed to resolve a number of issues customers have been having with thermal printers for many years. The result is a printer family that is the easiest to load, easiest to use and easiest to integrate of any thermal printers available anywhere. The Performance Series printers offer superior print quality, auto-load capabilities, user-friendly color touchscreen, unparalleled print registration and an industry standard printer language, PCL. PCL is standardized to run on a variety of operating systems, so it is independent of any application software running on a computer. This ensures faster and easier plug-play integration, getting your printer systems up and running sooner. Within the Performance Series is a printer with a near-edge print head that allows printing on synthetics, tags, self-adhesives and plastics.

I-Class Mark II

Datamax-O'Neil's I-Class revolutionized the barcode printer industry with its award winning modular design, field installable options and rugged reliability. For the past several years, resellers have named the I-Class the "best channel product" in some of the industry's largest third-party surveys. Now we've raised the bar even higher, with the redesigned I-Class Mark II.

H-Class

The H-Class is a rugged and versatile printer that offers one of the most feature rich solutions for dynamic enterprise applications and is twice as fast as other printers in its class. The H-Class is ideal for high volume label printing in manufacturing, warehouse, transportation, and high resolution labeling. H-Class reduces the total cost of ownership with its gear driven design to provide rugged and reliable performance for 24X7 mission critical services.

Compact4 Mark II and Nova

MP Compact4 Mark II

The Compact4 *Mark II* is a powerful response to desktop thermal printing requirements, and ideal for on-demand printing, especially where space is limited. The printer is ideal at the front desk of a hospital or in the box office of a movie theatre. Able to deliver continuous operation, the Compact4 is the printer of choice whenever ease of use, reliability and high performance are a must.

MP Nova

The Nova series is for customers who need faster speed, high capacity label rolls, and thermal transfer as an option. These printers are the most compact printers in their class. Featuring all-metal casing, they are tough enough for harsh industrial environments, yet quiet enough for office use.
