

VISION HYDRAULICS

10 YEARLY REBUILD

Vision hydraulics has cemented itself as a leader in 10 yearly rebuilds over the past five years. The motto of the company “An eye for excellence” is evident with an attention to detail the highest priority in every step. Vision Hydraulics has experience with both Ozzy and Proline crane borers, priding themselves on delivering a like new completely restored machine.

The average time for a rebuild is 10-12 weeks and includes full disassembly, sandblasting, crack testing, painting and reassembly. This includes a full certification from engineering inspectors to ensure the rebuild is of the highest quality. There are several customisation options for customers also that Vision Hydraulics are excited to offer. For further information or to schedule your rebuild, contact the team at Vision Hydraulics.

10 Yearly rebuild includes:

- Disassembly of crane
- Resealing of hydraulic components
- Sandblasting
- Crack testing
- Certified welding repairs
- Painting in colour of customers choice, including wheel hubs and tray
- Reassembly
- Quality assurance check
- Full engineer certification

Est time: 10 – 12 weeks*
