

“You always do what you want to do. This is true with every act. You may say that you had to do something, or that you were forced to, but actually, whatever you do, you do by choice. Only you have the power to choose for yourself.”

- **W. Clement Stone**

I love this quote because it's a great synopsis of where we are right now. For the last couple years, we've been "forced" to do things we may not have wanted to do. Wearing a mask is a perfect example. The government forced us to wear masks with their "mandates", which weren't laws. But there was never any scientific proof that masks actually worked. Now that most of us are aware of that fact, it goes back to choice. It was your CHOICE to put on a mask. It was your CHOICE to believe the nonsense pushed out by the mainstream media to scare you, rather than to do your own research to find out that most of the information fed to you was a lie. I've always written about CHOICE and how we always have the power to CHOOSE. It's more important now than ever. YOU and YOU ALONE have the power to CHOOSE. I beg you to please CHOOSE wisely.

Beware of the Medical Mafia

I'm Italian, so I grew up with Mafia jokes. But this month, I'm going to tell you about a different Mafia, the Medical Mafia, which is alive and thriving in our country. My hope is to help you lose your fear about some deadly diseases, because there are natural ways to defeat them. It's time to stop listening to the Medical Mafia and do your own research. The truth is, many medical professionals you've chosen to trust: your doctor, your HMO or insurance company and especially the drug companies, are lying to you and perpetuating

medical myths for all the wrong reasons. It's always about the almighty dollar. But I'd like to think that sometimes, it's because they just don't know any better. In the next few minutes, as you read this newsletter, people just like us may die from one of 8 dangerous lies medical professionals are telling us. They're not just little white lies, they're whoppers. You've probably heard of most of them, but I know I'm going to offend some people as I expose **the 8 biggest lies of mainstream medicine**. Buckle up. The life you save may be your own, or someone you love. Warning, this is a long one and it's based on my own research. I'm not a doctor, but I'm someone who wants people to be as healthy as they can be...naturally.

1. **If you have cancer, chemo and radiation are your best hope.** I learned about this lie first hand from the death of my dad, who as many of you know, died from an overdose of chemotherapy just two weeks after his first treatment. He didn't die from cancer and most cancer patients don't. He died from his treatment. Imagine your doctor tells you that you have cancer and need chemo and/or radiation and surgery, known as the "Big 3". I get it. It's a scary diagnosis. But I want you to know that it's truly possible to cure cancer naturally, without any of the drugs that could ultimately kill you. There are literally dozens of ways to kill cancer naturally. But you'll probably never hear about them, because doctors only know about the hopeless treatments they learned about in medical school. Many of these options, like chemo, don't work. In fact, chemo's successful only about 3% of the time. The reason is because chemo doesn't kill the "stem cells", which are the true killers. Since it doesn't kill those stem cells, that's why cancer, which often goes into remission during their recommended treatments, eventually comes back. I was stunned to learn after my dad died that 65% of oncologists' salaries come from the amount of chemo they prescribe. The more chemo, the bigger their paycheck. It's CRIMINAL and it killed my dad. Only a very small sliver of the medical community knows what really works. There are plenty of safe options out there. You just have to find them. I've done **exhaustive** research on this topic and what I've learned is nothing short of mind-boggling. Ask questions. Demand answers. Your life depends on it. Fortunately, more alternative clinics are popping up around the United States, but most of the successful clinics are located in Mexico and Germany. Not many people know that Ronald Reagan went to Germany to treat his cancer, as did Bill Clinton. That's where a lot of connected and wealthy people go. Sadly, the United States is the LAST place they want to be treated. Do your research!
2. **Your heart is a ticking time bomb.** Doctors tell you that you either need to have surgery or go on some drug to manage this condition. But **managing** your condition isn't **curing** it. If you listen to their advice, you'll be taking Lipitor, Coumadin, aspirin or any number of drugs meant to manage this problem for the rest of your life. There are actually about a dozen ways to cure high cholesterol or high blood pressure naturally. But you won't hear about them from your doctor. I'll tell you about

one. It's known as the "*44 cent preventative from dropping dead*" and comes from a traditional Japanese dish made from fermented soybeans that dissolves blood clots with unmatched speed. One drop dissolved an entire blood clot in 18 hours. This product could change the way we treat cardiovascular disease. But there's no money in it. Do your research!

