

# Building the ALS Mental Health Referral Network

As part of our commitment and mission to discover treatments and a cure for ALS, and to serve, advocate for, and empower people affected by ALS to live their lives to the fullest, The ALS Association is working to build a new comprehensive mental health program.

**Want to help inform the program? Give suggestions for content, design and over all needs?**

**Go to: <https://rb.gy/c8o4b>**

**And complete a brief, anonymous survey**

## Education

The ALS Association has partnered with Mental Health America-Montgomery to provide CE approved educational content for professionals interested in supporting persons affected by ALS with their mental and emotional wellness.

## Resources

The Association has numerous materials and resources available to support people living with ALS, their loved ones, and professionals to learn about the disease and how to support those affected.

## Referrals

We are working to build a statewide Mental Health Referral Network for persons affected by ALS, and we need your help. If you are a mental health professional and are interested in learning more about this opportunity - we want to talk to you!
