SV-40 "Polyoma" Virus Particle

Dr. Mary Sherman lived in a second-story apartment in this building.

Diagram of the Injuries of Mary Sherman, MD. Age 51
Drawn from Autopsy Description of 21 July 1964

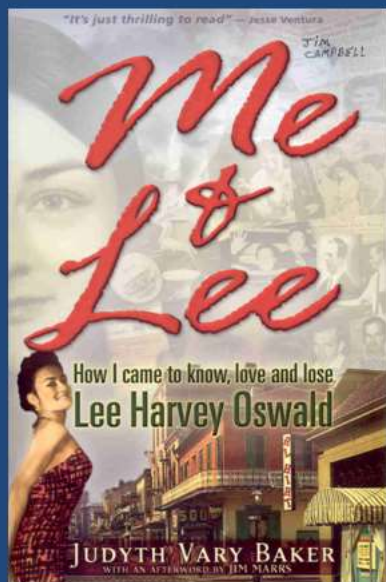

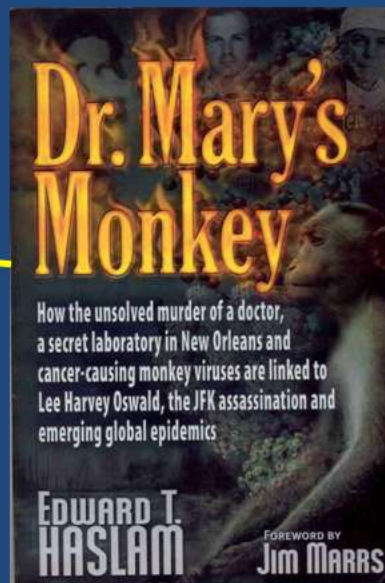

Dr. Mary Sherman with the author (left) and his older sister
Chicago 1946

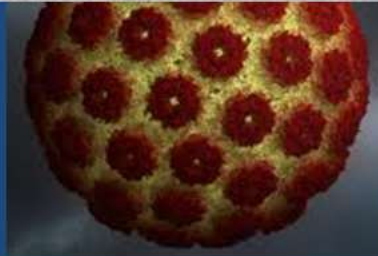

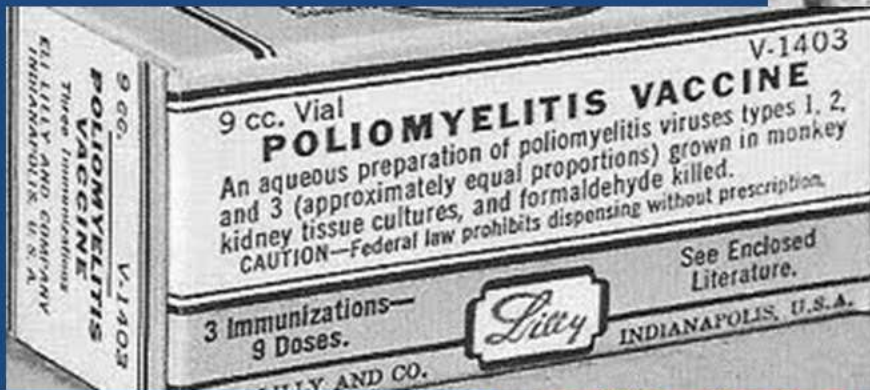

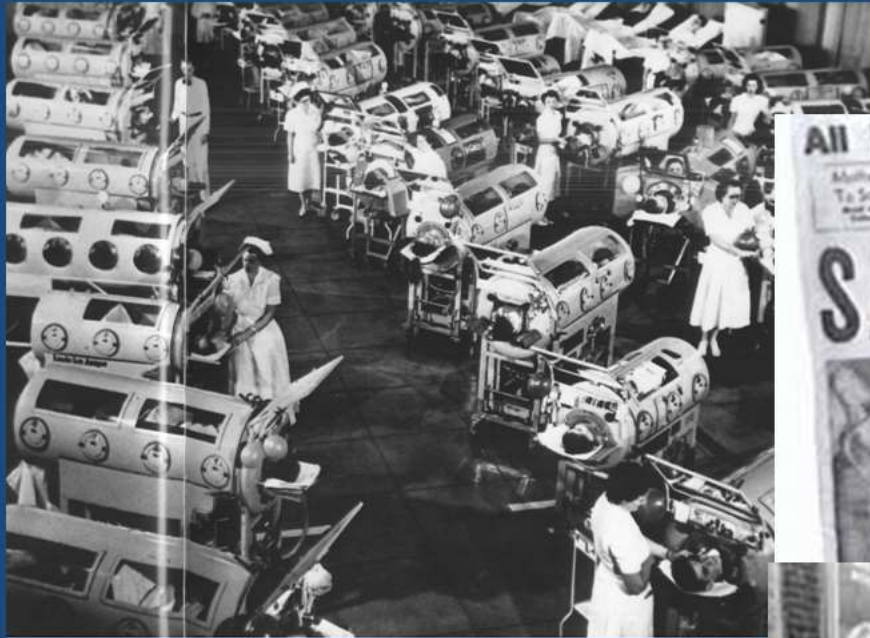

Obituary Photo in The American Journal of Bone and Joint Surgery 1964

j bone joint surg am, 1964 dec 01 46(8):1824-1826.

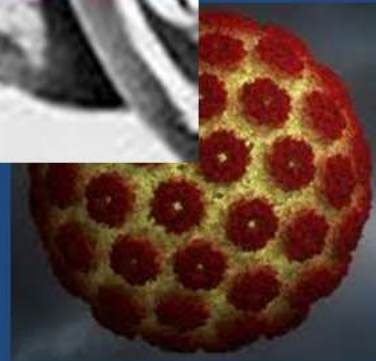

The NIH worked hard to keep the vaccine contamination secret, But it was eventually leaked to the press at a conference.

New Orleans, LA, 1963 showing sites of laboratories and other locations for The Project.

Map from *Doctor Mary's Monkey*, by Edward Haslam, p.268.

Dr. Mary Sherman, MD, “Medical Director” of The Project.
Seen here with Ochsner Medical Staff - 1954

