

HOKOL

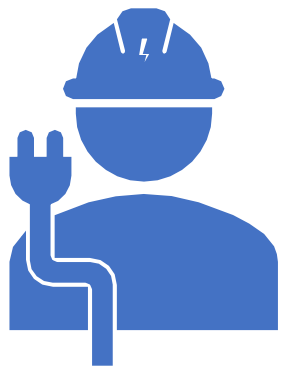

ENERGY ENTERPRISE

HOKOL Energy Enterprise are a group of companies that develops operations in a wide range of fields including Oil & Gas, Energy , Smart technology, Manufacturing, Construction, General supplies and Consultancy.

HOKOL management team is comprised of highly qualified professionals with many years of experience that can provide truly valuable services to our customers.

HOKOL specializes in Energy Services equally has the scope, competence and experience to service other industries such as Energy smart technology, Chemical supplying, Rigs supplying, Manpower employment, technical and commercial support, oil Field Equipment Maintenance, Rig Services, Production services, providing actionable intelligence and practical solutions to major multinational clients

HOKOL deliver advice and support in a tailored approach to our clients, covering a wide range of strategic and project specific issues by utilizing our capabilities.

HOKOL HSE Mission

HOKOL mission is to achieve and maintain Zero Harm in terms of health, safety and environment, and to realize a net positive social, environmental and economic effect on our communities

HOKOL utilizes a HSE Management System which defines the principles on the way we manage our operations ensuring health, safety, and the environment is at the forefront of all that we do.

Our Board of Directors and CEO communicates through the senior management team HSE philosophy to all employees, customers, contractors, and stakeholders and subsidiary business units providing positive evidence of regulatory compliance and conformance to the system

HOKOL Services

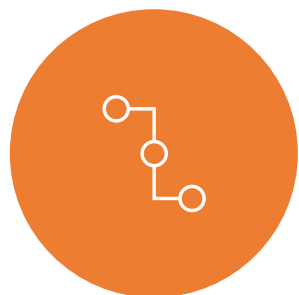

HOKOL provides (technical and non-technical) services in the most qualified and professional level to petroleum companies from small installations to multi-phase mega projects.

HOKOL can support your upstream, midstream, downstream oil and gas activities at all stages of the project lifecycle, anywhere in the world. Technical and consulting services includes inspection, drilling, Completions, tubing and casing running services and maintenance.

1. Project management, Manpower & Technical assistance

Providing control of all exploration operation process and supply full management through operations team.

Control operation cost – quality control and logistic services required for exploration operations.

Technical support for drilling, WO and production operations including.

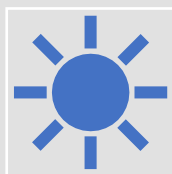

Project management teams to produce a complete project which complies with the client's objectives

2. Smart Energy and clean energy

Smart Energy System an approach in which smart electricity, thermal and gas grids are combined with storage technologies and coordinated to identify synergies between them in order to achieve an optimal solution for each individual sector as well as for the overall energy system

One of the key objectives with the Energy tool is to aid in the design of 100% renewable energy systems. the concept of a 100% renewable energy system has evolved significantly. We define the most recent concept as a Smart Energy System

3. Drilling, WO & Production services

A. Rigs, WO rigs and pulling units

Providing Pulling units and WO rigs required for WO operations.
Company has sharing in one Pulling Unit working with Balyim Petroleum Company.

Providing technical support for WO and restoring well integrity.
Consultancy all WO operations and supply manpower required.

B. Solid Control Equipment

HOKOL understands that shakers are the first line of defence against solids and the performance of a shaker can greatly affect the operational cost per foot while drilling a well.

HOKOL can produce a stiff screen that provides good throughput and conveyance with intellectual property at a reliable cost while still complying with API RP13C.

HOKOL supplies replacement Shaker Screens to fit all majority of the industry's leading shale shaker manufacturers. The screen size range – From API 20 – API 325, covering all major applications.

