

MLB Ranch
INAUGURAL BULL SALE

3.28.2023

BILLINGS, MT

Dear Cattlemen,

Welcome to our Inaugural Sale. We are excited about the bulls we have in the offering and the Value they will bring to your ranch. It is definitely an exciting time to be in the cattle business. All of the forecasts look like they will be siring the most valuable feeder calves to ever come off your ranch and will put back into your herd the most valuable set of replacement females as well. Many areas of the country are looking at good moisture levels and drought coming to an end. We can't help but be optimistic about the future and the Profit these cattle can bring to your operation.

We have put emphasis on the cow for going on 40 years in the Salers business and the ranch has been performance testing since the mid-1960's. We believe the bulls we offer need to produce females that will be profitable in your cow herd. Those all-encompassing traits to make a cow, start with fertility. Our customer testimonials point that out better than any comments we can make. You will see these throughout the catalog. They highlight the unprecedented breed-up they are getting in a short calving period. Our customers have been enjoying the benefits of the Salers and Optimizer genetics with enhanced fertility, calving ease, maternal excellence and unmatched rangeability and longevity.

We have had the opportunity to have a great set of customers that we value immensely and take great pride in providing them bulls that contribute to their profitability. We say a huge 'Thank You' for your continued support.

The bulls will have been semen tested prior to the sale. We test our bulls and replacement heifers each year for BVD-PI. All cattle have been on a vaccination program starting at birth until pre-sale, using Nasalgen 3 PMH, Cavalry 9, Vista Once and Safeguard de-wormer from MERCK Animal Health. Additional products used include Multi-min90, Clean-Up 2 for lice and Endovac Beef.

We are serious about customer satisfaction and work hard to provide problem-free cattle to your operation. Just like in our operation, we expect these cattle work for you, not the other way around. If something comes up, just give us a shout.

I would like to extend a thank you to all of those people that work to make this happen. As I have said before, we are a family operation and couldn't do it without all of the family pitching in with their individual expertise that makes this a great team to get all of the work done. Sherry and I are very proud of them and all they do to make it all happen. We'd also like to thank the crew at Sugar Factory Vet Clinic for their various testing throughout the year, and Ryan Gilbert at the feedlot for his care and feeding of the bulls.

Thanks,

Jim, Sherry and Family

SIGHT UN-SEEN

If you are interested in buying bulls but can't make it to the sale, you can buy with our Sight Unseen Guarantee. Give Jim a call or contact Curtis (303) 681-7086, Cody (720-346-8894, Justin (720) 320-3291 or Dan (406) 799-5200, and we'll be glad to get the bulls that meet your needs. We have had customers buy from 1-30 bulls on order with us and have customers for over 10 years that have never been in the bull pen. We'll guarantee you'll like the bulls when they get to your place or we'll take them back.

ONLINE AUCTION

View, bid and buy online at www.cattleusa.com. Online Buyers must pre register to bid at Billings Livestock on the Cattle USA website by 4pm Monday March 27th.

DELIVERY

We do our best to deliver the bulls direct to your bull pen gate as part of the purchase price. If delivery is greater than 600 miles we will work to keep this cost to a minimum. \$100 off your bull if you pick up sale day.

VOLUME DISCOUNTS

Volume Discounts are available on purchases of 5 bulls or more.

HEALTH

All bulls have been vaccinated with Merck Animal Health products. They were given Nasalgen 3 PMH, Cavalry 9, Vista Once and Safeguard dewormer. They will have passed a semen test prior to delivery to your ranch and have been BVD PI tested negative. All bulls will receive health papers for interstate shipment as needed.

GUARANTEE

All bulls sell with a first breeding season guarantee. It is rare that there are problems, but in the case there is an issue, a suitable substitute bull or credit towards next year's purchase will be worked out with the buyer.

RETAINED INTEREST

We retain the right to in-herd semen interest on all bulls selling in the sale. Semen would be collected at buyers convenience and seller's expense.

EPD EXPLANATIONS

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Stayability (STAY), Predicts the probability of a bull's daughters remaining productive until at least six years of age.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

2022 Non Parent EPD Averages	CED	BW	WW	YW	M	STAY	MARB	REA
	+12.1	+0.1	+57	+80	+16	+15	-0.1	+0.68

The ASA Gold Sire and Dam program recognizes Salers breeders' top producing cows within a herd based on number of calves weaned per cow exposed and weaning weight of calves. Cows and sires can be recognized from any environment because the list is based on within herd performance.

- Gold Dams must have had a calf before they are 2.3 years of age and calve within a 395 day calving interval which allows the producers to calve heifers earlier than the main cow herd.
- Dam's must have a minimum of three natural (non-ET) calves with an average weaning ratio greater than 105.
- These are the top quality most efficient cows in a herd. Only 2% of the registered cows make the Golden Dam list.

