Chapter 3: Quadratic Function

Graphing Quadratic Functions

 Sketch the graph of each function. Identify the vertex and axis of symmetry.

1) $y = 3(x + 1)^2 + 2$

2) $y = -(x - 2)^2 - 4$

3) $y = 2(x - 3)^2 + 8$

4) $y = x^2 - 8x + 19$
