

## **Policy on the Use of Photographic and Recording Technology**

This policy has been constructed in line with the Child Protection Policy issued by British Gymnastics and in line with other policies relating to Child Protection published by **Queens Gymnastics Club**.

It is paramount that every member of the club feels safe and that their identities are protected. For this reason, any use of photographic or recording technology must be closely monitored in the interests of maintaining the highest level of child protection. No member of the club, coach, parent/guardian should use photographic or recording technology without the permission of the individual/individuals being filmed/recorded. Any recording/filming must not be shared on social media unless permission has been granted by the participant or their parent (if person under age of 14).

Under no circumstances should any material contravene matters of decency. Neither should material be either filmed or shared.

This policy applies to times of club training and when attending competition venues.

Failure to comply with this policy will mean disqualification of membership from the club.

There may be occasions when it would appropriate to photograph or record routines as part of training or publicity. If you agree to your child/ward's image being used in this manner please ensure that you sign this part of the Registration form.
