## Robert F. Kennedy Jr. wins historic \$290 million case against giant Monsanto and Roundup weed-killer

Environmental lawyer, the son of the late U.S. Senator Robert F. Kennedy and nephew President John F. Kennedy, and his team, have won a historic case claiming the product likely caused the cancer of their client.

ROUNDUP (GLYPHOSATE) - MOST COMMON WEEDKILLER IN SCOTLAND

# Kills more than just weeds

At a time in the world when there is so much effort and funding towards trees , why are we continuing to apply poison to the ones we have - when there are safe ways🌱

## Around their bases

Recent FOI reveals that over 100,000 trees in Edinburgh have been plotted and mapped to have weedkiller applied around their bases by Edin Council 🤖🌱

[Link in bio to read the full FOI](#)

People are still shocked to learn that the trees we are trying to protect and safeguard are routinely treated around their bases with glyphosate , simply for weed control.

# Healthy trees ?

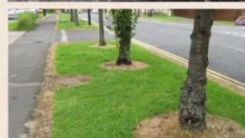

- 🌱 Birds & insects depend on healthy trees for food & habitat
- 🌱 We humans depend on healthy trees for clean air
- 🌱 Our planet depends on non poisoned insects to give us healthy soil
- 🌱 Pets are known to have close contact with tree bases .direct contact with glyphosate = danger
- 🌱 We shade under trees, play under trees and picnic under trees

## ROOT PROBLEM ?

Pesticide  
Free  
Balerno  
(FB)

Edinburgh

People are still shocked to learn that the trees we are trying to protect and safeguard are routinely treated around their bases with glyphosate , simply for weedcontrol...

## In 2014, the Institute of Science in Society (ISIS) reported:

*"The major adjuvant POEA in glyphosate Roundup formulations is by far the most cytotoxic for human cells, ahead of glyphosate and its metabolite. It also amplifies the toxic effects of glyphosate ...*

*It is very likely that the primary target of Roundup, especially its POEA surfactant, is the mitochondria, which play a key role in the development of sperm cells and sperm motility. In addition, male infertility could arise from ROS damages to mitochondrial DNA."*

**'Inert' Ingredient  
Polyethoxylated  
Tallowamine  
(POEA)**

**Why 'Inert'  
Ingredients  
May Be The  
Worst of All**

**The International Journal of Environmental Research and Public Health study found POEA was between 1,200 and 2,000 times more toxic than glyphosate alone, which highlights the problems with letting so-called inert ingredients escape regulatory scrutiny.**

# Roundup® **ALERT**

## Dandelion leaf extract blocks spike proteins from binding to the ACE2 cell surface receptor – Research

By Lance D Johnson  
June 28, 2021

The engineered spike proteins from SARS-CoV-2 can be STOPPED by a common “weed” that is exterminated from lawns every year.

A German university study found that the common dandelion (*Taraxacum officinale*) can block spike proteins from binding to the ACE2 cell surface receptors in human lung and kidney cells.

The water-based dandelion extract, taken from the plant’s dried leaves, was effective against spike protein D614 and a host of mutant strains, including D614G, N501Y, K417N and E484K.

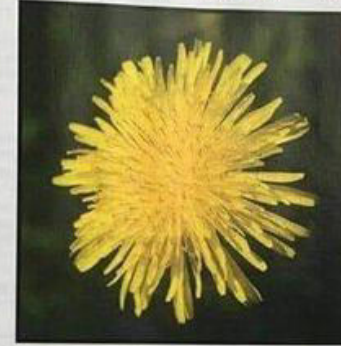

### Dandelion extract blocks SARS-CoV-2 spike proteins and their variants

The researchers used high molecular weight compounds taken from a water-based dandelion extract and put them to the test in human HEK293-hACE2 kidney and A549-hACE2-TMPRSS2 lung cells. The dandelion blocked the protein-to-protein interactions between the S1 sub unit of the spike protein and the human ACE2 cell surface receptor. This effect was also true against the spike protein mutations from the predominant variants in circulation, including the United Kingdom (B.1.1.7), South African (B.1.351) and Brazilian (P.1) variant.

The dandelion extract stopped SARS-CoV-2 spike pseudotyped lentivirus particles from attaching to lung cells and stopped an inflammatory process called interleukin-6 secretion. Because the study was conducted *in vitro*, further clinical studies are needed to understand how the dandelion extract is absorbed and utilized in biological systems of the human body.

Even though tens of billions of public funds have been poured into experimental vaccine development and propaganda campaigns, the world continues to struggle with new respiratory infections, as SARS-CoV-2 is pressured to mutate into different variants. There is no

evidence to suggest that coronaviruses can be eradicated from the Earth, so human adaptation will be essential going forward. Dandelion extract is one of many herbs that may assist in a healthy immune response. Better yet, dandelion extract could prove to prevent infections altogether, by blocking the precise channel by which the spike proteins attach.

and cause viral replication. Other natural compounds have been investigated using molecular docking studies:

**Nobiletin** is a flavonoid isolated from citrus peels.

**Neohesperidin**, a derivative of hesperetin, is a flavanone glycoside also found in citrus fruits.

**Glycyrrhizin** is a molecular compound extracted from licorice root. All three of these natural substances also block spike proteins from binding to ACE2 receptors.

**Hydroalcoholic pomegranate peel** extract blocks the spike protein at the ACE2 receptor with 74 percent efficacy. When its principal constituents were tested separately, **punicalagin** was 64 percent effective, and **ellagic acid** was 36 percent effective.

These natural compounds (along

with dandelion extract) can be readily mass produced, combined and deployed as preventative medicine for all future spike protein variants. These herbs are generally recognized as safe, and there are no known cases of overdose with dandelion leaf extract. According to the European Scientific Cooperative on Phytotherapy, the recommended dosage of dandelion leaf is 4–10 grams steeped in hot water, up to three times per day.

The study authors warn that reliance on vaccines is risky and dangerous, not just for individual health but also for herd immunity. Vaccine reliance only focuses on antibody augmentation and is proving to be a high-risk intervention with short term results. Vaccine injuries are frequently reported. Re-infections post vaccination are also common, as the vaccine puts pressure on the original engineered spike protein to mutate.