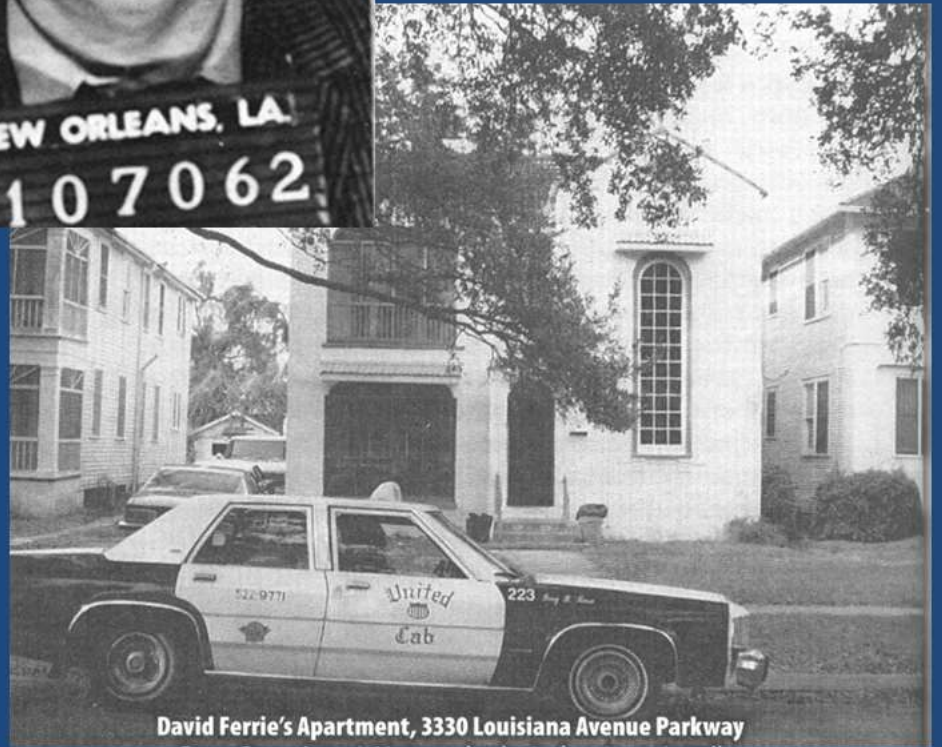

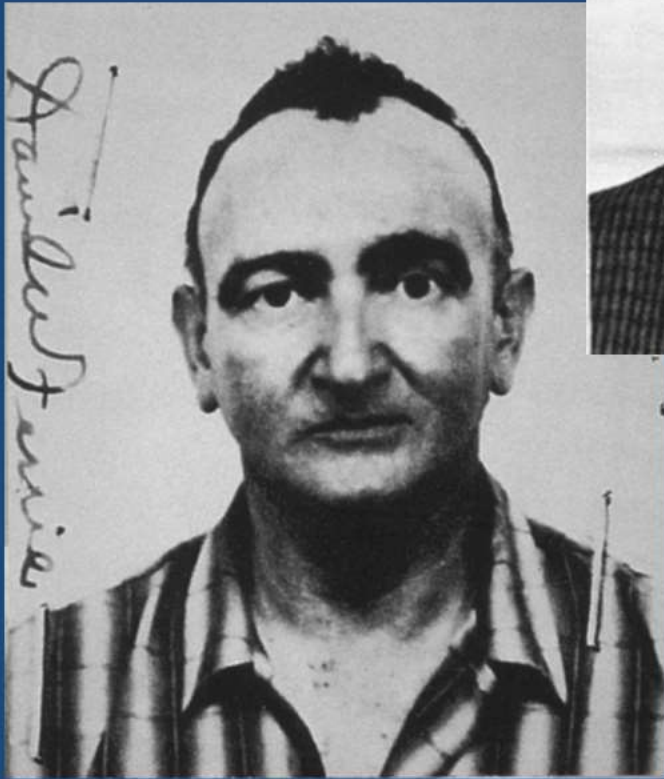

Dr. Alton Ochsner, MD. "Director" of The Project.

David Ferrie,
“Laboratory Director”
for The Project.

Judyth Vary Baker, age 20, was the “Chief Laboratory Technician and Information Researcher” for The Project.

Lee Harvey Oswald, age 23, was “Laboratory Assistant , Driver, and Procurement Agent” for The Project.

A Project Devoid of Ethics...

No Institutional Review Board to satisfy.

No Federal Regulations to hold them back.

No budget limits to slow them down.

No ethics rules to consider.

