

Ybrant and Vena are delighted to announce Partnership

London, UK 07-Aug-2023

Ybrant Solutions and Vena Solutions are driven by a common goal to deliver value-driven solutions to the market. Today, we have partnered to bring best in breed Microsoft based Corporate Performance Management solutions to the office of the CFO. Built on a native excel user interface and driven by a powerful database, Ybrant are investing in Vena as a best alternative to SAP BPC and Oracle's EPM solution.

Rajesh Prayaga, Founder & CEO at Ybrant Solutions:

“Finance-led organisations have the advantage of a data-driven view with a high accuracy in planning, budgeting, and forecasting to make the right Capex & Opex investment decisions.

At Ybrant Solutions our focus is to offer value-driven Digital Advisory services with Financial Planning & Analysis, Enterprise Architecture and Strategic Portfolio Management. The tools to make right decisions for sustainable growth.

“With decades of experience in implementing SAP technologies and the partner ecosystem, midmarket organisations and large enterprises have an excellent opportunity to select Vena as a replacement for SAP BPC as it phases out. Vena's Microsoft based FP&A solution is familiar to the Office of the Finance with its excel user interface. This approach offers comfort and simplicity which makes adoption intuitive without needing to utilise complex workarounds, and their preconfigured solutions can be deployed quickly and efficiently.”

Alex Wood, VP Global Channels at Vena Solutions:

“Vena is excited to Partner with Rajesh and the Ybrant Team. They are highly tenured in the Financial and Operational Planning arena and understand the role and value of adopting Vena to complement their existing solutions portfolio. By offering a powerful excel based platform that is easy to use, deploy and maintain, Vena can offer Ybrant's customers a very different CPM proposition and a planning platform that can add value across the entire business.”

About Vena

Vena is the only native Excel Complete Planning platform built for Microsoft 365 with Power BI. Vena transforms how business, finance and operations leaders Plan To Grow™ with the Vena Growth Engine, the SaaS platform and methodology that empowers and inspires your plans and guides your growth journey. Over 1,500 of the world's leading companies power their growth with Vena.
