

HOMESTAKE RANCH

10th Annual Bull & Heifer Sale
Wednesday, February 28, 2024; 1pm CDT

Huron Continental Marketing, Huron, SD

23 Simmental Bulls || 19 Red Angus Bulls || 5 Angus Bulls || 1 Charolais Bull
9 Simmental Heifers || 9 Red Angus Heifers

DEAR CATTLEMEN & FRIENDS,

First of all, we want to take this opportunity to welcome you all to our 10th Annual Production Sale. It is hard to believe it has been a decade since we made the leap from only exhibiting at winter shows and sales to our own production sale, but we are sure glad we did! We especially want to thank our return customers for your loyalty and our new customers for your interest in our program. We are pleased to offer our best set of bulls and heifers to date and look forward to assisting you in selecting your next herd sire or foundation female.

We hope you fared this latest round of extreme cold temps well and that your cattle are thriving. The prices at the sale barns this year have been reflecting the incredible value of this area's cattle and we are always happy to hear back from past customers about their Homestake Ranch sired calves and their successes.

Once again, all heifers have been pelvic measured and confirmed open. Bulls will be semen tested after the sale as we prefer to take all of the bulls home so we can semen test every bull before delivery and fully guarantee fertility and performance. This gives us the opportunity to deliver your cattle at a later date and allows us to have plenty of time to visit you at your operation – our favorite part!

Our cattle are bred with the commercial cattleman's profitability in mind and they must thrive in real-world situations – nothing is spoiled or pampered here. Though we observe EPD's as a useful tool, they are never the determining factor for our breeding decisions. We focus on performance and maternal genetics as we know the importance of producing muscle, eye appeal, and fleshiness on top of sound feet and legs. And, remember, any heifers purchased on the sale can return to our ranch and be AI'd to any bull in our tank and later delivered to you at no extra charge.

You are welcome to come to the ranch to view the cattle at any time. We look forward to seeing you on February 28th in Huron!

Cattle & Sale Information

-Save \$25 per head for bulls taken home the day of the sale. Bulls taken home by Homestake Ranch will be semen tested prior to delivery at our expense.

Bulls will be kept free of charge until April 25th. Free Delivery within 200 miles.

We will work with the buyer for distances further than that.

-All heifers have been pelvic measured, palpated, and confirmed open by the Huron Veterinary Hospital. If the buyer prefers, we will take heifers home, AI them to any bull in our tank (some exceptions) or with semen provided by the buyer, and deliver them by May 15th.

-Every heifer purchased by a junior member will receive \$50 if they send a picture if it being exhibited at their County Achievement Day, Spotlight or State Fair.

- All cattle sell under the terms and conditions of the American Angus Association, American Simmental Association and the Red Angus Association of America - breed dependent.

-Announcements made sale day and from the auction block during the sale, take precedence over printed material associated with this sale.

-We will not be responsible for death or injury.

-Homestake Ranch will reserve 1/3 semen interest and the right to collect semen on any bull sold in this sale (for in-herd use only). This would be done at seller's expense and buyer's convenience.

Insurance

Bull Mortality and Loss of Use insurance available through Betsy Schroeder, Krohmer Agency (605) 539-1871. Must be contacted within 24 hours of the sale.

23 Simmental Bulls

19 Red Angus Bulls

5 Angus Bulls

1 Charolais Bull

9 Simmental Heifers

9 Red Angus Heifers

**Every heifer
purchased by a
junior member**

will receive \$50 if they send a picture
of it being exhibited at their County
Achievement Day, Spotlight or State
Fair.

**Let us breed them for
you!**

If the buyer prefers, we will take heifers
home, AI them to any bull in our tank (some
exceptions) or with semen provided by the
buyer, and deliver them by May 15th.

Here are instructions to utilize cattleusa.com!

SETTING UP AN ACCOUNT IS A SIMPLE TWO MINUTE PROCESS.

1. Visit cattleusa.com, find Huron Continental Marketing in the list of sale barns and click the blue button, "submit".
2. Select "click here to register" or if you already have a log in ID, chose that option.
3. Fill in the form with your name, email, state, username, and password.
4. Press the proceed button at the bottom of the page.

Any time you come back to CattleUSA just enter your username and password to log-in and watch auctions.

Enter any username and password that is easy for you to remember. We currently have over 140,000 registered users so keep that in mind when you enter a username and password. Many have already been taken. You may have to add extra numbers or letters before or after yours to come up with something unique. We do not recommend using spaces or caps. Users have a hard time remembering where the spaces and caps are when they return to the site.