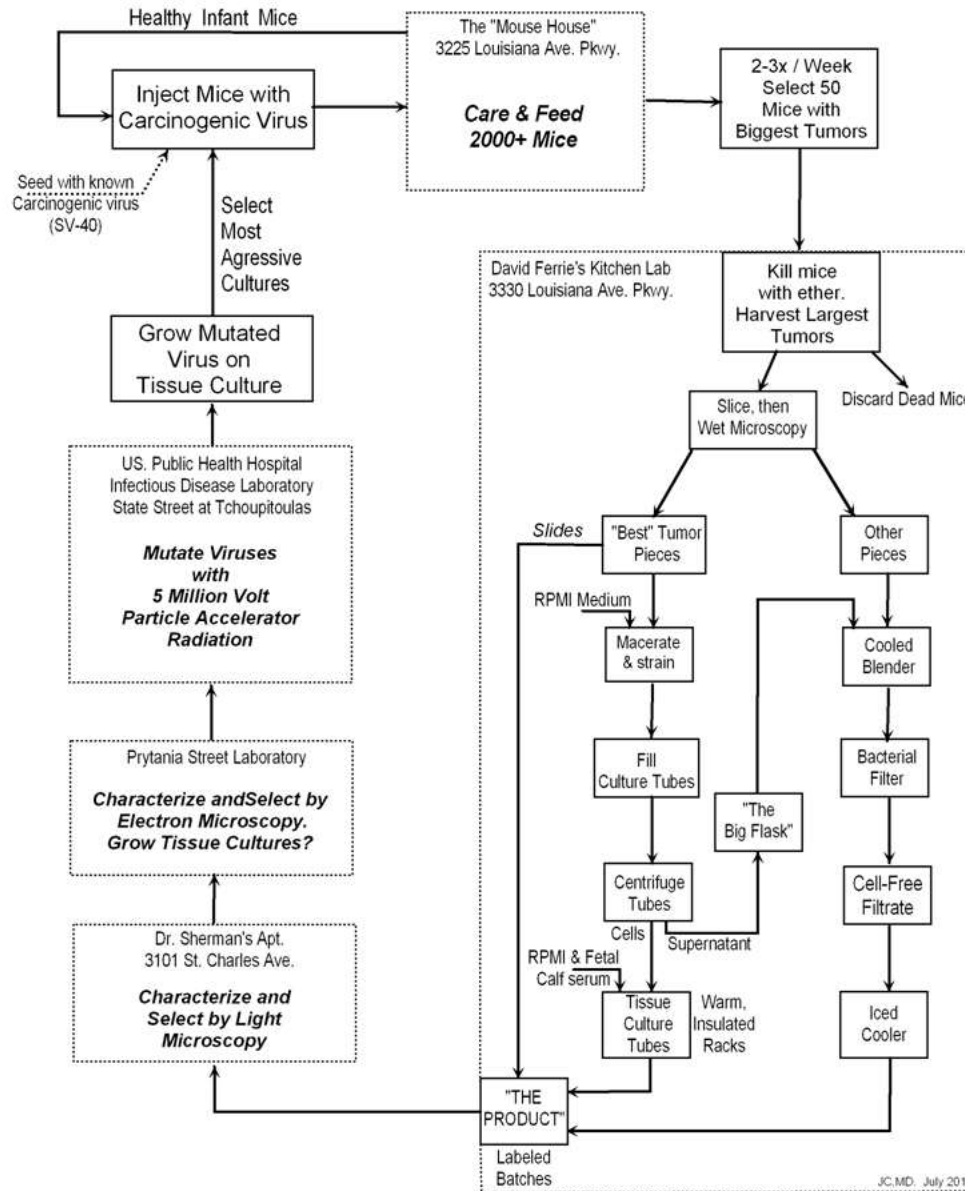

Individual conscience was clouded by “national security.”