The authors conclude: “Thus, factors such as low toxicity in humans and effective binding inhibition of five relevant spike mutations to the human ACE2 receptor, as reported here *in vitro*, encourage for more in-depth analysis of *T. officinale*’s effectiveness in SARS-CoV-2

prevention and now requires further confirmatory clinical evidence.”

# ROOT PROBLEM ?

People are still shocked to learn that the trees we are trying to protect and safeguard are routinely treated around their bases with glyphosate , simply for weedcontrol...

**Edinburgh council use of controversial weedkiller rises despite pledge to cut**

The amount of weedkiller used last year was described as 'shocking'

Posters displayed in Edinburgh 2023 by the local group of activists

Did you know that Glyphosate (Roundup) weed killer sprayed on GMOs and non organic food, is allowed on 160 of our foods by the EPA at levels far above that which has shown to **destroy gut bacteria**? The gut bacteria is the stronghold of our immune system and is where Tryptophan is stored and made. Without Tryptophan our bodies cannot make Serotonin or Melatonin which regulate insulin, (diabetes) mental processing and illness, feeling satiated (obesity), bi polar and even acts of violence.

Glyphosate has been **found in the majority of our environment and food**: rain, tap water, air, streams and even in our cereal, honey, breast milk and cotton products. It is almost impossible to avoid.

Did you know that **glyphosate can break down the blood brain barrier**, allowing toxins into the brain such as chemical off gassing from fire retardant on pajamas, sofas and toxins in vaccines?

Did you know that **glyphosate destroys the tight junctions of blood vessels**, hampering the flow of nutrients to bones and organs, leading to osteoporosis, arthritis and more?

Roughly **8,700 plaintiffs** have made similar cases in state courts across the country, alleging that exposure to glyphosate-based herbicides led to various types of cancer. The impact could be huge if Monsanto continues to fight and lose in jury trials, and an accumulation of wins could force the company to consider settling with plaintiffs.

# Landmark lawsuit claims Monsanto hid cancer danger of weedkiller for decades

**In June, a California groundskeeper will make history by taking company to trial on claims it suppressed harm of Roundup**

▲ Monsanto has been accused of hiding the dangers of its popular Roundup products for decades, a claim the company denies. Photograph: Benoit Tessier/Reuters

At the age of 46, DeWayne Johnson is not ready to die. But with cancer spread through most of his body, doctors say he probably has just months to live. Now Johnson, a husband and father of three in **California**, hopes to survive long enough to make Monsanto take the blame for his fate.

On 18 June, Johnson will become the first person to take **the global seed and chemical company** to trial on allegations that it has spent decades hiding the cancer-causing dangers of its popular Roundup herbicide products - and his case has just received a major boost.

How to

# PREVENT ANOTHER PANDEMIC

## Turn Off TV

So fear, propaganda and brainwashing won't control you.  
#mockingbirdmedia

## Optimize Your Health

By prioritizing your health you minimize your risks. Your health is YOUR responsibility!

## Don't Trust The "Experts"

You are your body's expert! Think critically and do your own research.

## Show Your Face

Breathe in fresh air, not your body's waste & germs.  
#masksdontwork

## Support Natural Immunity

Get your vitamin D level between 50 & 80 ng/ml.

## Spread Love Not Fear

Don't isolate! Community builds immunity!  
#lockdownsdontwork

## Speak Out

Spread truth - no matter what the cost - even if your voice shakes!

## Stop the Shots

They NEVER prevented infection or transmission, nor were they "safe & effective." Check CDC for deaths and injuries associated with them.

# Flies & Mosquitos may enjoy some GRAPHENE OXIDE also!

## Application of graphene oxide in preparation of feed for lepidoptera and diptera insects

### Abstract

The invention discloses an application of graphene oxide in preparation of feeds for lepidoptera and diptera insects. Wherein the mass-to-volume ratio ( $\mu\text{g/mL}$ ) of the graphene oxide to the feed for lepidoptera and diptera insects is 500: 1-2000:1. The feed is prepared by the following method: preparing a graphene oxide solution, preparing a culture medium, and dissolving the culture medium in the graphene oxide solution to prepare the graphene oxide-based feed for the diptera insects. The graphene oxide-based lepidoptera and diptera insect feed can shorten the growth period of insects, improve the survival rate of larvae, increase the weight of the larvae and pupae, and greatly reduce the time and production cost in the practical application process.

The Big Names Investing in Lab-Grown Meat

Juan Pablo Giraldo, an associate professor of botany and plant sciences, says that "ideally, a single plant would produce enough mRNA to vaccinate a single person."

"We are testing this approach with spinach and lettuce and have long-term goals of people growing it in their gardens," he added.

NOQ Report indicated that one possible motive behind this project is the fact that many do not want to get vaccinated against COVID-19. By putting the vaccines in the food people eat (including tomatoes, as seen in the video (at the source link \_Ed\_e), more can get inoculated - especially those who refuse the jab but don't know the salad on their table is enough to vaccinate them.

#### More plant-based vaccines being tested

According to a report published last month by DW News, scientists claim that rice, corn, potatoes, and lettuce may all be utilized to manufacture antibodies. Biotech companies are reportedly conducting clinical studies with their plant-based medicines or are seeking permission from regulatory authorities in order to fight diseases such as "ebola, norovirus, and COVID-19."

The report says that the plant-based vaccine, even though it is still being tested on animals, has already aroused the attention of a large number of people.

It states that *Nicotiana benthamiana*, a close relative of tobacco, is the subject of research being conducted by the Canadian biotechnology firm Medicago and Britain's GlaxoSmithKline. The trial has 20,000 participants.

This particular trial reportedly drew a large number of vegan and vegetarian test subjects in Argentina, the country with a long livestock tradition. Argentina is the world's second largest beef consumer per capita, but the number of veg-

etarians and vegans is increasing. They now account for more than 10% of the population. Preliminary findings for the plant-based vaccine, the report said, show that it can generate up to 50 times more antibodies than conventional vaccines.

Additionally, it claimed that people are becoming more "environmentally aware" on a daily basis, which served as a backdrop for the plant-based vaccine.

According to Zacharie LeBlanc of Queensland University of Technology, the benefit of utilizing plants lies in the "system's scalability" over these other "mammalian cell-based" methods. It's also cheaper and safer.

"It's visibly a lot cheaper when you're producing a plant to amplify this biomass which can then produce your vaccine," he said.

