

IT Services Sales Executive – SAP ERP

Our client is a solution provider and system integrator focusing on M&A-related IT services, ERP, Digital Transformation, and Analytics. Its global presence between the US, Europe, the Middle East, and India was incorporated in the US in 2017 as a startup and has grown into a mid-size IT services company with over 350 associates and 20M within 7 years.

The focus on the upper Mid-Market segment to provide services around M&A-related technology services coupled with IT modernization consisting of ERP, digital transformation, and Analytics.

Our client is your trusted partner in the realm of digital transformation and enterprise application services. With a commitment to excellence, they specialize in empowering organizations to thrive in the ever-evolving digital landscape. They are a dedicated team of experts who bring a wealth of knowledge and experience to the table, working closely with clients to craft solutions that transcend conventional boundaries.

They are hiring a Sales Executive with 10+ years of experience selling SAP ERP services:

- experience in enterprise application sales with tier 1 or tier 2 type IT services companies
- background with ERP SAP Enterprise sales a must!

****A little news from our Client****

 Exciting News! Our Client has shared a serverless integration design pattern on Azure which can handle MILLIONS of transactions per second 

 Facing challenges in deploying field service management applications? Harnessing, the power of Azure Function and Event Hub, could be the solution you're searching for. 

 From enterprise application services to digital transformation services, and enterprise infrastructure managed services, we're pioneering a new era in technology.
