

Beauty. Light. Privacy.

SatinDeco® on ExtraClear®

Acid-Etched Glass

A BETTER, BRIGHTER
TRANSLUCENCE

Now you can expect a truer, more beautiful translucence from SatinDeco acid-etched glass. On ExtraClear substrate, the improved SatinDeco offers:

- Higher light transmission
- More uniform light diffusion
- Superior color neutrality

Its silky smooth surface resists smudges and fingerprints, and it's easy to maintain using standard, nonabrasive products.

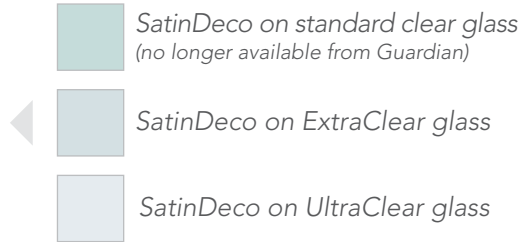

PRODUCT PERFORMANCE

GLASS THICKNESS	VISIBLE LIGHT	VISIBLE LIGHT REFLECTANCE	SOLAR ENERGY TRANSMITTANCE	UV TRANSMITTANCE
6mm (1/4")	91.8%	7.3%	86.6%	71.3%
10mm (3/8")	90.1%	7.1%	82.4%	63.4%
12mm (7/16")	89.1%	7.2%	80.1%	61.2%

Data describes performance of acid-etched surface.

On ExtraClear substrate, SatinDeco acid-etched glass is noticeably more color neutral. In addition to the ExtraClear option, SatinDeco is available on Guardian UltraClear™ low-iron substrate for even greater clarity and color neutrality.

RANGE OF APPLICATIONS

Architects and designers use SatinDeco with ExtraClear to make visually striking and memorable doors and moveable walls, partitions and panel systems, tabletops, stairways, shower enclosures, windows and more. It brings depth and sophistication to a range of exterior and interior settings, including kitchens, bathrooms and bedrooms. It provides privacy with light in a variety of commercial applications, including offices, retail settings, hospitality and healthcare environments. Use it on its own as a monolithic glass or it can be fabricated into an insulated glass unit that includes performance glazing for added thermal insulation or solar control.

FLEXIBLE OPTIONS

SatinDeco on ExtraClear can be:

- cut to size
- laminated
- heat treated
- drilled
- bent
- notched
- screen printed
- polished

AVAILABLE SIZES

SatinDeco is available in size 90" x 130", and in thicknesses from 3mm to 15mm.