When asked how soon this plant-based COVID vaccine will be accessible, LeBlanc said that the main challenge is getting through the clinical trials.

He explained that the Medicago group is currently in phase three clinical trials for the development of a COVID-19 vaccine and that after obtaining the spike protein sequence, they were able to create a vaccine in 20 days. That implies they already have it.

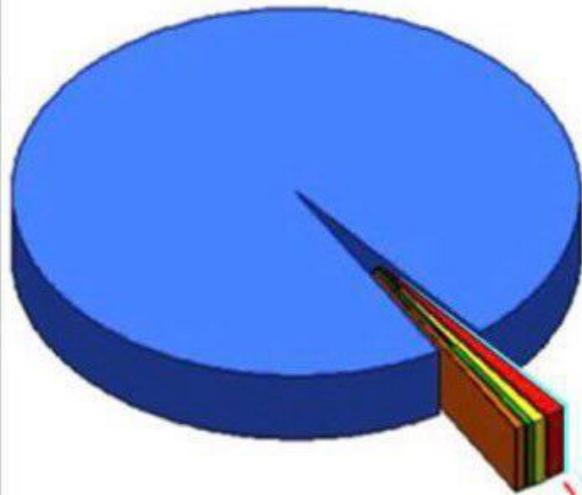

"It's just that you need all that time to make sure it's safe to distribute to the general population," he said. "And that's why those lengthy clinical trials are there."

# How about the CLIMATE CHANGE – NET ZERO issue?

## GREENHOUSE GASES IN THE ATMOSPHERE

- Water Vapor
- CO2
- Methane
- N2O
- Other
- Human caused CO2

Water Vapor is Earth's most significant greenhouse gas, accounting for about 95% of Earth's greenhouse effect.

CO2 is only 3.6 % of all Greenhouse effect

The Greenhouse Effect is over 99% Natural  
Nature produces 99.72% of the Greenhouse Effect

Man contributes only 1/3 of 1%. (\*)

Conclusion:  
Water Vapor which absorbs and traps heat from the SUN is the most dominant factor over the temperature of our atmosphere.