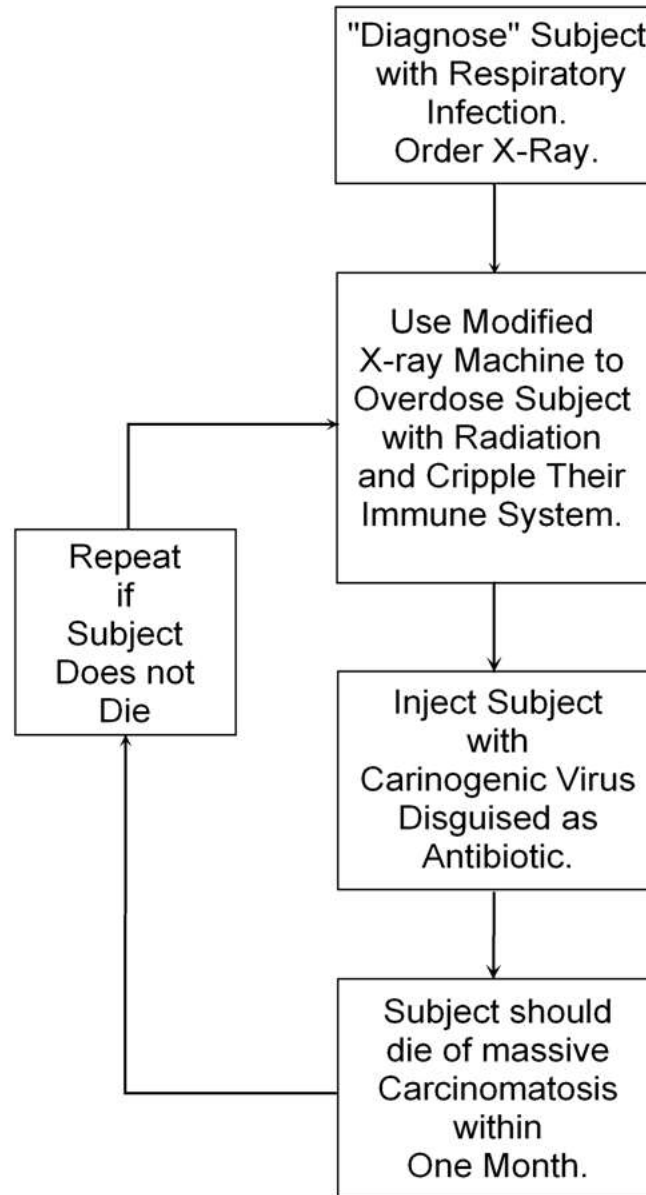

"The Project"

