

Hyaluronic Acid (HA) Serum Guide

Why HA?

The nitrogen plasma technology employed by AgeJET may cause dry and flakey skin during the healing process (about 1 week post treatment). To avoid this and obtain the best results, it is important to stay hydrated by drinking plenty of water and provide continual moisture to your skin.

Hyaluronic acid (HA) is a powerful hydrating ingredient which binds to and retains water, helping to keep your skin moisturized. We recommend that patients start applying HA serum to damp skin 1 week prior to treatment and continue applying to the treated area 3-4 times per day for 5 days after.

HA is safe for continued use after the 5 day post-treatment care period as a part of your normal skincare routine.

Listed below are the HA serum options we recommend purchasing in preparation for your AgeJET treatment.

Recommended HA Serums

1. CeraVe Hydrating Hyaluronic Acid Serum with Vitamin B5 and Ceramides

- Sellers include: Amazon, Target, Walmart, Ulta
- Paraben-free
- Fragrance-free

2. Cosmedica Skincare Pure Hyaluronic Acid Serum

- Sellers include: Amazon, CVS Pharmacy
- Lightweight, non-greasy
- Suitable for all skin types