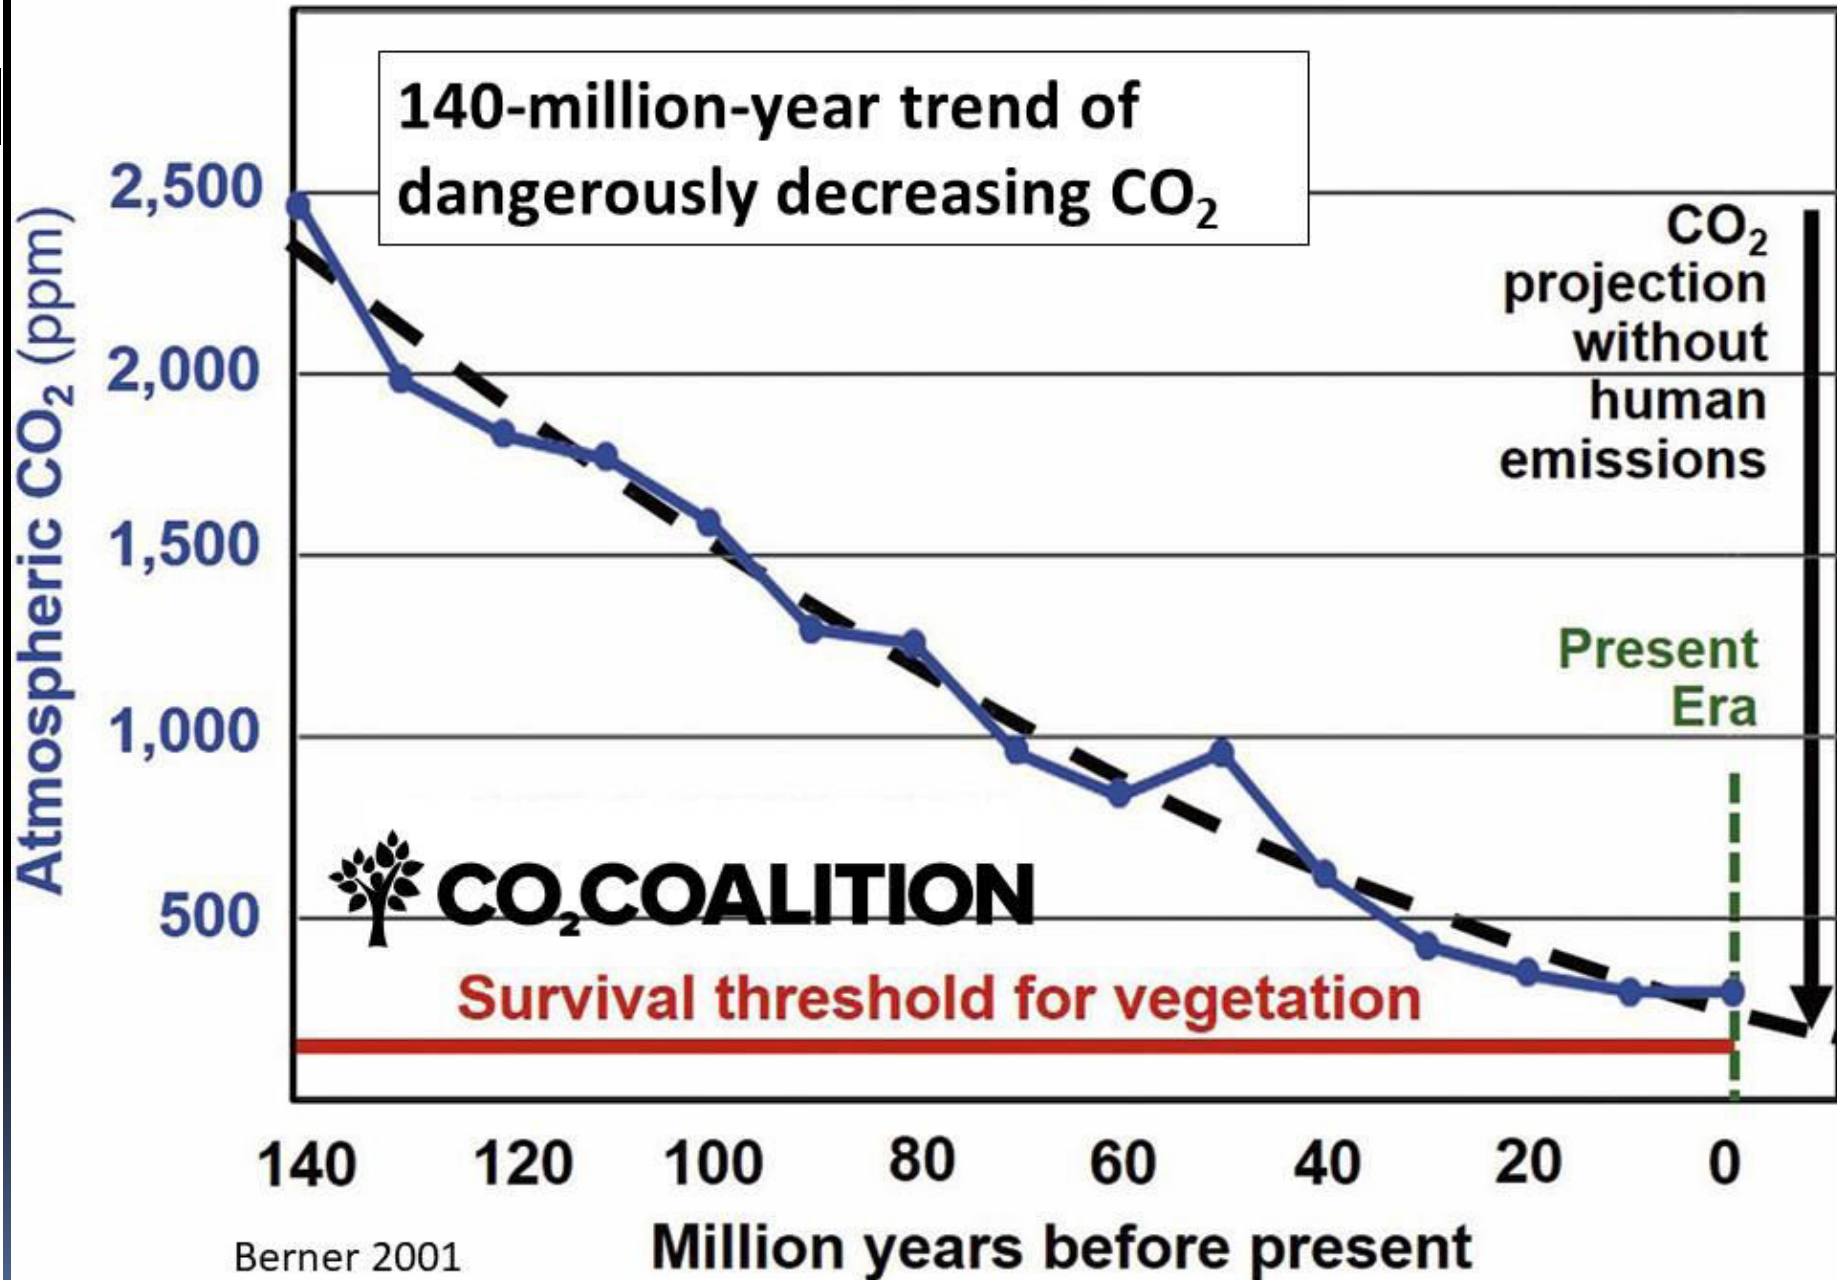

(\*) geoengineering & other military operations not considered

### FACTS ABOUT CO2

#### CARBON DIOXIDE

Atmosphere: 720,000,000,000 tons of CO2  
Humans output: 6,000,000 tons of CO2  
= .000008 of the atmosphere

Bottom Line: Water Vapor - not CO2 is the most influential greenhouse gases

#### ABSTRACT

Chemtrails and Covid-19, two faces of Evil, threaten all life on our planet solely for political reasons. If we are to have a viable future on this planet, a critical mass of humanity must wake up to the atrocities of the ongoing chemtrail and biological operations. People must break out of their mass formation hypnosis and distractions, start to look up, and bear witness to the terrible suffering of the natural world around us. We are not separate entities from the rest of the biosphere: if the forests die, the wildlife dies, and the oceans die, we too will die. Our time is short – action is urgently needed now to salvage what remains of our natural life support systems and give our children a healthy and viable future.

## Triggering Earthquakes

There is no denying that earthquakes have always occurred and were and sometimes still are a natural event. Earthquakes contributed to the reshaping and forming of the continents. But today, technology exists to trigger earthquakes and evidence of some of them being triggered have surfaced over time by testimony from witnesses who reported anomalies of the event.

# Feasibility of aerosol vaccination in humans

Yehudah Roth <sup>1</sup>, Jerry S Chapnik, Philip Cole

Affiliations + expand

PMID: 12656420 DOI: 10.1177/000348940311200313

## Abstract

The feasibility of using aerosol vaccines to achieve mass and rapid immunization, especially in developing countries and disaster areas, is being assessed on the basis of current available information. The aerosol mode of vaccine introduction, which best follows the natural route of many infections, may first lead to development of immunity at the portal of entry, and may also induce a more generalized defense. The recommended optimal way of introducing an aerosol vaccine is nasal breathing, which is more suitable for geriatric and pediatric populations, permits use of greater antigen volumes, and allows easier monitoring of results. Technical requirements for ideal aerosol vaccines and delivery systems, possible adverse effects, and cost-effectiveness are other issues addressed. Several thousand human subjects have been aerosol-vaccinated over a period of many years in Russia with live-attenuated strains against many diseases. Extensive field trials in South America with aerosolized live-attenuated measles vaccine have also been successful, and excellent results have been reported with pilot projects employing inactivated or live-attenuated aerosol influenza A vaccine. We conclude that aerosol immunization seems a promising method of vaccination. Although some basic information is still lacking, this method has already been used

*Primum non nocere* is Latin for First, do no harm, one of the guiding principles of medical care. Yet there is a large body of scientific evidence confirming numerous vaccine safety deficits that counteract well-publicised benefits. For example, several studies in this book show that mercury and aluminium in vaccines can cause neurological, immunological and developmental harm. Other studies show that childhood vaccines are associated with an increased risk of cancer, allergies, seizures, bleeding disorders, and type 1 diabetes. The peer-reviewed scientific studies in this book also show that...

