

Illegitimate and Unfit

Terry Large, MS

There have been a few times in my life that I had to come clean. I am sure that many of us have been put in that position in which we had to play by the rules or go through life knowing that we were part of a lie, part of a dishonesty.

Golf is probably a great example. For example, let's say you moved your ball. Your choice is to act like you didn't or to admit it and take the stroke. Maybe no one saw except you. Yet you announce your error and take the stroke. Or you don't. If you don't and win the the game by one stroke can you really live with yourself?

Adding a new twist, what if some people saw the ball moved? Your friends say it did not move and others say it did. You know the truth. You know it would be a lie not to admit it or at the very least ask the crowd if someone had been taking a video.

Joe Biden knows that ballots were counted after some States stopped counting votes in the evening of November Third. Joe Biden knows that is wrong and against our rules of a clean and fair election. The ball was moved, people saw the ball move. We have video. Yet Joe and his supporters deny any issue.

If Joe takes office on January 20th can we really trust a President who obfuscated the truth by lying? Can a President be legitimate if the majority of voters believe the evidence that he did not really win?

Joe Biden will be illegitimate and unfit as will his administration. He will be a failed President from the moment he takes the oath. An oath that is meaningless coming from a liar. Social and news media will also take another hit. Just ignoring the election process has been a big part of restraining the efforts to see if the ball moved. The social and news media are being seen as illegitimate and unfit because they are censoring our free speech supporting the lies. This can clearly be seen in their refusal to accept any mention of Hunter Biden's laptop content, until after November Third and after Hunter's taxes are being placed under a microscope because of money laundering and foreign money.