Carcinogenic Virus Development Protocol

New Orleans, LA 1963

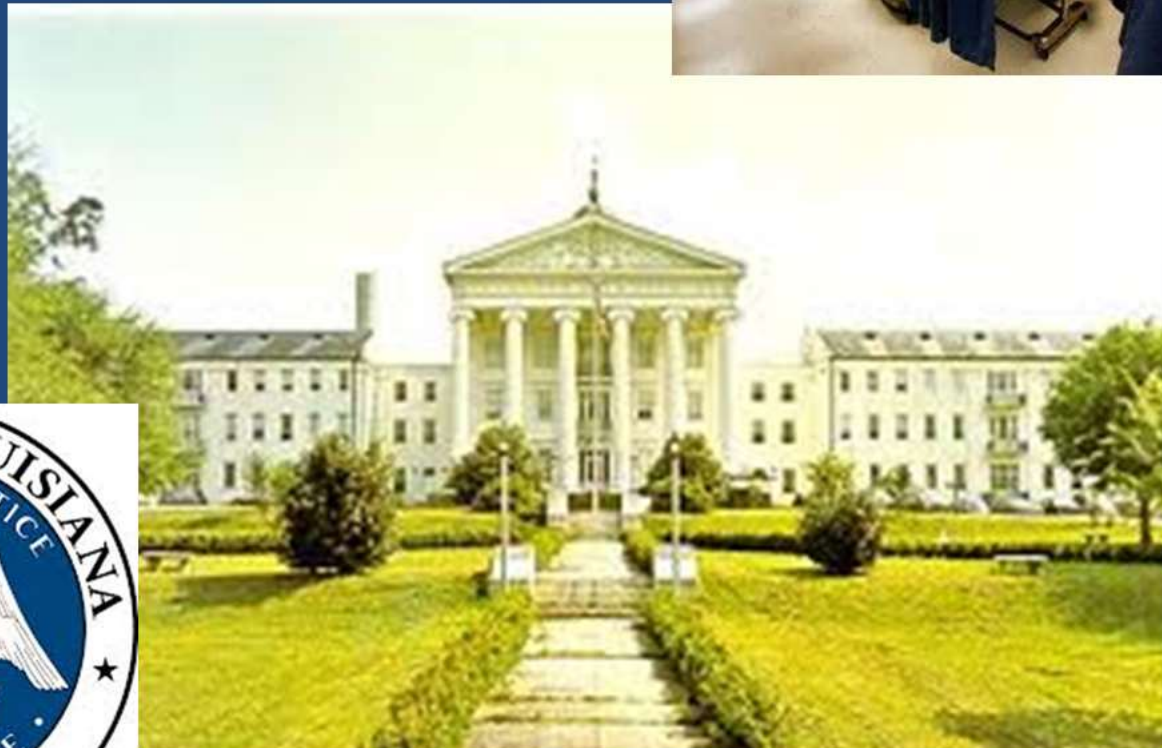

"The Project"
Protocol to Induce Metastatic Cancer in Humans
New Orleans, LA 1963

Human Tests of the carcinogenic virus took place at Jackson State Mental Hospital beginning in August 1963.

The first “volunteer” prisoner died of massive cancer metastasis in 28 days.

August 29, 1963: Judyth Baker's conscience kicks in.
She writes Dr. Ochsner this note:

“Injecting disease-causing materials
into an unwitting subject who does
not have a disease is unethical.”

She is summarily FIRED !

By September 3rd she is on her way to Florida with her husband, Robert Baker.

