# FIS™ Plantation Estate Resource System (PLANTERS)

**FIS™ PLANTERS (Plantation Estate Resource System)** is an integrated business solution developed and dedicated for the oil palm plantation industry. It is the latest addition to the FIS™ suites of applications which provides the necessary functionality to improve operation efficiencies and manage cost in the plantation estates using activity based costing method.

FIS™ PLANTERS adopts activity based costing method to track costs of running cost of equipments (including its maintenance costs), manpower and materials utilization based on user-defined activities. The operational data that are captured in the system are integrated with the financial database. This integration to FIS™ financial modules or other financial system can be done either in batched or online mode depending on the availability of telecommunication infrastructure. The system also provides comprehensive features for the processing of workers' check-roll incentives & salary payments.

## Features

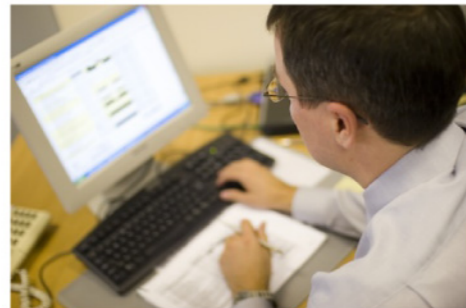

- User-defined plantation activities
- User-defined operating units
- User-defined multiple level grouping of operating units
- User-defined unit of measure for activity output (e.g. measurement of work done by acres, hectares or tonnage etc)
- Activity based costing
- Material resource requirements planning
- Monitor actual material usage against planned material usage
- Tracks laborers and contractors' performance
- Tracks resources utilizations by contractors
- Tracks FFB production by operating unit
- Tracks parts and consumable usage by vehicles/ machineries
- Flexible user-defined labor remuneration rate by activities, works output and operating unit
- Tracks and logs all plantation activities
- Process check roll for labourers salary, incentives and overtime pay
- Deduct canteen credit purchases by labourers from their respective salary

