MCINTOSH, SOUTH DAKOTA • 1:00 PM MT

# Welcome TO OUR ANNUAL PRODUCTION SALE

Robert, Kara, Robby, and Sara  
5096 Campbell Rd. • McIntosh, South Dakota 57641  
701-422-3721 • campbellra@westriv.com  
[campbellredangus.com](http://campbellredangus.com)

Welcome to our Campbell Red Angus 2024 production sale. This year's bull offering is only the top of the bulls born on this ranch. You can buy with confidence that you are getting the best of the best in this group of bulls. We have added to our philosophy of old school hard numbers and phenotype to incorporate genetic testing and enhanced EPD's. Make no mistake, the cattle still have to perform and breed back in our environment NO EXCUSES. We are just adding another level of selection to bring you the most complete package of replacement cattle as possible. Many of the bulls in this offering have EPD's in the very top of the breed in more than one trait. All this and we still haven't lost sight of the mama cow. They are run like commercial cows here and are expected to be sound and produce. The calves are expected to push the scale down along with having figures.

If you read my welcome last year, I predicted some of the highest calf prices we have ever seen. Well, they're here and still creeping up. It's been long overdue, but it's here. Let's take advantage of our good fortune!!

A few years ago we made the decision to move the bull sale home. We feel moving the sale home shows a truer representation of the bulls and our program. Be sure to look at the map in the catalog, if you have any questions don't hesitate to give us a call. Take the adventure of coming to the ranch!!!

We are still a family operation you have grown to know and trust. Robert, Kara, and Robby are on the ranch full time. In September, Robby married Sara, adding to our family. She is teaching in town and helping on the ranch. You will have to come and meet her she is quite a find for Robby. Jennifer is working towards her vet degree in Saskatoon, Saskatchewan. Lacey, her husband and children, as well as Melissa, her husband and daughter (plus a new one on the way) are still in Wyoming, but come home frequently to help out. Kara is still teaching full time in McIntosh and helping on the ranch.

The cattle and genetics are the same base you have come to rely on since 1973. We participated in the "Red Cow Rally" the Red Angus association offered. That verified parentage and increased accuracies on EPD's through DNA testing. When all is said and done, we will have submitted well over 1500 animals DNA for testing. All the bulls in the sale are parent verified through DNA. Our goal is to combine our ranch tested genetics with DNA testing to give you a phenotypically desirable animal

with the backing of scientific data. We are confident we have produced a predictable, money-making animal for your herd. No matter what your selection criteria is you can find what you need here at Campbell Red Angus. 50 years and 3 generations of management input (That's well over 100 years of combined experience) has given our operation a unique perspective.

We have been feeding with our TMR feeder wagon for several years now. This year we fed a high roughage ration along with an adjusted supplement, and mineral. The bulls performed well. The scrotals are adjusted by the Red Angus Association and were taken January 21, 2024. The EPD's in the catalog are BOLT as of January 29, 2024.

We are bringing 10 quality replacement heifers to our sale that represents a cross section of the herd. The heifers were developed with the whole group until January 25, 2024. They are on a high roughage TMR ration. They did quite well proving their feed efficiency and genetics. We hope you take advantage of this opportunity to bring these outstanding genetics into your herd.

The popularity, reliability, strong performance, and diversity of Red Angus Cattle continues to grow in the cattle industry. Red Angus females are still some of the most desirable cattle selling today. With the recognition of the industry in the carcass merit of Red Angus cattle, I am confident we will be seeing premiums across the board on our cattle. Let Campbell Red Angus genetics help you take advantage of what's to come.

We welcome you to come to the ranch to view the cattle until March 4th at which time we will have the sale on the ranch. We will also have video of the sale bulls at [campbellredangus.com](http://campbellredangus.com) available in mid-February for viewing. DVAuction will be available on sale day for bidding.

Our family, friends, customers, and cattle are the reason we keep working hard in the cattle business. Please come early on sale day for coffee and rolls. Lunch will start at 11:30 MST. We look forward to seeing you there!

