Why do health care professionals need support?

Health care professionals witness a wide range of challenges and situations that can leave them with vicarious ('secondary') trauma from their work. Health care professionals also deserve to live free from harm, and protecting their own emotional wellbeing as they work to serve others is vitally important.

White Ribbon Alliance UK have produced a resource called Free From Harm which aids midwives and health care professionals working in maternity to understand their rights and the impact of trauma on both their professional practice and lives.