Gold Sires - Salers bulls can earn the title of Gold Sires by siring five or more Gold Dams.

Gold dams and Sires can be identified in Salers pedigrees by an (*) in front of each name in the pedigree.

Dear Stockmen,

It is a great pleasure to be assisting with the inaugural Doubet family bull sale. Having done business with the Doubet's for over thirty years, I can highly recommend this family's Salers breeding program. Today, without a doubt, the Salers mother cow is one of the most useful females of any breed, industrywide. In addition to the pasture attributes, the feeders work consistently in the feed yards and are some of the top cattle we purchase year after year. Demanding proven genetics that perform in the pastures as well as in the feed yards takes sound, fertile, maternal, useful cow herds.

Since the inception of the breed into North America, we've readily recognized the actual value of the Salers breed. The Doubet bulls being offered represent decades of commitment by this family and are some of the most advanced Salers genetics available today. Their breeding program emphasizes practical selection criteria including solid feet and legs, maternal traits with sound udders, and good disposition being the keynote ingredient for their herd. Behind every bull in the offering is a proven cow family. We've purchased Salers-Optimizer feeder cattle since the early 90's and know the feeding capability of these cattle. Feeding customers around the industry substantiate the assets of the breed, and the profit possibilities that result in the yards. As a marketing arm, we will continue to purchase feeders sired by the Doubet Salers Optimizer bulls.

If you have questions about the sale offering, or you're ready to merchandise cattle give us a call. We specialize in purchasing customers program genetics including calves, yearling or breeding stock. Please feel free to give me a call if I can work with bull selection, or purchase assistance on sale day. See you March 28th.

Sincerely,

Dan Deichmann , Deichmann Livestock Brkg.

View, bid and buy online at www.cattleusa.com. Online Buyers must pre register to bid at Billings Livestock on the Cattle USA website by 4pm Monday March 27th.

Reference Sire

MAC F1Freedom 150F. An outstanding herdsire we have used AI on heifers and natural service on cows. A negative BW EPD with WW and Marbling that ranks in the top 20%, YW in the top 10% and Milk in the top 7%. You'll like his sons that are selling – super attractive, clean sheathed with plenty of muscle, rib and volume. His daughters are nice-uddered and attractive females that you'll be glad to show the neighbors and your calf buyer.

105Z Dam of Lot 1

318K ranks right with the best that we have ever offered for sale, and with good reason. We consider his sire to be one of the most influential herd bulls in our programs history and his mother is without question a top donor female. We could only hope that mating the two would result in what this Lot 1 bull represents. Not everyday can you pack that much muscle and power into such a stylish package. At the National Show in Oklahoma City he was admired by many for his phenotypic excellence, but elevated his worth scanning with over a 16 inch ribeye and over a 4 on his IMF at less than 10 months of age. They don't come any more herd bull ready, he is a breed changer! Retaining 1/2 semen interest.

325K is a true sale highlight with so much look and balance. His presence and quality give him added intrigue because he is awesome in his muscle pattern with a beautiful rib cage and big testicle size. This is a really high quality bull that balances well with an athletic build and great set of feet and legs.

Cowboys look in here! Talk about some real world muscle, rib, and body with a set of feet and legs that can flat go to work. 308K is the real deal! His mother is one of our top young cows and man did she get it on on this one. His genuine shape and width is so true but his balance and quality is still tremendous. He has a lot of friends at the National Show in OKC and hasn't missed a beat since coming back north! If you want one to keep the calves heavy without driving up mature cow size, then here he is.

Here is a very fault free, complete kind that balances and lines out nice with extra rib. He is smooth shouldered and smooth muscled with an extra tight sheath and level him. Very square on his feet and legs being extra good structured.

The dam of 313K is a full sib to our long time featured herd sire MJB Manning and his maternal granddam is one of the best cows we've had on the place. The bull himself is elite in his structure and build with a very smooth muscle pattern. He has added presence and eye appeal with a really tight sheath. Love the angle to his shoulder and set to his knee with added length to his hip.

This good footed bull is so good structured with added athleticism and soundness so his extra rib and body is a bonus. He is put together with some quality and balance from the side. He will be easy to find on sale day, he is easy to enjoy.

Here is a very big footed, heavy structured bull that can get out and take a long, athletic stride. He is excellent in the shape of his rib having as much muscle and width in his hip and top as you can ask for. Stout and dimensional bull.

Customer Testimonial

“We had 90% calve in the first 45 days and 75% calve in the first 21 days.” Shawn Oleson, Idaho. It is well-documented that Profitable cow-calf operations manage so that a large portion of the cow herd calves in the early portion of a short calving season. The combination of genetics and management make this happen, it is good managers and good cattle coming together for fantastic results like these!