- A history of measles and mumps is protective against fatal heart attacks and strokes.
- The pertussis vaccine caused virulent vaccine-resistant strains of pertussis to emerge.
- Chickenpox vaccines reduced cases of chickenpox but increased cases of shingles.
- Children have an increased risk of requiring emergency care after receiving MMR.
- Vaccinated people can spread disease, making herd immunity an unrealistic goal.
- Many doctors and nurses are unvaccinated due to concerns about adverse reactions.
- Parents who reject vaccines for their children are highly educated.

# Dissolving Illusions

**Disease, Vaccines, and the Forgotten History**

**Suzanne Humphries, MD  
Roman Bystrianyk**

Not too long ago, lethal infections were feared in the Western world. Since that time, many countries have undergone a transformation from disease cesspools to much safer, healthier habitats. Starting in the mid-1800s, there was a steady drop in deaths from all infectious diseases, decreasing to relatively minor levels by the early 1900s. The history of that transformation involves famine, poverty, filth, lost cures, eugenicist doctrine, individual freedoms versus state might, protests and arrests over vaccine refusal, and much more. Today, we are told that medical interventions increased our lifespan and single-handedly prevented masses of deaths. But is this really true? **Dissolving Illusions details facts and figures from long-overlooked medical journals, books, newspapers, and other sources. Using myth-shattering graphs, this book shows that vaccines, antibiotics, and other medical interventions are not responsible for the increase in lifespan and the decline in mortality from infectious diseases.** If the medical profession could systematically misinterpret and ignore key historical information, the question must be asked, "What else is ignored and misinterpreted today?" Perhaps the best reason to know our history is so that the worst parts are never repeated.

Dr. Ben Tapper

@DrBenTapper1

If I told you that my CHILD was injured in a car accident, you would be compassionate and worried. If I told you it was because the BRAKES FAILED, you would be shocked and appalled. If I told you I found out the manufacturer decided not to bother testing the brakes, you would be mad and tell me to SUE. If I told you I found over 60 studies showing they knew they would fail and opted instead to cover it up, your HEAD WOULD SPIN. If I further told you that: The government KNEW ALL ALONG ABOUT THE DANGERS; that laws were passed to PREVENT ANYONE FROM SUING the manufacturers; that there were HUNDREDS OF THOUSANDS of killed/injured CHILDREN, you would be beyond yourself trying to work out how to help these kids. But replace the word CAR with the word VACCINE and you would run a mile.

### THE VACCINATION RACKET

**"Vaccination procedures are a highly politically motivated non-science, whose practitioners are only interested in injecting multitudes of vaccines without much interest or care as to their effects. Data collection on reactions to vaccines is only paid lip service, and the obvious ineffectiveness of vaccines to prevent diseases is glossed over. The fact that natural infectious diseases have beneficial effect on the maturation and development of the immune system is ignored or deliberately suppressed. Consequently, parents of small children and any potential recipients of vaccines and any orthodox medications should be wary of any member of the medical establishment (which is little more than a highly politicised business system) extolling the non-existent virtues of vaccination."**

Viera Scheibner, Ph.D. (2000)

## Do not attempt cardiopulmonary resuscitation (DNACPR) decisions

CPR stands for cardiopulmonary resuscitation. It is a treatment that can be given when you stop breathing (respiratory arrest) or your heart stops beating (cardiac arrest).

CPR tries to get your breathing and heart going again.

CPR can involve:

- pressing down hard on your chest repeatedly (chest compressions)
- a machine to stimulate your heart using electrical shocks (sometimes more than once)
- equipment that helps move oxygen around your body (artificial ventilation)
- giving medicine by injection

### How successful is CPR?

## DNA nanotechnology

*Nadrian C. Seeman<sup>1</sup> and Hanadi F. Sleiman<sup>2</sup>*

Abstract | DNA is the molecule that stores and transmits genetic information in biological systems. The field of DNA nanotechnology takes this molecule out of its biological context and uses its information to assemble structural motifs and then to connect them together. This field has had a remarkable impact on nanoscience and nanotechnology, and has been revolutionary in our ability to control molecular self-assembly. In this Review, we summarize the approaches used to assemble DNA nanostructures and examine their emerging applications in areas such as biophysics, diagnostics, nanoparticle and protein assembly, biomolecule structure determination, drug delivery and synthetic biology. The introduction of orthogonal interactions into DNA nanostructures is discussed, and finally, a perspective on the future directions of this field is presented.

The fabrication of nanometre-scale structures uses two different approaches, 'top-down' and 'bottom-up' methods. The top-down approach starts from large structures

by the base pairing of single-stranded overhangs, called sticky ends, into a 3D crystalline material. Thus, rather than relying on trial and error to crystallize biological

## Dynamic DNA nanotechnology: toward functional nanoscale devices

[Marcello DeLuca](#),<sup>a</sup> [Ze Shi](#),<sup>b</sup> [Carlos E. Castro](#)<sup>cd</sup> and [Gaurav Arya](#)  <sup>\*a</sup>

 Author affiliations

### Abstract

Dynamic DNA nanotechnology involves the creation of nanoscale devices made of DNA whose primary function arises from their ability to undergo controlled motion or reconfiguration. In the past two decades, dynamic DNA nanotechnology has evolved to the point where it is now being employed in devices intended for applications in sensing, drug delivery, computation, nanorobotics, and more. In this review article, we discuss the design of dynamic DNA nanodevices and the characterization and prediction of device behavior. We also identify a number of continuing challenges in dynamic DNA nanotechnology and discuss potential solutions to those challenges.

# Changes to the Human Rights Act in the UK:

57. Potential scenarios could cover a situation where an individual was likely to spread a particularly infectious disease with high human mortality to a significant number of others, or where there is an immediate risk that a particularly hazardous contaminant could be released with serious consequences for human health. Any assessment of whether the threat was serious and imminent would be done with regard to the advice of the Chief Medical Officer (“CMO”), and emerging local or global scientific advice.

58. The following special restrictions and requirements may only be contained in regulations which indirectly enable their imposition (i.e. they cannot be imposed directly by regulations, they could only be imposed by a decision taken under the regulations):

- a requirement that a person **submit to medical treatment**, ???
- a requirement that a person be removed to a hospital or other **suitable establishment**,
- a requirement that a person be **detained** in a hospital or other suitable establishment,
- a requirement that a person be **kept in quarantine**.

