

Double Wall Containment **TANKTUB**

- Helps prevent condensation, freezing and gelling
- 110% containment for 275 & 330 gallon tanks
- 20 yr warranty
- Designed for new installations
- Get maximum life out of your tank
- Never worry about a leaking tank

TANK TUB INSTALLED ON PRE-EXISTING TANK

Tank tub can also be installed on pre existing tanks with a few simple modifications to improve the look and safety of your tank

TANK TUB A GREAT ADDITION FOR A NEW TANK INSTALLATION

Purpose:

To increase the efficiency and decrease the liability of a 275v or 330v gallon storage tank.

Key Benefits:

UL Listed-Two piece construction made of space age *Dura-Vinyl*.

Meets & exceeds NFPA requirements for 110% containment for both 275 and 330v oil tanks.

Qualifies as a containment dike under NFPA 31

Protect your tank from the elements including rain, snow and winter wind chill.

An attractive addition to any home.

Free standing design allows for quick and easy installation.

Heavy Duty - Weight:189lbs.

Lid opens up 85 degrees when installed for easy access.

Tank legs stand on galvanized steel plates.

Provides containment installed with or without the lid.

Additional Information:

Unit contains 585 gallons (less tank)

Molded out of High Density MOBIL POLYETHYLENE NRA-235

Melt index 190 Degrees Celsius

Water Tight Design

Predrilled condensations drip holes in lid

Fill & vent pilot holes for trouble free installation