3. **It's just a normal part of aging.** Imagine your doctor telling you that you're just going to have to live with it (whatever that "it" is). The best way to deal with this nonsense is by running out the door. Researchers are finding we can extend middle age and one hormone is the key. HGH, Human Growth Hormone, is a blockbuster. For power and longevity, nothing else comes close. Unfortunately, it's really expensive. But there's an effective, low cost solution out there that gets HGH out of your pituitary gland, where it's still being produced, and into your body. Do your research!
4. **You must start on insulin right away.** If you don't, you're risking amputation, stroke, blindness or kidney failure. Diabetes has become the 6th most common form of death in our country....and it's getting worse. An estimated 57 million Americans have pre-diabetes and most of these people have no idea they're at risk. Unknown to the public and most doctors, there are plant nutrients you can take in pill form to maintain blood sugar levels. There are 4 of them and when taken together, have amazing results. Six weeks of testing showed that in almost every case, blood sugar levels dropped with no side effects. Do your research!
5. **Only a calcium channel blocker can control your high blood pressure.** The truth is, you probably have a calcium deficiency because the calcium you're taking is burying itself in your artery walls and muscle cells. Your calcium-logged cells are putting increased pressure on surrounding tissue. This squeeze begins to push up your blood pressure. If you have even a little bit of hypertension, your doctor wants to put you on medicine, but won't tell you when you're going to stop taking it, because the answer is probably never. Most people don't stop taking medicine because their doctor tells them they're cured. They stop because they're sick of all the side effects. About 33% of Americans are categorized with high blood pressure. The good news is there's a natural alternative that in testing, worked in 88% of cases. When combined with a change of lifestyle, blood pressure dropped from 171/108 to 126/83. That's pretty dramatic. This was done with a combination of a mushroom extract and a new fish byproduct. Do your research!
6. **Nothing can help your Alzheimer's.** Wrong. It can actually be stopped, but most doctors don't know how. If you or anyone you know is showing signs of Alzheimer's, head straight to an alternative doctor. A conventional doctor will just tell you that you can't prevent it or stop it. Or, they'll put you on some crazy expensive drug that doesn't work and will cause awful side effects. There are 4 great remedies: 1) DHA - an omega-3 fatty acid. 2) ALA - alpha lipoic acid, recognized as the king of antioxidants. 3) Huperzine-A and 4) Galantamine. Take this advice and you probably won't be among the 50% of people over 85 who develop Alzheimer's. Make sure to get aluminum out of your life, which I wrote about in my April 2022 newsletter. Do your research!
7. **Everybody gets arthritis.** There's a new arthritis blocker out there that beats everything else. This New Zealand import is a harmless natural extract that's powerful enough to take away the pain and swelling of arthritis. Stay away from Celebrex, Vioxx and all the others that have run into PR and legal problems as a result of the side effects they cause. There's a remedy out there comes from ETA's, a compound from the green-lipped mussel that was found to be 91% effective in reducing joint swelling and pain in humans. It's non-toxic and has virtually no side effects. You sure can't say that about drugs. Do your research!
8. **The COVID shot works.** This is probably the biggest lie ever put out from the Medical Mafia. Pfizer was recently forced to release tens of thousands of pages of their data, which they wanted to hide for 75 years. I can understand why. The side effects of the shot are terrifying and Pfizer's OWN documents show that it causes myocarditis in children (which they knew prior to pushing it on kids), blood clots, miscarriages, fertility issues, increases in and recurrences of cancer to name just a few of the horrific side effects. I encourage you all to check out Dr. Naomi Wolf's website. She used to be the darling of the left and now they hate her and attack her for her work on this. Check out: <https://campaigns.dailyclout.io/campaign/brand/cc3b3e5a-6536-4738-8ed6-5ee368c67240>. She has thousands of volunteers and hundreds of lawyers, combing through the released Pfizer documents and what they're finding is horrifying. Dr. Wolf got involved in this issue when the son of a close friend came down with myocarditis after getting the shot in August 2021. Sadly, Pfizer knew by May 2021 that there were cases of myocarditis, particularly in teenage boys, but they hid this

data and pushed the shot anyway. She said she's is not stopping until these criminals are prosecuted for what they've done to the public. NOTHING is better than natural immunity. Data continues to come out that the more you get boosted, the sicker you'll become because your natural immunity is being destroyed. Why do you think that that majority of people now coming down with COVID have gotten the shot and are boosted? I pray every day that the statistics I've read are not accurate regarding the effects on people over the next 3-5 years. The truth is, the odds of you surviving COVID are 97% - 99.99x%, depending on your age. Children absolutely DO NOT need the jab. Look at the VAERS reporting data (Vaccine Adverse Event Reporting System) and see all the deaths (to date 28,532) and adverse reactions (1,287,593) from this shot, which has NEVER been approved by the FDA. They only have an Emergency Use Authorization. Since it's now known to cause fertility issues, if you made your child get it and they can't have children later, you'll know why. Blood clots are another side effect, as is Ramsay Hunt syndrome, which Justin Bieber just announced he had. His wife, at age 25, had a stroke. Both were jabbed. Athletes worldwide are dropping dead. Children are dropping dead. I just read about a 6-year old who had a heart attack at school. The media is calling these strange deaths "Sudden Adult Death Syndrome." Give me a break. Healthy people don't just drop dead! It's time to wake up! Stop listening to and trusting the medical mafia and the fake news and do your research before you put an untested "chemical" into your body. It's not a vaccine. Ask yourself this: why was the definition "vaccine" recently changed? Ask questions. Demand answers. The truth will continue to be revealed, but unfortunately, truth takes time and people are hurt in the process. Why did the media lie about hydroxychloroquine and ivermectin, treatments that actually work for COVID? Why was their sale blocked in many states? I predict many doctors, nurses and the media will eventually be charged with Crimes Against Humanity for what they've done to citizens all over the world. Please, do your research!

I'm tired of being silent. I'm tired of watching people I care about make bad decisions because they don't do their own research. The bottom line is this: it's all about money. That's why they want us sick. They can't profit from a healthy society and they're laughing all the way to the bank. Mainstream medicine killed my father and I want to wake up as many people as possible to the fact that they don't care about us. They don't care about our loved ones. They only care about how much money they can make and how much power they have. The only way to take away their power is to do your own research. Alternative treatments are out there. Take the time to find them. Clearly, they're not for everyone, but they're certainly worth the time to research and learn your options. Knowledge is power. The easy thing is to go on a drug to treat a symptom or take some unproven and untested jab that doesn't work. The harder thing is to stand up for your principals, do your own research and find an alternative doctor and treatment that will actually CURE you. Why would you want to treat the SYMPTOM when you should be treating the CAUSE? Treating the CAUSE of illness is what will Make America Healthy Again!

Have a wonderful month.