C. Early Production Facilities EPF

HOKOL Early production facilities (EPFs) are process facilities that enable you to put wells into production faster and recognize cash flow as quickly as possible while continuing to obtain flow data.

HOKOL EPF projects we have worked on include:

Dehydration Plants

Water Treatment Plants

Oil & Gas Sweetening Systems

Amine Plants

Storage & Laboratory Services

Production Handling (Truck Loading and Export Pumps)

Remote Monitoring and Process Automation

D. Drilling and workover operations Logistics

Strategy & Operational Plan Development:

On the initial phase of writing the Logistic operation plan, **HOKOL** takes the lead in developing a Drilling Logistic campaign right from the start, including the logistic strategy development.

Mobilization and operations management:

HOKOL consultants provide advice and support during mobilization and logistics operations.

Contract Management:

negotiates and manages the contracts with the contractors involved in the logistic operations.

Training:

Training of (local) staff on e.g.: Safety, Logistic Management and Transportation operations.

Audits:

Audits on Safety or Logistic efficiency of a running drilling operation.

4. Maintenance & Material Provision Services

Grant that we provide the best Services and high-quality standards of OEM Companies with certified team as per COC and CFO API Standard Q1. for all overhauling Equipment like:

- Draw works, BOP, Travelling Block Crown Block and diverters.
- Generators “Power Supply” Maintenance
- Build-up, implement and follow preventive Maintenance system for each
- Generators in Oil Field.
- Repairing and scheduling the shutdown items stock control.
- Solve all trouble shooting and supplying spare parts required

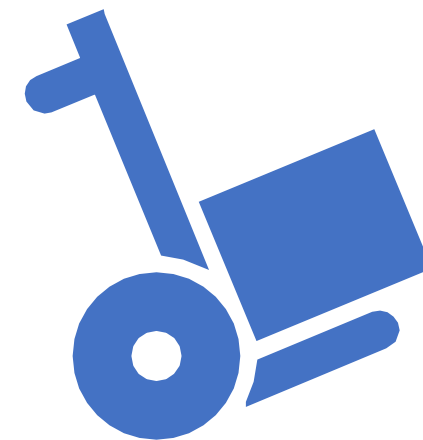

5. Logistics & Supplying services

- Listen to our customers and tailor services to meet their objectives.
- Commit to continuously evaluate, innovate, and upgrade technology and processes to eliminate error and achieve maximum efficiency.
- Focus on being pro-active decision-makers to mitigate supply chain risk
- Allow our customers to be so confident in our ability to deliver their product that they can devote their energy towards the core aspects of their business.
- Provide a full range of global/Local logistics services.
- Facilitate the efficient collaboration of diverse supply chain partners.
- Chemical supply (Variety of chemicals required for Dolling. WO and Production)
- Drilling and completion Fluids
- Bits Suppliers & Tubular supply
- Drilling well equipment like Casing accessories, well heads and downhole tools.
- Production equipment and vessels required for O&G production facility Like Tanks, silos.

6. Sucker Rod Services

- **HOKOL** supply and services all SR services.
- Supplying DHP and its accessories.
- Supplying Surface Units and its accessories.
- Registration in EGPC on going as agent of One of lead company in such industry.

8. Engineering works and architectural finishes

Works with architects, designers & contractors to provide support throughout all phases of your project

We are here to help from design concept to project completion.

9. Training & Career Development

Our training solutions are developed by subject matter experts to help organizations and individuals improve personal competence and skills – core enablers of sustainable business development and competitive advantage.

HOKOL provide innovative learning and development solutions, covering multiple areas and industries, tailored to meet your needs.

Our courses are delivered in both face-to-face and eLearning environments, ensuring training objectives are achieved no matter.

In Cooperation with

CANUSA-CPS

Customer
satisfaction is the
goal of our
company.

Thank you
