

Chameleon Light Shield for clearing and protecting from organisational entities.

Connect into your heart centre – drop your consciousness into your heart centre. Take a few deep breaths. Connect to your guides and team of the highest light and resonance.

Step 1. Clear any existing entities from your field – using this entity release:

Call for assistance:

(say aloud) 'Archangel Michael please bring down the tunnel of Light. Ariel, Azreal and Aru-Kiri please assist.'

I break any and all agreements or contracts both conscious and unconscious, that I have made, that anyone in my body has made, or anyone in my genetic lineage has made, with any astral entities, organizational entities, thought forms, demons, dark forces, elemental's, AI, aliens or bogeys.

Please go into the tunnel we will take you home if any of the entities are resistant you can say 'entity holding resistance go into the light, we will take you home.'

Toning is also very helpful to ease their release.

When you feel all clear, ask Archangel Michael to take the tunnel back to the fifth dimension.

Once you have cleared your field of any entities and in particular the organizational entity that you may be aware of or that you are about to work with, you can then ask or connect to your guides or preferably you can connect to Archangel Michael and ask to receive a chameleon shield into your field. The Chameleon Light Shield is a shield that enables you to work within organisations which have an entity without having to allow the entity into your field. The Chameleon Light Shield is a dynamic light shield which will give the impression that the organizational entity is within your field but it prevents the entity from actually entering your field at all.

So it's useful when you're working with different clients in different organisations because you want the organizational entity to accept you and to allow you to work within that organisation but you don't want the disruption that having an entity in your field can cause. Asking Archangel Michael to place a dynamic chameleon shield around your field, which will appear as a bright white platinum shield around the outside of your field will help. You may also wish to check with your guides and ask if your shield needs to be around all dimensions of your field?

Or does this shield only need to be around my field only for particular dimensions? For example, around dimensions 1st to 8th.

Organizational entities have varying vibrations and you can also ask your guides before you go into an organisation 'what vibrational level is the organisational entity operating at?'

Then discuss with your guides appropriate shielding. We are suggesting the Chameleon Light Shield because its dynamic but other protection may be necessary for you depending on the entity and depending on the kind of work that you're doing with the organisation, and depending on your own template.
