## The Metal Sales Purlinmaster... The Total Flexibility Solution

### The Challenge

In today's marketplace, the constantly changing metal roofing world demands innovation to fit a specific application at a lower cost.

### The Solution

Metal Sales engineers have answered this challenge in the metal building component market with the introduction of the Purlinmaster. Metal Sales Purlinmaster gives you high quality and improved punching results.

### The Product

The Purlinmaster features line speeds of 180 fpm which enables it to roll high-count lots of product quickly –the lip of the cee and zee can change from 40 to 50 degrees allowing flexibility for any customer's needs. There can also be asymmetrical flange lengths which further enhances application flexibility.

Punch capacity:

- 5/8" Round
- 1-1/4" Round
- 11/16" Round
- 5/8" x 3/4" Slots arranged horizontally or vertically
- 13/16" Round
- 13/16" x 1-1/4" Slots perpendicular to web centerline

### The Benefits

Metal Sales Purlinmaster is a state of the art system. It has better quality, vastly improved punching capabilities and flexibility of hole sizes. Custom profiles along with scoring capability for field breaking of short parts are available. Metal Sales' structural sections are manufactured using ASTM A 1011 Grade 55 steel with a red oxide or gray primer or ASTM A 653 Grade 55 steel with a G90 galvanized finish. Cee or Zee profiles with web depths of 4", 6", 8", 9", 10", 12" and 14" with a variety of asymmetrical or unsymmetrical flanges are available.

Special shape single or double slope and high or low side struts are available in 30' lengths. A variety of a base angles, channels, and hat sections are also available. Please inquire with your nearest Metal Sales manufacturing and sales office location. Contact your nearest branch for load-carrying capabilities.
