# Valley Fliers May Board Meeting

# Meeting Called to Order at: 6:30

**Present:** Eyre, Glassmyer, DeWitt, Botezatu, Vader plus 8 members and one potential member. **Excused Absent:** Scott

# Approval of April Meeting Minutes

Alan moved to approve as written. John seconded. The motion carried unanimously.

# Treasurer's Report

See Alan's handouts. Alan is working with the Department of Revenue because we filed a tax form with more deductions than revenue. Alan will send them all the receipts, and after they are reviewed we might get a refund. 117 flew more than twice as much as any of the other planes, largely due to one member who is very actively working on an instrument rating. Question from the floor: how did we have a fractional hour of minimum flying fee? Answer: some people fly a fraction of an hour and have to pay the rest. Alan now spreads the insurance cost across each month, though we pay less frequently. Alan did file Q1 2018 taxes even though we are still discussing Q4 2017. While the bank balances look low, Alan has a fair amount of undeposited funds. We are clawing our way back financially. Alan is still figuring out how to account for members above 60, and is likely to start showing owner equity of \$2000 per member as a liability on the balance sheet. That line item will come out of retained earnings. Question from the floor: what is retained earnings? Alan answers it is value the club has over and above our liabilities. Alan notes that almost all the club's income for the year came in April.

# Maintenance Officer's Report

# See Florin's handout.

**63S** went through its annual last month. The cracked step was deferred because repair would require the floorboards be removed. John asks if it will get worse? Jon answers that it will, but he will monitor it. The wheel pants were not replaced because they would have to be removed again when the brakes are redone, so that work was deferred until the pads are redone. When the brakes are done we will need to replace the calipers and discs. Florin noted the hours shown until the next 250 hour inspection are incorrect an he will correct them. Florin expressed some concern that we need to not defer too much maintenance to avoid big bills in the future.

**9MA** We need to get the AD on the seat tracks done. Jon notes one of the wheel pants is damaged. He has a replacement, but it will need to be painted prior to reinstalling those pants. Several commenters note the #4 cylinder seems to get hot quickly. Jon notes it might just be a probe and he will check it. Alan suggests when we do an update, we get a fuel flow meter on 9MA because the fuel gauges are not good. Jon says we can do that. A commenter from the floor noted that 9MA often will run one tank dry before the other. As long as there is fuel in one tank and we are on the both setting, we shouldn't run out of fuel. Question from the floor: what is the rule about running the engine past TBO? Answer: we can legally run past. We are monitoring. We also need to look at its vacuum pump soon.

**117** Jon had to make several checks of the brakes for noise issues. He will have to rework the brake line position to mitigate the issue, but it really is not a functionality issue. The nose gear scissor bearing repair will require removal of the nose gear so has been deferred.

**88L** the pitot and transponder inspections being done by folks from Olympia had scheduling difficulties. They are a little hard to deal with, but are better than Cornerstone. The plug repair was initially reported as a mag issue. It turned out to be two plugs that had broken insulators, a bad situation which can do significant damage. The replacements should be less prone to insulator failure. Question from the floor: what would it cost to put a cylinder head temp monitor on it? Answer: Florin says \$1500 plus installation and worth it. Question from the floor: should we wait for an engine change to install one? Answer: we have quite a while before the engine

change, so we may need to consider it sooner. Alan asks how expensive the installation would be. Jon says installation would likely double the price. John asks if our other planes have fine wire plugs? Jon says some do, but their plug brands are not so prone to the problems.

Scott asks if we will change oil viscosity with the season change? Answer: no, we made an oil change so it is not necessary. Question from the floor: is 9MA still running well? Answer: so far, so good.

Ed asks if we can put an asterisk on legally mandated limits in the airplane books. Jon notes he agreed to do that. He notes everything but the annual and ADs can be exceeded.

# Safety Officer's Report

Randy was not present, so there was no report.

# Old Business

**Insurance Review** John sent out a reminder and got 8 or 9 more responses, but we are still missing about 7. John will follow up individually.

# **New Business**

**Potential Members** John introduced Barrett Thompson as a potential member. Florin asks if he is a pilot already? Answer: yes, around 200 hours, instrument rated but not current. He has been flying at Alternate Air. Alan asked if he was looking for temporary membership? Answer: yes, he will move back to Tennessee at the end of the summer. He understands the costs and it seems like a good deal. Alan asks when he likes to fly? Answer: afternoons or weekends. He'd like to take the plane overnight sometimes. His wife would like to see whales from the air. Question from the floor: how much flying would he like to do? Answer: a couple of short flights a week. Scott asks if the departure from the area is permanent: answer probably yes, but he might want to keep the share for occasional trips back, but they are still considering that option. He owned a Cessna 152 for a few years. John moved to accept Barrett. Florin seconded. The motion carried unanimously.

Plane Captains Florin says a couple of people have expressed interest, but neither have been able to make it to the airport for training. He is monitoring the situation to ensure it helps, rather than hinders his workload. Florin knows how plane captains work at a local soaring club, but is concerned the paperwork with our model may work less well. Florin would like to discuss with the captains how this should work. Jon asks if the plane captains would come warm up the planes prior to oil changes? Alan notes his thought was the tracking sheets would be used to spot trends and would not be tied to oil changes. John and others agree. Having consistent people logging the info would help with consistency. John has baked the form into a kneeboard size and expected completed forms into the book. Question from the floor: would it save annual dollars for members to de-panel the planes? Answer: we've asked, but it might not save anything. Comment from the floor: if members are interested, it might be worth taking a little more time on annuals so they can learn things. Another comment from the floor: Evergreen Soaring has work parties around their annuals. Comment from the floor: if the blank forms are in the book, couldn't anyone fill out the form? Answer: they could, but we feel the consistency would be useful. If folks put their names on the form, we should be able to spot trends. John points out that if a tire is low, there is a pump in the office, and Steve Fribley says there is an electric air pump over by the gas pumps. Florin asks where the blank forms are? John says they are in his computer. He can print some. The topic was tabled for future discussion.

# Free flight hour won by: Scott Snider

Florin moved to adjourn, Scott seconded. Motion carried unanimously.

# Meeting adjourned at:.7:41

Next Meeting: Wednesday, June 13, 2018 @ 6:30 (Food and Social @6:00), Trotters

9:02 PM
