

THE DAY OF THE WATCHMAN(LETTER) #10

TOPIC: I AM IN BUSINESS!

SUB-TOPIC: 1) VISIONS OF THE PROPHET WEBB

2) CURRENT EVENT POSTINGS

Dear HOZ (and all those who stand with them):

Before beginning this document work of the Lord, I take the time to give a brief testimony of thanks and gratitude to our God, for he has kept every promise made unto us in both the “Message of the Covenant” and the “Everlasting Gospel” (as preached unto us by James T. Webb, surnamed of God, ‘Zerubbabel). This promise is further seen and kept as well within the “Message of Elijah”. God gave the “Message of Elijah” unto us as a tool of spiritual understanding by which we would perfectly understand the “Everlasting Gospel” in its final phases. Yet, we must always ad hear to that which the prophet shared with us; that being: all is done by God, and because of God!

In a private conversation with Bro. Webb, I once asked him, “How do you *remember* all that information: the visions and the events?” You see, I found it incredible and I thought of it as mind explosive, which I and others did bear witness of him exhibiting from time to time. Yet his answer to my question was a surprise; the answer being, “**I don’t. As a younger man, I did study whatever God led me to study, but I don’t go around thinking about all those things every day. But when one is seeking the will of God and asks of me a question, God will then reach into my mind and pull up the answer to increase faith and righteousness.**” Thus let me and all HOZ boldly declare and give testimony that we have no knowledge or skill above any other man on earth; we are just servants of a divine, wonderful and almighty God who is kind and merciful to his children, and will not leave them in darkness. Amen!

Vision of the Prophet Webb

The following vision by the Prophet Webb was taken from his letter to the church entitled: *Three Distresses* (Subtopic: *Trouble from Nature, Trouble from the Economic World and Trouble from the Religious World* – paragraph #2, vision #4). The vision (and writings) begins:

“I saw two angels take up a container filled with liquid darkness, and poured it upon the earth, which moved upon the ground like brake water. It climbed the hills. It went through the valleys all alike. I saw people come out of the mills with their lunch bags in their hands. I further saw the economic world as a plowed field by two great, brown mules that walked as they will, for they were out of control. Christ, our God, came walking through the field and commanded an angel to go to the industries. I saw that the economic world will be knocked off its foundation, for this the Lord pointed out. And I heard the angel from the mills say, “I AM IN BUSSINESS!”

(The prophet continued to write.) **“There were other visions on this trouble, which we won’t quote at this time. Seeing that it is clear enough that good times, a world of plenty, jobs, a good economy is not left in the hands of man, for all that is good comes from GOD. God has commanded his angels to wreck the economic world and they shall turn the elements of nature into a weapon against the earth. This is the second distress!”**

[**Note:** My beloved HOZ, we have been waiting for thirty-six (36) years to see the unveiling of his executive judgment. And now by the spirit of the “eye salve”, which God has given us, and because of our obedience and fear of the Lord (along with our willingness to serve, our seeking of his will, his Faith and his patience), only with our eyes shall we behold the reward of the wicked.]

At this point let us now examine the state of our world under executive judgment through current events. They are as follows:

CURRENT EVENTS

- **8/01/2012:** **Article taken from the Huffington Post Green entitled, “Economic Impact of Drought: Midwest Business Suffers at the Hands of Extreme Weather”**

Quote: “The ongoing drought, combined with global economic turmoil, is hurting business in nine Midwest and plains states, and boosting worries about the possibilities of another recession, according to another report released Wednesday. The regions’ overall economic index for July plunged below growth neutral for the first time since two thousand eight. The index hit 48.7 compared to 57.2 in June. The survey of business leaders and supply managers uses a collection of indexes ranging from Zero-100. Any score above fifty suggest growth, while any score below fifty, suggest decline for the factor. Concerns about Europe’s debt woe’s, and the slowing of U.S Economy, already were weighing on the U.S economy before the drought hit this summer, Creighton University economist Ernie Goss, who oversees the survey, said the drought will hurt farm exports while the strengthening dollar will hurt exports. So, to the most important positive factors in the region’s economy is being undermined. Recent gains in the U.S dollar have made U.S goods less competitively priced abroad. Combine that with the drought conditions and we see farm income will take a hit, and that will spill over into the industries in the region, Goss said.” The survey covers Arkansas, Iowa, Kansas, Minnesota, Nebraska, North Dakota, Oklahoma, and South Dakota.

[**Note:** Now HOZ (and all that stands with HOZ) let us examine further God’s wrath upon the business world.]

- **6/26/2012:** **Article by Josephine Mason and Sylvia Antonioli: ‘Steel Glut Skirmishes’**

“Steel producers around the world are exchanging allegations that rivals are dumping cheap metal on the market, threatening to trigger a series of trade wars.

