Welcome

TO OUR ANNUAL PRODUCTION SALE

Robert, Kara and Robby
5096 95th Street • McIntosh, South Dakota 57641
701-422-3721 • campbellra@westriv.com
campbellredangus.com

Welcome to our Campbell Red Angus 2022 Production Sale. It is with a heavy heart that I write this year's welcome for we had to say goodbye to one of the founding members of our program. He was my friend, my mentor, my teacher, my father and my dad. I promise to continue to raise the honest, hearty, quality cattle that he had the foresight to instill into our herd. We feel quite fortunate we were able to have Harold here on the ranch until he passed.

Last year we made the decision to move the bull sale home. We feel moving the sale home will show a truer representation of the bulls and our program. Be sure to look at the map in the catalog, if you have any questions don't hesitate to give us a call. Take the adventure of coming to the ranch!!!

We are still a family operation you have grown to know and trust. Robert, Kara, and Robby are on the ranch full time. Jennifer is working towards her vet degree in Saskatoon, Saskatchewan. Lacey, her husband and children, as well as Melissa and her husband are still in Wyoming, but come home frequently to help out. Kara is still teaching full time in McIntosh.

The cattle and genetics are the same base you have come to rely on since 1973. This year we participated in the "Red Cow Rally" the Red Angus association offered. What that did was verified parentage and increased accuracies on EPD's through DNA testing. When all is said and done we will have submitted well over 900 animals DNA for testing. All the bulls in the sale are parent verified through DNA. Our goal is to combine our ranch tested genetics with DNA testing to give you a phenotypically desirable animal with the backing of scientific data. We are confident we have produced a predictable money-making animal for your herd. No matter what your selection criteria is you can find what you need here at Campbell Red Angus. 50 years and 3 generations of management input (That's well over 100 years of combined experience) has given our operation a unique perspective.

We have been feeding with our TMR feeder wagon for several years now. This year we fed a higher roughage lower mega-cal ration consisting of alfalfa, mixed millet/wheat hay, corn silage, corn, an adjusted supplement, and mineral. The bulls performed well with an average daily gain of 3.25#. The scrotals are adjusted by the Red Angus Association and were taken January 22, 2022. The EPD's in the catalog are BOLT as of February 1, 2022.

We are bringing 5 quality replacement heifers to our sale that represents a cross section of the herd. The heifers were developed with the whole group until January 22, 2022. They are on a high roughage TMR ration consisting of alfalfa mix hay and corn silage. They did quite well proving their feed efficiency and genetics. We hope you take advantage of this opportunity to bring these outstanding genetics into your herd.

The popularity, reliability, strong performance, and diversity of Red Angus Cattle continues to grow in the cattle industry. Red Angus females are still some of the most desirable cattle selling today. With the recognition of the industry in the carcass merit of Red Angus cattle, I am confident we will be seeing premiums across the board on our cattle. Let Campbell Red Angus genetics help you take advantage of what's to come.

We welcome you to come to the ranch to view the cattle until March 7th at which time we will have the sale on the ranch. We will also have video of the sale bulls at campbellredangus.com available in mid-February for viewing. DVAuction will be available sale day for bidding.

Our family, friends, customers, and cattle are the reason we keep working hard in the cattle business. Please come early on sale day for coffee and rolls. Lunch will start at 11:30 MST. We look forward to seeing you there!

Sincerely,
Robert, Kara, and Robby

Guarantee

Bulls sell as guaranteed breeders. Due to their young age the bulls haven't been semen tested, but we strongly recommend you have them semen tested before you put them in service. All claims must be submitted to the Seller in the calendar year, along with written semen evaluation and health report from a licensed veterinarian. All heifers are sold palpated and open. Seller has the privilege of trying to prove the bull after his return, before making any adjustment. This guarantee is null and void if there is evidence of improper management in care of said animal, or if the inability to breed is due to sickness or injury after being sold. Insurance available through Martin Trudeau Insurance.

PLEASE BRING THIS CATALOG TO THE SALE.

Terms and Conditions

All cattle sell under the recognized terms and conditions of the Red Angus Association of America, and by these additional conditions. Terms of the sale are cash. Any dispute as to bids are settled by the auctioneer. Announcements from the auction block take precedence over printed material in this catalog. Animal is the Buyer's responsibility upon being sold. All persons who attend the sale do so at their own risk.

Come early for Rolls and Coffee Lunch at 11:30

Catered by D T Catering

Performance and EPD Codes

1A - 100% Red Angus

1B - 87% - 99% Red Angus

Performance Info:

BW - Actual BW

Adj 205 - 205 day adjusted weaning weight

Adj YW - 365 day adjusted yearling weight

ADG - Gain on test

WDA - Weight per day of age over lifetime

Adj SC - Adjusted measurements taken on January 22, 2022.
Adjusted to year of age.