Heifer bull. This bull is our vision for the future of the program. His dam is a standout first calf heifer that knocked it out of the park and the Gold Standard calves hit every time. His performance and power is unmatched, yet he has big feet and an incredible structure to elevate his quality further. If you want a true herd bull, one that can generate bulls and heifers alike, you've found him. Retaining half semen interest.

Dam of Lot 25

Heifer Bull. So much to love about this bull and his pedigree. His dam is arguably our most proven cow in terms of mating flexibility. It has not mattered how we breed her, it works. As a result, taking her to Smokescreen was a no brainer. The bull himself is one impressive individual. If you want one that will keep mature cow size more moderate but push down the scales on a set of feeder calves, then here he is. As unique in his strenghts as any bull we have ever sold. Come study this one. **Mother is a Gold Dam.**

Heifer bull. His mother has been one of our standout cows for a long time and at 13 years of age this is her last calf. She has made many pen bulls and high sellers so if you want one backed by maternal excellence here he is. He's a big testicled bull that is good balanced and tight sheathed with plenty of length and width to his top. He ties it together nicely on the go and stopped. Get in on the last chance at the legendary 122W cow. **Mother is a Gold Dam.**

Heifer bull. He is as smooth in his makeup and muscle pattern as any bull in the offering because everything flows and transitions effortlessly on him. Love the levelness of his topline with the extra length of his hip and where his tailhead sets in him. He is extra good on his feet and legs being square and sound up front and flexible in his hock. Fault free and easy doing. **Mother is a Gold Dam.**

Heifer bull. 343K is just awesome in his balance and structure and is so intriguing whether he is stopped or on the standing still because he ties everything together so well. He combined a tight sheath with a smooth muscle pattern and big rib cage.

Here is one of the long bodied, smooth made bulls that transitions from a nice shoulder into a big top and expressive stifle while taking a long stride.

MJB Game On 354G. This bull has a pedigree loaded with maternal strength. He is sired by our high marbling herdsire MJB Manning 342C who goes back to a Gold Dam, 120W. On the bottom side of Game On's pedigree is his dam 1127Z who traces back to some of our all-time great cows like 66N and 27N. 1127Z got things going with her very first heifer calf being a high seller and going on to be a donor for Weis Cattle in Iowa. Negative BW with WW, YW and Marbling in top 10%, Milk in top 30%.

Maternal Sib to Game On 354G

This one has stood out since he was a calf for being as impressive on the rear view as you can make one. So big in his pin set and true to the ground with extra width at any angle. His rib cage is bold and this should be a bull that can keep mature cow size in check without giving up and power and mass.

339K is awesome on his feet and legs. Starts up front with the angle of his shoulder and set of his knee allowing him to take a good reach. He is loose spined and long hipped flexing good in his hock and pastern. Dig in a little deeper and the bull is so bold in his forerib and excellent in his muscle pattern as you work down his top and out through his hip. Take time to study this one. **Mother is a Gold Dam.**

Love the style and eye appeal of the really good shaped bull that is bold in his forerib and big topped. He is extra expressive coming out of his hip and into the base of his stifle so the fact that he poses up with that added balance from the side just adds to his breeding value.

Heifer bull. 342K offers so much practicality with all his depth of body and fleshing ability. He has a really low maintenance, easy keeping look to him.

Heifer bull. 360K reads with as much doability as you could ask for. He is sound on his feet and legs being big centered and deep bodied having added fleshing ability. This moderate framed bull is good on his feet and legs and should be able to get out and breed cows with ease. **Mother is a Gold Dam.**

Love the masculinity that this bull has and then he is really long and extended throughout. He is big topped and stout hipped with so much circumference of bone and foot size. A bull that is big centered and puts it together nice from the side. He will be easy to find on sale day.

Customer Testimonial

“Cows preg tested up 95.6% and my yearlings tested 96%. Doubet bulls must be working out!” says Joe Thomas of Turnell Cattle Company, Wyoming. He and others are seeing the benefits of the Salers and Optimizer influence in their cow herd. “We are getting a terrific breed up and we shortened our calving season to right at 48 days with the Salers Optimizer cow. Our calves are more uniform for our calf buyer and the feedlots. We are just really happy

MJB Garrelli 372G is a tremendous bull with added length of body who was one of our heaviest calves at weaning that year. He is sired by MAC Enduro 43E that we own with Parke Ranch, Montana and he puts that added length and stretch in his calves with WW in top 26%, YW top 14%, Milk top 20% and Stayability in top 5%. His dam was a model cow that was big bodied and soggy with a square hip having that same added length of body.