59. As a result, a decision to impose those requirements could only be taken in the most extreme circumstances where there was a serious and imminent threat to public health, and it is considered that, because of the nature of the threat and the circumstances at the time, the decision would be proportionate to the overall aim of protecting public health. It should be emphasised that a decision to impose such requirements would only be taken **where individuals did not voluntarily accept such constraints** and whose actions in doing so would put the wider population at significant risk.

# HUMAN RIGHTS ACT REFORM

## TOP 8 ISSUES

WHO Pandemic Treaty & the amendments to the International Health Regulation make state sovereignty obsolete.

<https://jamesroguski.suystack.com/p/an-open-letter-to-world-leaders>

James Roguski

Upgrade to paid

Amendments to the International Health Regulations were adopted at the 75th World Health Assembly on May 27, 2022.

There is an 18 month period during which the leader of every nation can REJECT the amendments under Article 61 of the International Health Regulations.

The deadline to reject the amendments (December 1, 2023) is rapidly approaching. NOW would be a very good time for YOU to speak up!

To my knowledge, not a single politician on Earth has spoken up against the amendments that were adopted on May 27, 2022.

### A MESSAGE TO WORLD LEADERS:

Please watch the video below...

A MESSAGE TO WORLD LEADERS

saveourrights

## TO THE INDIVIDUAL

### PERMISSION REQUIRED

You will now need to seek permission to bring your Human Rights case to court **this will prevent many cases being heard**

### REDUCED RESPONSIBILITY

It will reduce the positive obligations put upon public bodies **disadvantaging the most vulnerable in particular**

### GREATER GOOD

Society could be given more rights than the individual so **whatever the Government can justify for the greater good will be more important than you or your child**

### RIGHT TO RIGHTS

A persons right to rights will no longer be universal but instead be judged by the courts **are you good enough to have your Human Rights? Is your neighbour?**

## PROCEDURALLY

### WILL OF PARLIAMENT

Judicial amendments will not be allowed unless in line with the will of Parliament **the courts must obey the Government**

### JUDGES NO LONGER JUDGING

The Government will be more prescriptive to the courts giving it explicit guidance and no longer allowing it to interpret legislation **preventing judges from doing their job**

### SECRETARIES OF STATE FREE FOR ALL

The courts will be prevented from getting rid of Statutory Instruments even if they're not compatible with Human Rights **allowing Secretaries of State free reign**

### GAPING HOLES

Where legislation was once underpinned by the Human Rights Act it no longer will be leaving gaping holes in legislation **opening up the potential for many Human Rights abuses**

NONE OF THE REFORMS STRENGTHENS OUR HUMAN RIGHTS THEY MERELY ALLOW THEM TO BE BENT TO THE GOVERNMENTS WILL

Follow Save Our Rights UK for the How to Guide on the consultation and more

## MAIN FACTORS THAT CAN TRIGGER AND AGGRAVATE DISEASES (I) - A Guide For Personal Research

### EMF RADIATION

-cause of cancers, neurologic, cardio-vascular and auto-immune diseases, infertility

**WIRELESS** in the house, at school and at work

**MOBILE PHONE RADIATION** - especially when connected to the Internet (WiFi, Mobile Data, Bluetooth)

**ANTENNA MASTS** in the neighbourhood (whatever antenna you can see from your window is clearly affecting you)

[unitefortruth.online/wifi%2F-5g-issues](https://unitefortruth.online/wifi%2F-5g-issues)

[unitefortruthonline/wifi-health-advises](https://unitefortruthonline/wifi-health-advises)

### SUGGESTIONS:

- Hardwire your computers, laptops (connect **ETHERNET CABLES** to the ROUTER & SWITCH OFF WIFI on the router or/and on your Internet Provider's page)
- Keep your PHONE OFF WIFI, MOBILE DATA, BLUETOOTH (download what you want to hear, watch, read, play & have it offline)
- As much as possible, keep your phone on **AIRPLANE MODE** and use **TEXT MESSAGES INSTEAD OF CALLING**
- If speaking on the phone, keep it on **SPEAKER**, always at distance from your body, or use an **AIR TUBE HEADSET**
- If you need to keep your phone open, place it in an **EMF PROTECTIVE COVER, BAG** that can be bought online
- Keep your mobile phone calls **SHORT** and use a landline or Skype, Zoom, FB Messenger, MS Teams on a hardwire computer for free calls
- Avoid staying in places where EMF exposure is high; particularly avoid using **WIRELESS** when in a vehicle (car, bus, train) as radiation is enhanced
- **DO NOT EXPOSE CHILDREN** to **WIRELESS, MOBILE PHONE, ANTENNA MAST RADIATION**: they are +60% more affected by it than the adults.

**LED LIGHT - BLUE LIGHT** (or white light saturated in blue radiation) from phones & other devices screens, car lights, public and home lighting has got a damaging effect on the eyes and the body, potentially leading to **eyesight damage, cancers and auto-immune issues**

### SUGGESTIONS:

<https://unitefortruth.online/led-lights>

- Use **blue-light blocking glasses** (order online) or software such as **Eye Saver** that you can download for free for your devices
- Do not use your devices in the dark
- Sleep in a completely dark room and ensure you have a good night sleep so to keep the levels of the essential hormone **melatonin** high

**GLYPHOSATE** - this **possibly carcinogen (according to WHO)** a substance that is affecting all organic life is widely used in agriculture and weed-killing— it is pervasive in the environment and can be found everywhere, but especially in cereals, processed foods, on the grass, bushes and trees and various other plants sprayed in communities. Numerous studies prove that it is a strong **genotoxic, causing leaky gut, autoimmune & neurological issues, cancers**

### SUGGESTIONS:

[unitefortruth.online/glyphosate](https://unitefortruth.online/glyphosate)

- Choose **GLUTEN-FREE** and, ideally, certified **ORGANIC FOODS**
  - Lobby and control your council in matters of **GLYPHOSATE SPRAYING** in your community (for even if motions are in place, they may still do it)
- Research for the use of **CHLORINE DIOXIDE, DANDELION, MILKTHISTLE, NAC, GLUTATHIONE, HUMIC & FULVIC ACID** as means which can help detox the body from glyphosate. See more at: <https://unitefortruth.online/natural-health-solutions>

## MAIN FACTORS THAT CAN TRIGGER AND AGGRAVATE DISEASES (III) - A Guide For Personal Research

**SUGAR** - The most common toxic food is refined SUGAR, which has no nutritional value, is very addictive and is well known as a case of **hyperglycaemia, diabetes and obesity**; it has also been shown to be linked to **cardiovascular disease, cancer proliferation and Alzheimer**. According to Diabetes UK, hyperglycaemia and diabetes, it **increases the chances of death for the covid-19 patients four fold**.

