“ I chose Sofwave™ because I was looking for a natural way to give my face and neck a lift. I also wanted a treatment that was non-invasive with minimal downtime. Sofwave™ did the trick! *In about 3 months, I saw a significant lift to my jawline, neck, and brow!* ”

C.G. Florida, Sofwave™ Patient

sofwave™

Created by pioneers in the aesthetic industry, Sofwave™ Medical brings a novel approach to skin treatments using SUPERB™ Synchronous Ultrasound Parallel Beam Technology.

Sofwave's breakthrough technology delivers a new standard of care to aesthetic treatments, providing high safety and efficacy for patients.

The future is
SUPERB!
with
 **sofwave™**

Smart Science. Simple Solutions. SUPERB™ Results.

Sofwave's technology is FDA-cleared for:

LIFTING the eyebrow, submental, and neck

IMPROVING fine lines and wrinkles

Short-term **IMPROVEMENT** in the appearance of cellulite

HOW DOES SOFWAVE™ WORK?

Sofwave's next-generation SUPERB™ (Synchronous Ultrasound Parallel Beam) ultrasound technology stimulates the production of new collagen and elastin fibers. The collagen and elastin remodeling process naturally lifts the neck, brow, and submental (under the chin) while improving fine lines, wrinkles, and cellulite appearance for the short term.

Sofwave™ is non-invasive, and patients can return to their daily routine. The treatment is safe for men and women of all skin types, including darker skin of all ethnicities.

CAN SOFWAVE™ BE USED ON THE BODY?

Yes, in addition to lifting the neck, brow, and submental, Sofwave™ has recently gained FDA clearance to include the short-term improvement of cellulite, providing practices with more ways to treat their patients with Sofwave™ and allowing patients to see a more comprehensive improvement in their skin quality.

HOW DOES SOFWAVE™ DIFFER FROM OTHER EXISTING TECHNOLOGIES?

The more aggressive options can cause damage to the upper skin, which may require a more extended healing period and considerable downtime. In addition, there is a higher risk of side effects, including discoloration and discomfort.

HOW LONG IS THE TREATMENT?

A complete treatment can take as little as 30-45 minutes. Patients love that they can fit Sofwave™ into their active lifestyle at any time of the day with no sun sensitivity.

HOW MANY TREATMENTS ARE NEEDED?

Typically, the treatment protocol calls for 1-2 treatments, depending on the patient's skin condition and the physician's recommendation.

WHEN CAN I EXPECT TO SEE RESULTS?

The collagen regeneration process can take up to 12 weeks. Patients are expected to see ongoing improvements in the 3-month period following their treatment. In Sofwave's clinical trials, results have been shown after just 1 treatment.

ARE THERE ANY SIDE EFFECTS WITH SOFWAVE™?

Sofwave™ is designed to minimize downtime and optimize patient convenience:

- No bruising was reported during clinical testing.
- No penetration of the skin is required.
- No device-related adverse events were reported in the multi-center clinical studies.
- None of the patients experienced persistent pain or tenderness that would delay a return to normal activities.
