Dear Headmaster,

I was recently at your school to play rugby and I sustained an injury on the pitch, after arriving at your medical center the staff there treated me amazingly well. The nurses kept me hydrated and fed.

The medical staff the GWAS were chatty and great to talk to, they used equipment that I'd never seen before and my Mum was jealous of such modern supplies, .

Due to their strapping the bus journey back was fine, and after getting to A&E the X-ray the doctor informed me it was all relocated with just a minor chip.

A week later, my arm is 80% moving around minus fully straightening and bending, although I can't apply too much force to it. I'm waiting on a fracture clinic appointment and considering a private consultation.

But it would never have gone so smoothly if it wasn't for the fantastic work at the san.

With huge thanks

AH