Sincerely,  
Robert, Kara, Robby, and Sara

#### **National Red Angus Association of America**

Rachal Oliver, Commercial Marketing Specialist  
..... 406-480-1569

### **Guarantee**

Bulls sell as guaranteed breeders. Due to their young age the bulls haven't been semen tested, but we strongly recommend you have them semen tested before you put them in service. All claims must be submitted to the Seller in the calendar year, along with written semen evaluation and health report from a licensed veterinarian. All heifers are sold palpated and open. Seller has the privilege of trying to prove the bull after his return, before making any adjustment. This guarantee is null and void if there is evidence of improper management in care of said animal, or if the inability to breed is due to sickness or injury after being sold. Insurance available through Martin Trudeau Insurance.

**PLEASE BRING THIS CATALOG TO THE SALE.**

---

### **Terms and Conditions**

All cattle sell under the recognized terms and conditions of the Red Angus Association of America, and by these additional conditions. Terms of the sale are cash. Any dispute as to bids are settled by the auctioneer. Announcements from the auction block take precedence over printed material in this catalog. Animal is the Buyer's responsibility upon being sold. All persons who attend the sale do so at their own risk.

*For candid pictures and updates, visit*  
***[campbellredangus.com](http://campbellredangus.com)***

### **Come early for Rolls and Coffee Lunch at 11:30**

Catered by D T Catering

### **Performance and EPD Codes**

1A - 100% Red Angus

1B - 87% - 99% Red Angus

### **Performance Info:**

**BW** - Actual BW

**Adj 205** - 205 day adjusted weaning weight

**Adj YW** - 365 day adjusted yearling weight

**ADG** - Gain on test

**WDA** - Weight per day of age over lifetime

**Adj SC** - Adjusted measurements taken on January 23, 2024.  
Adjusted to year of age.

**CC** - calving code

1 - use on cows

2 - use on cows or growthy heifers

3 - fewer calving problems should occur when used on first calf heifers

### **Eartags**

**Lot numbers** - white tag

**ID numbers** - colored tag

### **Feed & Delivery**

We will offer free delivery of bulls immediately following the sale to central points within 300 miles. Balance at cost. Feeding of bulls by arrangement until April 15, 2024. Bulls fed at buyer's risk. We strongly suggest you purchase insurance on your bulls.

### **Registration Transfers**

Registration papers transferred to buyer when available. Leave name and three line address when making settlement if you want papers transferred.

### **Red Cow Rally DNA Evaluation**

Campbell Red Angus participated in a research collaboration known as the Red Cow Rally, between RAAA and Neogen. By participating in this project, we increased the prediction accuracy of the animals within our herd and verified the parentage of our entire cow herd which allows us to verify both sire and dam for this year's bull crop. In essence, every dam of the bulls in the sale will have a level of accuracy of most traits as if they already had 5 to 25 progeny. While genotyping is very informative to increase EPD accuracy, it will never replace the need to collect valuable phenotypic information. Both of these sources of data combine to provide the most accurate genetic evaluation.

**We reserve the right to retain 1/3 semen interest on any bull.**

Shooter is not only out of our proven Rambler line, the true story is in the dam's of this calf. She boasts a MPPA of 113, the three previous females before her boasts above average MPPAs on eight to twelve offspring, with an average of 365-day calving intervals. Not only does he excel in the growth traits but he is in the top fourth of the breed on four out of five of his carcass traits. You really need to take a good look at this bull.

CBR Ivy comes from a consistent well producing cow line. Her dam has 6 natural calves and is going to calve again. Her granddam has thirteen natural calves and is going to calve again. Her great granddam has had nine calves. If you are looking for longevity and performance in your females here, she is.

## RED ANGUS GUIDE TO EPDS

RedAngus.org

**ProS**..... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

**HB**..... HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

**GM**..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

**GED**..... Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

**BW**..... Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

**WW**..... Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

**YW**..... Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

**ADG**..... Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

**DMI**..... Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

**MILK**..... Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

**ME**..... Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

**HPG**..... Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

**CEM**..... Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

**STAY**..... Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

**MARB**..... Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

**YG**..... Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

**CW**..... Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

**REA**..... Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

**FAT**..... Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)