A darkening outlook at the world economy has led to over capacity, in the steel industry, unleashing beggar thy neighbor sales at below cost from Texas to Thailand, some executives say. Sanctions on Iran and the lack of recovery in demand from the Middle Eastern nations after the Arab spring, have worsened

(Article by Josephine Mason and Sylvia Antonioli: ‘Steel Glut Skirmishes’ continued)

the strain, cutting off key imports. And this time it isn’t China being cast as the villain. Russia and the Ukraine are both being blamed, reviving a long simmering source of trade friction. The global steel industry is already hunkering down for a fresh round of closures and trade disputes. U.S. measures to prevent Russia from dumping hot rolled coil, used in appliances and autos, are under review by the U.S. governments Commerce Department. One major steel trader has already quit importing Russia produced coil into the U.S for fear any deals may be scupper by U.S. trade action. ‘The scenario that caused previous trade crisis is back,’ said Allen Price, head of the international trade practice at Law firm Wily Rein LLP, aid in an interview. In particular he said, ‘the trouble stems from foreign producers who enjoy Government subsidies, keeping output high even as prices fall, flooding the market with cheap metal.’

China, which is both the world’s largest steel consumer and producer, has imposed its own duties on U.S. exports of a specialty steel product known as grain oriented electrical steel, and last month initiated a trade complaint at the World Trade Organization against U.S. import duties on 22 Chinese products that range from solar panels to kitchen shelving.”

- **8/24/2012: New York Times reports: ‘Mounting Piles of unsold Goods: China in denial mode, its economy in trouble**

“After three decades of torrid growth, China is encountering an unfamiliar problem with its newly struggling economy: a huge buildup of unsold goods that is cluttering shop floors, clogging car dealerships and filling factory warehouses. The glut of everything from steel and household appliances to cars and apartments is hampering china’s efforts to emerge from a sharp economic slowdown. It has also produced a series of price wars and led manufactures to redouble efforts to export what they cannot sell at home. The severity of china’s inventory overhang has been carefully masked by the blocking of economic data by the Chinese Government; all part of an effort to prop up confidence in the economy among business managers and investors.

But the main non- government survey of manufactures in China showed on Thursday that inventories of finished goods rose much faster in August than in any month since the survey began in 2004. The previous record for rising inventories, according to the HSBC/Market survey, had been set in June, May and July also showed increases.

Across the manufacturing industries we look at, people were expecting more sales over the summer, and it just didn’t happen, said Ann Stevenson-Yang the research director of J. Capital Research, an economic analysis firm in Hong Kong. With inventories extremely high and factories now cutting production, she said things are kind of crawling to a halt.”

Sub-title given in this article: ‘Crawling to a Halt’

“Problems in china give some economist night mares in which, in the worst case, the United States and much of the world slip back into recession as the Chinese economy sputters, the European currency zone collapses and political gridlock paralyzes the United States.

China is the world’s largest economy and has been the largest engine of economic growth since the global financial crisis began in 2008. Economic weakness means that China is likely to buy fewer goods and services from abroad, when the sovereign debt crisis in Europe is already hurting demand, raising the prospect of a Global glut of goods and falling prices and weak production around the world.”

Beloved HOZ (and all who stand with us), we can rejoice now for our deliverance is at hand. The angels commanded by Christ are wreaking the economic world as commanded. Even as I write this document by the will of God (8/26/12), it is being reported on CNN news that three hundred (300) earthquakes struck the state of California within a twenty-four-hour period...three hundred!!! Never has this country experienced anything like this!! Or have they seen anything like this!! It is also being reported that the mighty Mississippi River had to be shut down today. Already we have covered this possibility in our watchman letter, which noted that if this happened, the U.S. would lose 300 million dollars a day in commerce. Furthermore, the prophet mentioned in his vision of the grapes of wrath that water would be in the southeast. Well, the southeast received the most damaging flood from a hurricane in the history of the nation seven years ago in Louisiana, Alabama, Mississippi and other southeastern states. And at the time of the composing of this letter (8/27/12), the southeastern states are evacuating their people and bracing for another massive flood from another hurricane headed down the exact same path as seven years ago. This fulfills that which was told to the Prophet Webb by the spirit of God the words of “**water shall be within the southeast**”.

I hope all HOZ (and those who stand with HOZ) are laughing with me as I am commanded to laugh with our God (Psalm 52 v6; Psalm 59 v8; Psalm 2 v4). [Note: Here we declare to all this statement: “**How foolish are the forces of darkness – or any human for that matter – to actually think that they can overcome OUR GOD!**”]

All praises be to the full throne of God – with a special salutation to our mother and heavenly Queen,
The Most Gracious, Kind and Merciful: Wisdom of God.

You brother in much love,
Terald D. Blakey Sr.
HOZ – 8/12