GET APPROVED TO BUY

Each auction approves its own buyers, no buyers are approved by CattleUSA. This is done for your privacy and security. Your buyers information is kept private and is only released to the auctions you choose. In order get obtain approval to buy at an auction you will need to submit your contact information to each auction you wish to buy from.

- 1) Log in to CattleUSA.
- 2) Push the Submit button next the auction you wish to be approved at. The first time you do this, a form will pop-up for you to fill out your contact information. Fill out your information then push the button at the bottom of the form to continue.
- 3) You have now sent your information to that auction. The auction will now be able to find you in their database and approve you to buy. If you would like to be approved at other auctions push the submit button next to each auction you wish to be approved at. Your information will be forwarded to those auctions only. Auctions do not have access to your information until you send it to them.

Simmental Guide to EPDS

simmental.org

BELOW IS A QUICK REFERENCE TO AN EXPLANATION OF EPD'S:

Expected Progeny Differences "EPD's" are the most accurate and effective tool available for comparing genetic levels. In using the EPD differences between two sires EPD's represents the unit difference expected in the performance of their progeny. (Listed below are the units ASA EPD's are expressed in).

(Average EPD's are on the bottom of the percentile table above)

Calving Ease (CE) percentage of unassisted births when used on heifers.

Birth Weight (BW) pounds of birth weight.

Weaning Weight (WW) pounds of weaning weight.

Yearling Weight (YW) pounds of yearling weight.

Maternal Calving Ease (MCE) percentage of unassisted births in first-calving daughters.

Maternal Milk (MM) pounds of weaning weight due to milk.

Maternal Weaning Weight (MWW) pounds of weaning weight due to milk and growth.

Stayability (Stay) percent of daughters remaining in the cowherd at 6 years of age.

Carcass Weight (CW) pounds of carcass weight.

Yield Grade (YG) yield grade score.

Yield grade is an indication of the yield of red meat within a carcass. It is calculated by using several factors including 1) fat thickness, 2)

kidney, pelvic and heart fat. 3) hot carcass weight 4) rib eye area. A (-) EPD is better.

Marbling (MRB) marbling score.

Indexes: The last two columns in the EPD section are fairly new to the Simmental breed, but interesting, they are \$ indexes. Though EPD's allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes blend EPD's & economics to estimate an animal's overall impact on your bottom line.

All Purpose Index: (API) It is exactly what it says, all purpose.

This index includes every trait that can be calculated: calving ease, pounds at weaning and yearling, keeping replacements back, milking ability and stayability, then the calf crop. It took into consideration, some being retained as replacements, then the rest being fed out and sold grade and yield.

Terminal Index (TI): This index is to be used if all calves are going to a feedlot. It evaluates a sire only for use on mature cows with all calves put on feed and sold grade and yield. No other factors were figured in.

Using API and TI: First determine which index to use. If you're breeding heifers and keeping replacements, use API. If all calves are going to the feedlot and finished, use TI.

BLACK SIM GENETIC BULLS

1

MR EAGLE 314L

BLACK // POLLED

It is hard to find a fault in this year's leadoff purebred bull. MR Eagle 314L is long sided, long strided, thick made, and powerful. He is the exact type of bull we try to produce for our customers. He has demonstrated explosive growth since birth (BW ratio of 97) to yearling (YW ratio of 109) and we are certain he will pass that on to his offspring. Make note of his great set of EPD's across the board and be sure to put a star by this one on sale day.

2

MR UNO MAS 337L

13	-1.8	69	111	23	3	11	8	0.29	0.05	0.12	0.01

With a deep grouping of Red Angus bulls this year, we could lead off with several, but this one till rises to the top. Convoy 3166 brings many things to the table. He is wide, correct, long spined and has loads of style. His WW and YW EPDs rank in the top 20% of the breed. We like to buy bulls like him as much as we like to raise them.

25

5HSR MR CONVOY 317

RED ANGUS GUIDE TO EPDS

RedAngus.org

ProS..... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HB..... HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GM..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CED..... Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW..... Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW..... Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW..... Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

ADG..... Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI..... Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK..... Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

ME..... Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG..... Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CEM..... Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

STAY..... Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB..... Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

YG..... Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW..... Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

REA..... Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

FAT..... Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

ANGUS BULLS

BLACK // POLLED

This purebred heifer is a brood cow in the making. Her sire Uno Mas is know for making great females and she is no exception.

Let us breed them for you!

If the buyer prefers, we will take heifers home, Al them to any bull in our tank (some exceptions) or with semen provided by the buyer, and deliver them by May 15th.

Every heifer purchased by a junior member

will receive \$50 if they send a picture of it being exhibited at their County Achievement Day, Spotlight or State Fair.