**ASPARTAME**—Introduced as a substitute for sugar, especially in diet sodas or sugar free products, aspartame is admittedly **neurotoxic**. Moreover, **consumers and especially women are 30% more likely to suffer a cardiovascular event and 50% more likely to die of related disease**. According to evidence it **promotes obesity** and is linked also to **cancer—especially non-Hodkins lymphoma, brain tumours, Alzheimer disease and dementia, seizures and various other neurological issues**. People drinking diet soda daily were found to have a **three times increase in the risk of stroke and dementia** in comparison to the people who consume it weekly or less.

[unitefortruth.online/toxic-foods%2F-chemicals](https://unitefortruth.online/toxic-foods%2F-chemicals)

**HIGH FRUCTOSE CORN SYRUP—HFCS (GM)** - this widespread product found especially in **cereals, baked goods, ultra-processed foods, juices, sodas etc** is a **main cause of the actual obesity epidemic and diabetes, can cause leaky gut syndrome, fatty liver and liver stress; it has been found to promote cancers, coronary disease and Alzheimer disease and to contain health-hazardous substances such as mercury**; same as refined sugar it has no nutritional value, but is instead, **extremely addictive**, therefore very profitable for the processed food industry.

**MONOSODIUM GLUTAMATE (MSG)** is also a **great central nervous system disruptor potentially causing ADHD, autism and endocrine disruption especially in association with leaky gut/ leaky brain-blood barrier due to systemic inflammation**; it can be found in a variety of meats and processed foods.

**HYDROGENATED VEGETABLE OILS**— due to heavy processing, oxidation and hydrogenation they contain toxic industrial **trans fats which lower good cholesterol, increase bad cholesterol, create free radicals, and chronic inflammation**, which according to the scientific literature, is leading to **cancers of colon, breast, obesity, most chronic diseases, liver disorders, gastrointestinal diseases etc**

**Heavy Metals, Plastic & Nanoparticles in PROCESSED FOODS, DAIRY, MEATS, TOOTHPASTE**—studies have found such contaminants in many supermarket-foods including baby food, thus they are practically undetectable and unavoidable; they can cause **oxidative stress & mitochondrial damage with long-term effects such as cancers, neurological and genetic disorders**. Therefore, it is crucial to **keep the food as simple and natural/ organic as possible**.

**FLUORIDE**— research shows that the current 'safe' daily dose can cause in **10-20 years joint pain, osteoarthritis, brain damage, kidney disease, calcification of the pineal gland, endocrine disruption, cardiovascular disease, diabetes, gastrointestinal & fertility issues**. US National Research Center found that the safe level of fluoride is less than 4 times the level added to water in the US (0.7-1.2 mg/l). UK is deemed to follow same path in the near future

**TOBACCO CIGARETTES**— source of more than **70 carcinogens & GM tobacco**, they lead to **cancers, cardio-vascular and auto-immune disease and, generally, to early death**. **E-CIGARETTES** are not a solution either due to the **high content in glyphosate and other carcinogenic substances** and it may even be worse for the cardiovascular system than smoking. They have also been deemed **harmful for health by the WHO**.

### **SUGGESTIONS:**

Read the labels of the foods you want to buy and avoid all the above; use instead **coconut sugar, organic honey, Xylitol, Stevia, virgine olive oil, avocado oil, coconut oil and other cold- pressed organic oils and butters, chicken, goose and duck fat** and generally, **raw and preferably certified organic foods or coming from sources you can trust**. Find healthy alternatives and remember that no natural thing that is good for your body and soul is addictive. Give up on all addictions, if you want to live, as the accumulation of unavoidable toxic stuff in air, water and foods makes it an imperative to avoid the greatest known causes of disease and death. **Ask for God's blessing before eating or drinking** and be grateful, honest and loving, it will not be left unanswered.

## MAIN FACTORS THAT CAN TRIGGER AND AGGRAVATE DISEASES (IV) - A Guide For Personal Research

**FACE MASKS** - Not only that face masks/ coverings are not efficient against the spread of viruses, but chronic wearing brings over a host of very real health problems, especially in the case of children or people with breathing problems or underlying health conditions. Recently the lead author of a retracted study on the harm of mask wearing by children said removal was 'political'. Study called found that that **children wearing face masks were inhaling carbon dioxide levels "deemed unacceptable by the German Federal Environmental Office by a factor of 6."** The amount of experimental and scientific proof that face masks wearing is inefficient and dangerous is considerable. Furthermore, toxic substances such as **graphene oxide, ethylene oxide and breathable carbon nano-fibers/ microplastic** have been discovered in medical and commercial face masks. There are no health & safety risk assessment in place for any of the schools, healthcare institutions or any other institutions that require(d) the mandatory wearing of face masks. Statistical data and studies comparing different areas and countries proved conclusively that wearing of masks didn't contribute to less covid infections and mortality.

**SUGGESTIONS:** Demand an **NHS face covering exemption card** (online) and **do not wear a face mask**; in case the requirement is unavoidable, try wearing a **face shield** which, though impeding on the quality of air you are breathing, still offers you the chance to breath far less CO2 and much more O2, avoids the creation of a humid petri dish on your face that can really give you a **bacterial pneumonia** and expose you to **inhalation of dangerous substances and nanoparticles** the masks may be imbued with; if the face shield is not allowed, make **your own mask** out of a thin material and ensure is as breathable as possible. **Share the truth about face masks wearing and demand accountability from all the institutions and authorities who impose it.** Contribute to **saving the children from having to wear a mask** in school or other places. [unitefortruth.online/face-masks](https://unitefortruth.online/face-masks) [unitefortruth.online/covid-tests-tracing](https://unitefortruth.online/covid-tests-tracing)

**COVID TESTS** - the PCR test, as affirmed by their own inventor, **dr. Karry Mullis** and by the **FDA manual** of the test itself, **are not able to detect viral infection nor to differentiate between pathogens**; they can be set up to detect all positive or all negative results and the reality of an **extremely high rate of false positives in the UK** has been mentioned even by Boris Johnson and Dominic Cummings. A great number of doctors, scientists, lawyers and human rights activists have revealed that **tests are not fit for purpose** and **two European Courts (Lisbon, Austria) have officially recognised this fact.** The testing procedure was a dangerously intrusive act, considering also that **ethylene oxide and nano-particles of graphene** have been discovered on the swabs also.