CC - calving code

1 - use on cows

2 - use on cows or growthy heifers

3 - fewer calving problems should occur when used on
first calf heifers

Eartags

Lot numbers - yellow tag

ID numbers - colored tag

Feed & Delivery

We will offer free delivery of bulls immediately following the sale to central points within 300 miles. Balance at cost. Feeding of bulls by arrangement until April 15, 2022. Bulls fed at buyer's risk. We strongly suggest you purchase insurance on your bulls.

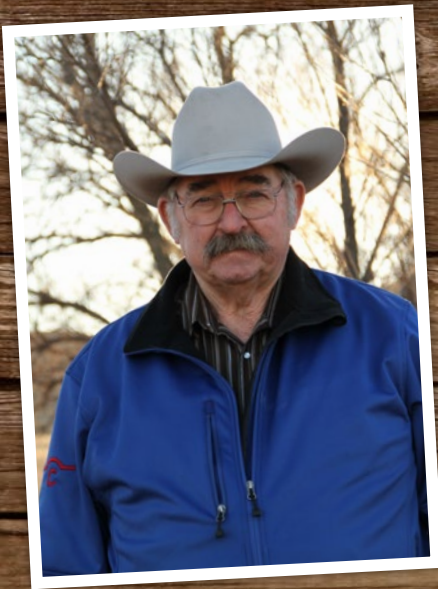

Registration Transfers

Registration papers transferred to buyer when available. Leave name and three line address when making settlement if you want papers transferred.

Red Cow Rally DNA Evaluation

This year Campbell Red Angus participated in a research collaboration known as the Red Cow Rally, between RAAA and Neogen. By participating in this project, we increased the prediction accuracy of the animals within our herd and verified the parentage of our entire cow herd which allows us to verify both sire and dam for this year's bull crop. In essence, every dam of the bulls in the sale will have a level of accuracy of most traits as if they already had 5 to 25 progeny. While genotyping is very informative to increase EPD accuracy, it will never replace the need to collect valuable phenotypic information. Both of these sources of data combine to provide the most accurate genetic evaluation.

We reserve the right to retain 1/3 semen interest on any bull.

IN MEMORY OF

Harold Campbell

2/11/44 - 11/29/21

Harold Robert Campbell was born February 11, 1944, in Lemmon, SD, to Robert A. and Josephine (Deutsch) Campbell. He grew up on the family ranch 12 miles south of McIntosh. He attended rural school through 4th grade at White Shirk Country School. He started his 5th grade year at McIntosh Elementary School eventually graduating from McIntosh High School in 1962. He then attended South Dakota State University in Brookings, SD where he met Sharon (Holm) Campbell and obtained a degree in Animal Science in 1966.

Upon completion of college, Harold went to work for John Morrell Packing Plant in Sioux Falls, SD as a cattle buyer. It was as a cattle buyer that he got his first exposure to Red Angus Cattle. He went to look at a set of steers one day and they were a breed he had never seen before RED ANGUS! He consulted one of the older cattle buyers who told him "Buy that set of steers". He did. Later in life, Harold told his son Robert, "that was one of the nicest sets of carcasses he ever seen hanging in a cooler."

In 1970, Harold and Harvey Campbell purchased a ranch north of McIntosh. After they had purchased the ranch, the previous owner offered to sell them a set of cattle. In the set of cattle, there were some Red Angus cows. Harold remembered that set of steers he had seen at the packing plant and after seeing how well the Red Angus cows excelled maternally, they were hooked. In 1973 Harold and Harvey purchased their first set of registered Red Angus pure bred cows and Campbell Bros. Red Angus was born. Some of the first purchases came from the same region as that set of steers Harold bought as a cattle buyer. Private treaty sales of bulls followed until 1976 when the first "auction sale" was held. In the mid to late 80's Harold and Harvey dissolved their partnership, and the name was changed to Campbell Red Angus.

Harold was very passionate about having only the best Red Angus cattle. He would often say, "If they can't do it under range conditions they aren't staying". No excuses! Or "We sell on the Fairbanks "scale" if the cattle don't weigh, they don't stay". Our logo "producing cattle that perform for the cattleman" stemmed from this no-nonsense approach.

In 1991 Robert returned home to be a more integral part of Campbell Red Angus. Harold had met his dream, ranching with his son, and raising Red Angus Cattle. As time went on, Robert's children joined in on the family business. In 2010 Harold turned the reins of Campbell Red Angus over to Robert. Even though he was technically "retired" Harold was still very influential in the decisions of the ranch and was involved till the very end. Two days before his passing he helped bring the last bunch of cows home for the winter. The day before his death helping feed the Red Angus cattle he loved so much.

Harold passed away November 29, 2021. He is missed by many.

CBR Chief Ram is out of Robby's most profitable cow. She is 11 years old and hasn't missed yet. He is going to be sure-fire calving easy with high milk. If he was a cow, Robby would keep him.

RED ANGUS GUIDE TO EPDS

RedAngus.org

ProS..... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HB..... HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GM..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CED..... Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW..... Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW..... Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW..... Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

ADG..... Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI..... Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK..... Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

ME..... Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG..... Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CEM..... Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

STAY..... Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB..... Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

YG..... Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW..... Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

REA..... Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

FAT..... Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)