## Benefits

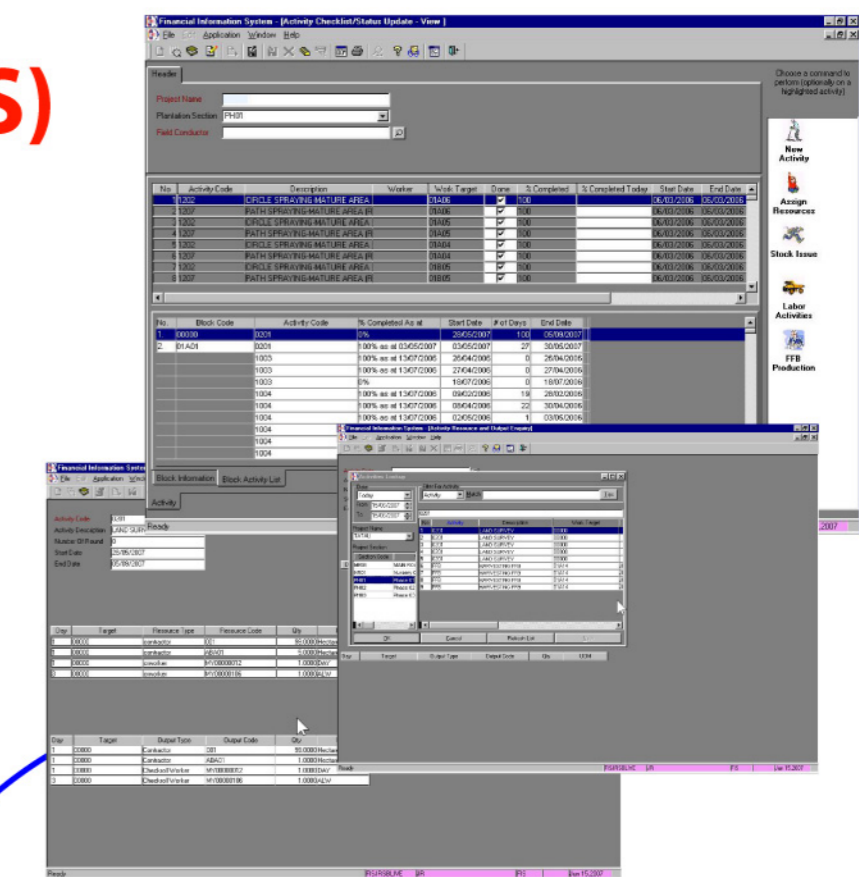

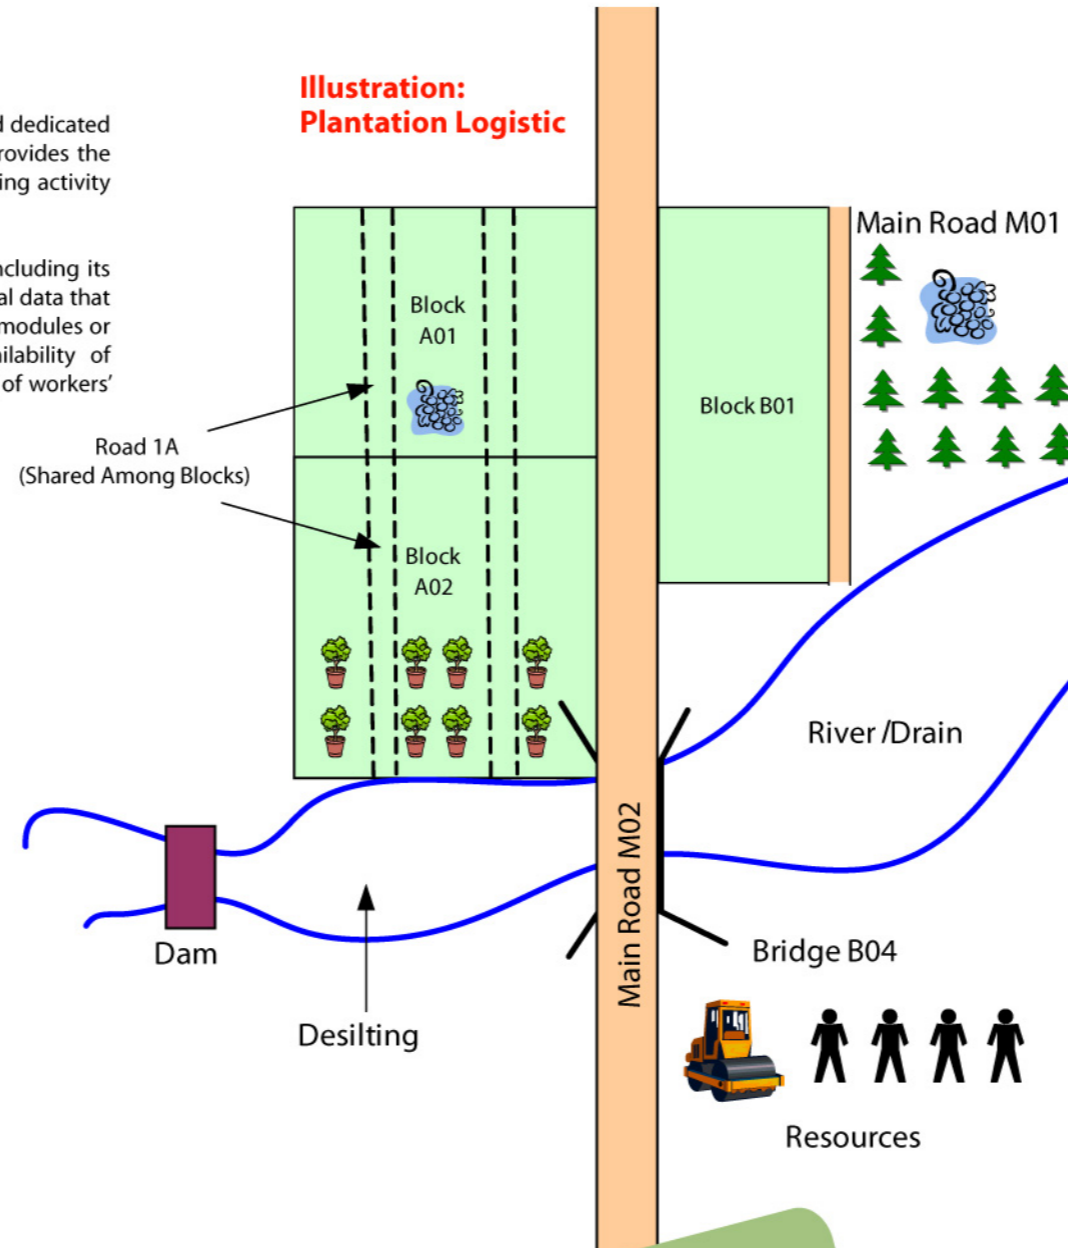

- Provides effective management of plantation operations
- Provides facilities to plan material and resource requirements in advance
- Enhance control and monitoring of plantation activities
- Enhance inventory management
- Reduce intensive payroll administrative cost
- Tracks plantation FFB productivity
- Tracks workers productivity

## Reports

- Daily Activity Reports
- Daily Labor Activity Update Form
- Activity Tracking Reports
- Block/Phase Production Reports
- Monthly Check-roll Worker Register
- Contract Payment Advice Report
- Mill Received Advice Report
