KITCHEN GLAM!

Designers are cranking up the luxe to create a new generation of bling-beckoning, high-sparkle hubs to culinary chic

By Alexandria Abramian

FIND YOUR SPOTLIGHT MOMENT

"When starting any project, I look for the one element, product, color, material, etc. that I can't live without, and that becomes the center of my design/story board. From there, all material choices, textile preferences, paint color selections, textural layers, and grounding elements start to flow and find their way to the project. The "one thing" for me from the very start of this project was the show-stopping True Refrigeration Emerald and Brass refrigerator/freezer column duo. Despite the unconventional choice, it was love at first sight and I knew without a doubt it would be the focal point in the kitchen. It was, it still is, and I'm still very much in love with this appliance masterpiece!" —Danielle Slutzky
