

Demographic Information

Call Name	Osu	DOB	Oct 2018
Registered Name	Portentoso's Scarlet & Gray Osu	Registration Number	SS11013503
Breed	Labrador Retriever	Tattoo	
Sex	F	Microchip	956000013447405
Owner	Nicholas Portentoso	Laboratory #	AN-20-000714
		Report Date	February 24, 2020

These tests were developed and performed by Paw Print Genetics®, Spokane WA.

Explanation of Results

Normal	A 'Normal' result means that your dog does not have the mutation that causes the associated genetic disease.
Carrier	A 'Carrier' result indicates that your dog has inherited one copy of the mutation that has been reported to cause this genetic disease. Your dog may not be clinically affected by this mutation because usually required to cause disease.
Carrier / At-Risk	A 'Carrier / At-Risk' result indicates that your dog inherited one copy of the mutation that has been reported to cause this genetic disease. Based on the mode of genetic inheritance for this particular copy of the gene may result in the disease. Dogs with one copy of the mutation may have a milder phenotype as compared to dogs with two copies of this mutation.
At-Risk / Affected	An 'At-Risk / Affected' result indicates that your dog inherited one or two copies of the mutation that has been reported to cause this genetic disease. Based on the mode of genetic inheritance for one or two mutant copies of the gene may result in the disease.
No Result	'No Result' indicates that we were unable to obtain a genotype for your dog for this specific disease or trait and does not mean that your dog is a carrier or at-risk for this disease. There are a variety of reasons why a reportable result may not be obtained. Unique variations in the genetic code of some individuals may exist and cause certain regions of the genome to not perform properly with a specific test. In addition, a dog's cheek cells could also result in poor sample performance due to inadequate cell counts, bacterial and fungal growth, or the presence of other test inhibitors. An acceptable level of tests with Paw Print Genetics. Dogs with at least 90% of the test results are determined to be acceptable and reportable. If your dog has an unacceptable level of tests with no results, you will be contacted for re-testing.

Please review our [testing terms and disclaimers](#) regarding your results.

B Locus (Brown) - b ^c B Locus (Brown) - b ^d B Locus (Brown) - b ^s	0 0 0	
Brachycephaly	BR/BR	Likely medium to long m
Chondrodysplasia CDPA	cd/cd	Likely typical leg length
Cu Locus Curly Hair	Cu/Cu	Straight coat
D Locus Dilute	D/D	Non dilute
D Locus (Dilute) - d ¹ D Locus (Dilute) - d ²	0 0	
E Locus Yellow/Red	e/e	Yellow/red
E^g Locus Grizzle, Afghan Hound Type	N/N	No grizzle
E^m Locus Melanistic Mask	N/N	No melanistic mask
H Locus Harlequin, Great Dane Type	h/h	No harlequin
K Locus Dominant Black	K ^B /K ^B	No agouti expression all
L Locus Long Hair/Fluffy	Sh/Sh	Shorthaired
L Locus (Long Hair/Fluffy) - Lh ¹ L Locus (Long Hair/Fluffy) - Lh ²	0 0	
Polydactyly	pd/pd	Normal (typical) toes (lik
SD Locus Shedding	sd/SD	Moderate shedding
Sex Determination	X/X	Female
T Locus Natural Bobtail	t/t	Normal tail WT: wild type (normal)

Determinants of coat colors and traits are complex. Many of these variants are known and many of the genes screened in the Canine HealthCheck interact. In addition, not all the genetic factors that contribute to a dog's coat color and traits are complexities in gene-gene interactions, the coat colors and traits reported in your Canine HealthCheck results may vary from your dog's actual appearance. Individual differences in genes throughout the canine genome, not tested in this genet coat color or traits seen in your dog.

Canine HealthCheck is a product of Paw Print Genetics. This test was developed and its performance determined by Paw Print Genetics®. This laboratory has established and verified the test's accuracy and precision. Because all tests are performed are DNA-base, rare genomic variations may interfere producing false results. If you think these results are in error, please contact the laboratory for further evaluation.