**SUGGESTIONS:** **Avoid taking a PCR test**, especially if you feel healthy, as both your health and your future may be damaged by it. The so-called pandemic with all ensuing damage is a direct result of the use of this unreliable tool. **Large studies on asymptomatic people proved they do not spread the disease.** If however, you want to test yourself at home, try not to put the swab in your nose/mouth but get the samples by other means and put them on the swab.

**DRUGS — IATROGENIC DEATH** The literature about the risks and (side) effects of allopathic medicine is overwhelming and very little is known about the **synergistic effect of the toxicity** of various drugs and other toxic factors, including **radiation**, on the body. Consider also that the medical act itself is also imperfect: according to a 2018 John Hopkins study **the third cause of death in the US is medical error.** [unitefortruth.online/convergence-of-toxicity](https://unitefortruth.online/convergence-of-toxicity)

**SUGGESTIONS:** Do your own research, **do not trust unconditionally any healthcare provider or authority.** Look for doctors and experts without vested interests who take risks and speak the truth. Take responsibility and look out for **proper nutrition & lifestyle, alternative medicine and natural solutions.**

**LOCKDOWNS PSYCHOLOGICAL & SOCIO-ECONOMIC EFFECTS** - The great harm of lockdowns on the society is undeniable. Science and data show that **they are not effective but simply harmful, undermining the nations' psychological and existential foundation.** [unitefortruth.online/lockdown](https://unitefortruth.online/lockdown)

**SUGGESTIONS:** Join like-minded people & work together to keep yourselves sane, safe & improve the chances of survival for your families & communities

# GRAPHENE OXIDE REMOVAL

Home / Detox / Graphene Oxide Removal Supplements

## Graphene Oxide Removal Supplements

Contents (Click to see individual products/supplement facts):

Astaxanthin 12 mgs 30 gels

Glutathione Reduced 500 mgs 60 caps

Melatonin 5 mgs 60 caps

Milk Thistle Plus 120 caps

NAC 500 mg 90 caps

Quercetin 300 mgs 60 caps

## ANTIVIRAL SUPPLEMENTS—PREVENTING THE INFECTIONS

<http://orthomolecular.org/resources/omns/v16n04.shtml>

The physicians of the *Orthomolecular Medicine News Service* and the International Society for Orthomolecular Medicine urge a nutrient-based method to prevent or minimize symptoms for future viral infection. The following inexpensive supplemental levels are recommended for adults; for children reduce these in proportion to body weight:

**Vitamin C:** 3,000 milligrams (or more) daily, in divided doses.

**Vitamin D3:** 2,000 International Units daily. (Start with 5,000 IU/day for two weeks, then reduce to 2,000)

**Magnesium:** 400 mg daily (in citrate, malate, chelate, or chloride form)

**Zinc:** 20 mg daily

**Selenium:** 100 mcg (micrograms) daily

Vitamin C [1], Vitamin D [2], magnesium [3], zinc [4], and selenium [5] have been shown to strengthen the immune system against viruses.

The basis for using high doses of vitamin C to prevent and combat virus-caused illness may be traced back to vitamin C's early success against polio, first reported in the late 1940s. [6] Many people are unaware, even surprised, to learn this. Further clinical evidence built up over the decades, leading to an anti-virus protocol published in 1980. [7]

It is important to remember that *preventing and treating respiratory infections with large amounts of vitamin C is well established.*

Treatment protocol post jab for mild symptoms.

#### Nutraceuticals:

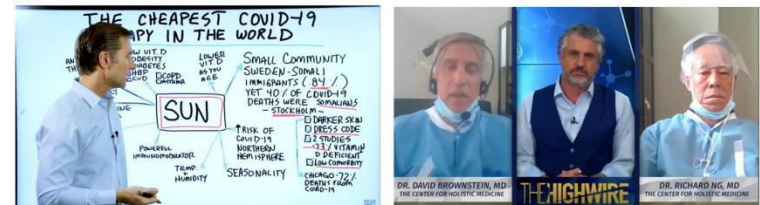

- Anti coagulant
- Thromboocyte, aspirin, curcumin/turmeric, garlic
- Ivermectin 12mg x 1 pd for 5 days then 1 per week
- NAC 500mg x 3 per day
- Oxygen capsules / blood oxygenator
- Hydro shot- Molecular hydrogen in pill form
- Zeolite chemicals, radiation, metals
- Colloidal silver, drink and nebulize as well as chlorine dioxide
- D 5000mg
- Alkaline powder
- Miracle booster detox (super foods) and DNA repair

THE STEW PETERS SHOW

In case you don't want to consume N-acetylcysteine, you also have glutathione to consume directly.

## EMF Protection Devices

### Scientifically Proven EMF Protection Against the Harmful Effects of EMF Radiation

Yes, Aulterra EMF protection devices are scientifically proven, patented, and peer reviewed offering the best protection against the harmful effects of 5G and EMF radiation. However, we still believe the best protection against 5G and EMF radiation is education!

Stay up to date with the latest research and important news about Aulterra EMF blockers and how we can all take action to help make this a more Bio-Safe world!

## Smart Meter Guard Product Review

Written by [David](#) • in [Product Reviews](#)

Smart Meter With A Smart Meter Guard

A Smart Meter Guard or Cover is a metallic mesh cover designed to fit snugly over a smart meter and directly against the metal box the smart meter is attached to. You can see one in the picture above. The Radio Frequency (RF) Radiation emitted by smart meters and other WiFi devices, cannot travel through parallel lines of metal very well, if the metal is a good highly conductive metal.

**A smart meter cover like this blocks 90% to 95% of the RF Radiation emitted by a smart meter. It allows enough signal out to where the power company will still get its readings,**
