

Mass Action Demand Letter Campaign

Dear Prime Minister (or President)

For quite a few years I have been witnessing heavy aerial spraying over the skies of my city and I am quite concerned about this. The trails left by the unmarked planes are not normal, and they collect and hang in the sky for an unusually long period of time. They often appear to be sprayed in grid patterns intended to cover portions of the sky. A growing number of alarmed citizens like myself are researching and discussing this matter. We are observing the skies very closely, and we are sharing our notes and photos, not only in my city, but in other cities throughout the country.

I have recently discovered that people in 26 other nations around the world are also observing the same spraying overhead, and have been using the term "chemtrails" to describe this activity. Websites are showing up everywhere now on the internet displaying photos that look just mine, taken by people with the same concerns and questions that I and my friends have. The problem is, no one has been able to get a satisfactory answer to the questions of exactly what is being sprayed and why. Every serious inquiry so far has been brushed aside by the governments involved. There have been two types of responses: 1) People have been told these are all "normal contrails", or 2) No response at all.

We are quite certain that chemicals are being sprayed overhead, and we have deep concerns and important questions about this obvious aerial aerosol program that is being conducted. They are as follows:

- 1) Are you aware that this spraying is being conducted?
- 2) Who is doing the spraying?
- 3) What is the spray composed of?
- 4) What is the purpose?
- 5) What will the health impacts be on myself, my children, and the environment?
- 6) Am I funding this through my income tax?
- 7) Has our mayor been informed?
- 8) What is the United Nations position on this activity? Who initiated this program, and how did they manage to implement it on an international scale?
- 9) Why has the public not been informed?

I would very much appreciate your answer to these questions by July 1st, 2011. Your answers will be of great interest, as a growing number of us will be meeting soon to discuss what to do about this issue. The information you offer will be of

critical importance in informing our decision on what action needs to be taken next, to address the systemic spraying of our skies.

Yours truly,
