

What do I need for an EB2-NIW and what are the chances of success?

There are six criteria listed in 8 CFR, Section 204.5(k)(3)(ii) for an EB2-NIW. Normally you need to fulfill minimum three of these. In addition, you can also try to argue other conditions not listed, but this is tricky.

The six are:

- 10 Years work experience in the Aviation Field.
- License to practice his profession
- Command a salary that demonstrates his exceptional abilities. Meaning you are in the higher paid segment of the industry.
- A membership in professional associations. This can be a Union or Aviation associations. This must be a non-profit. I have a list of associations you can join.
- Recognition of your achievements and significant contributions to your field by peers, governmental entities, or professional business organizations.
- A degree in your field.
