

2024 NATIVE PLANT KITS

Buckthorn Replacment Kit (\$65)

Description:

Restore with native vegetation after invasive buckthorn removal!

After buckthorn seedlings are managed, these quick establishing, semi-aggressive species helps combat buckthorn seedlings wanting to return. It also restores the site back to native species. This perennial mix is formulated for dry to most soil conditions part sun to shade. Consider pairing with Buckthorn Replacement Seed Mix. Plants will grow up to 3 feet tall.

Species:

The 36 plant plugs will include a combination of flowers, sedges, or grasses of the following species: Large Leaf Aster, Canada Wild Rye, Brown Eyed Susan, Silky Wildrye, Zig Zag Goldenrod, Fragrant Giant Hyssop (*Substitutions depending on availability: Common Woodland Sedge, Little Bluestem, Virginia Wildrye*)