The natural performance and length this bull carries is only enhanced with his added expression and stoutness. Yet, his structure might be his best feature. His shoulder angle and looseness of his spine and hip combined with his flexibility allow him to set to the surface square and secure. This bull's hock and pastern angle is going to allow him to get out and cover a large group of cows in a big pasture setting with no problems at all. **Mother is a Gold Dam.**

Backed by one of the best cows on the ranch, 316K is a maternal brother to one of our up and coming herd bulls. 316K himself is a deep sided easy fleshing bull with lots of length and levelness down his top and out through his hip. Good rugged beef bull.

This bulls structure and build is awesome. Really square and correct up front with a great angle of shoulder and set to his knee. He is long in his hip and set right in his hock and pastern making him very athletic as he goes complementing all this with plenty of muscle and testicular development.

This bull has a lot of natural performance and growth being deep sided and smooth made.

Here is one of the good red bulls that lines out really nice from the side. His shoulder blends smoothly into his body and then you love the length and levelness of his top and how he comes out his hip. The bull is deep in heart and soft back into his flank being built right on his feet and legs. Extra tight in his sheath and masculine front.

Customer Testimonial

“Paired out more cows and realized we only have a few left. Figured it up and we calved right at 94% in 40 days.” Travis Telford + Shawn Ellis, Idaho. At the 2014 Beef Improvement Federation Meetings, Clay Mathis of the King Ranch Institute for Ranch Management talked about profitability and found in the analysis of many ranches that while keeping costs low, having more calves born early in the calving season is one of the largest factors to profitabil-

This bull stops and poses with a lot of look and style. He is eye appealing and attractive from the side and uniquely enough with that added length of body he is still deep in his heart and true in his flank. He gets stouter as you work down in to his stifle and then he is true at the ground and square on his feet. High quality bull.

Heifer bull. This bull is put together extremely well. He is long up front and smooth in his shoulder. 388K is attractive and big centered with a tight sheath being long and smooth in his muscle pattern and attractive in the way that his hip is built. This bull gets out and travels so comfortably and sound.

Heifer bull. Just a good solid beef bull that lines out nice down his top and out his hip. His shoulder is smooth, his forerib is bold and I really like the depth of his heart in relation to his flank. Step around behind the bull and his progression of width is impressive with how he sets wide to the surface.

BW: 80 ADJ WW: 639

GED	BW	WW	YW	M	STAY	MARB	REA
+12.7	-0.6	+63	+99	+19	+16	+0.2	+0.55

Heifer bull. One impressive individual no matter the angle you study him from because he is so wide and opened up. He is as big in behind his shoulder, stout in his pin set and true in his stifle shape as you can make them but he is still excellent from the side being good balanced and tight sheathed. Hard to make one that rugged who is still attractive from the side and good on his feet and legs.

MJB Derringer 311E is a trait leader in 4 traits including BW, WW, YW and Milk, with a +18 CED. This black, polled purebred is a former 2018 Midland Bull Test graduate that excelled in efficiency and performance who is out of the Gold Dam 178C that is now a Donor in our ET program. 178C herself has also produced the high selling heifer at the National Western Stock Show in 2019, selling to Rowell Cattle Company of Oklahoma. 178C is out of the terrific 264L cow we wish we still had in production today. 311E was flat getting it done at Turnell Cattle Company, Wyoming, and we went back and collected him and are we ever glad we did!

LOT 56
A SPECIAL FEATURE LOT

Pick of the 2023 Heifer Calves

We will be selling the Pick of our 2023 Heifer Calves. We are excited to offer you the chance to select the cream of the crop and choose the heifer calf of your liking. You will have the opportunity to choose from a tremendous set of heifers including embryo transfer calves from our elite donors – there should be Purebreds and Optimizer heifers from our embryo program, including Purebred progeny from the 2023 Grand Champion Salers bull at the Cattlemen’s Congress. There will be high percentage and Purebred natural service progeny from a red 1/2-sib to the 2022 Grand Champion Bull at the National Western Stock Show as well as the AI progeny from our trait Leading MJB Derringer 311E sire (Purebred Trait Leader for BW, WW, YW and Milk).

You can choose from numerous multi-generational Optimizer matings utilizing some of the top bulls available in the industry. Bulls like MAC F1 Freedom 150F, MJB Gold Standard 304H, MJB Game On 354G, MAC Enduro 43E, TSB Jasper 16J, MJB Garelli 372G, MJB Valiant 373G and MJB General 424G.

The Details - Buyer will pay 1/3 of the purchase price down upon conclusion of the sale. The Buyer will be given all available performance data on the 2023 heifer crop to make their selection decision by November 15th, 2023. Upon selection of the heifer calf, the remaining 2/3 of the purchase price will be due. We will work with the buyer to assist in selection and trucking of the heifer.