The Project Goes On:

Doctor Ochsner continues to direct the project.

Dies in 1981 at age 85.

David Ferrie continues to direct laboratory activities.

Dies by suicide before testifying to Garrison Investigation 1967.

Lee Oswald tries to smuggle the carcinogenic virus into Cuba via Mexico.

Attempt Fails (Sept 26, 1963).

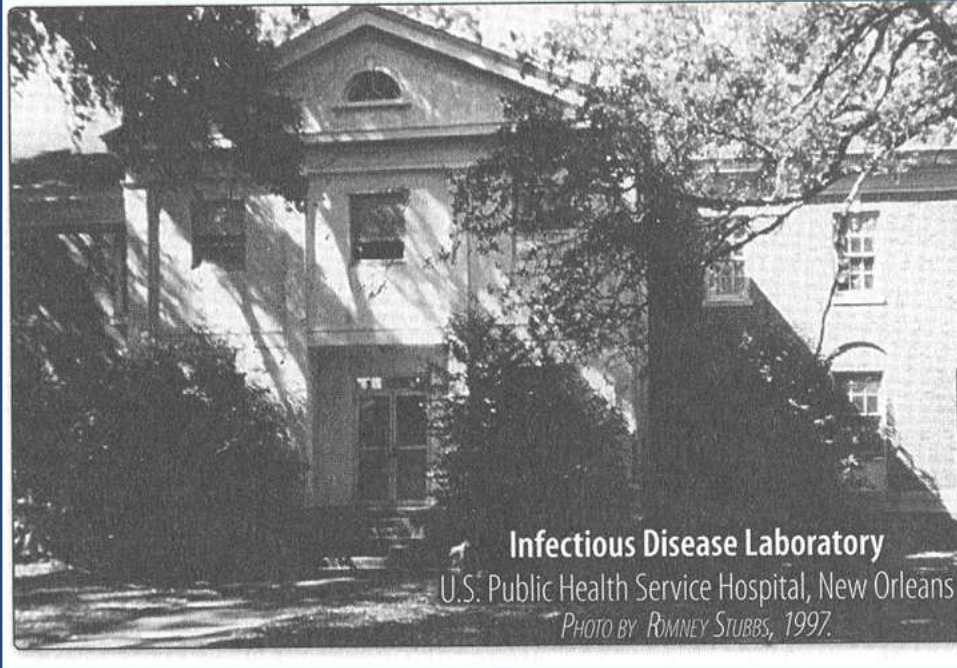

He then moves to Texas.

Arrested for the assassination of President Kennedy.

Killed while in custody 24 Nov 1963.

Dr. Mary Sherman continues to work on carcinogenic virus development.

And perhaps SV-40 “anti-cancer vaccine” as well.

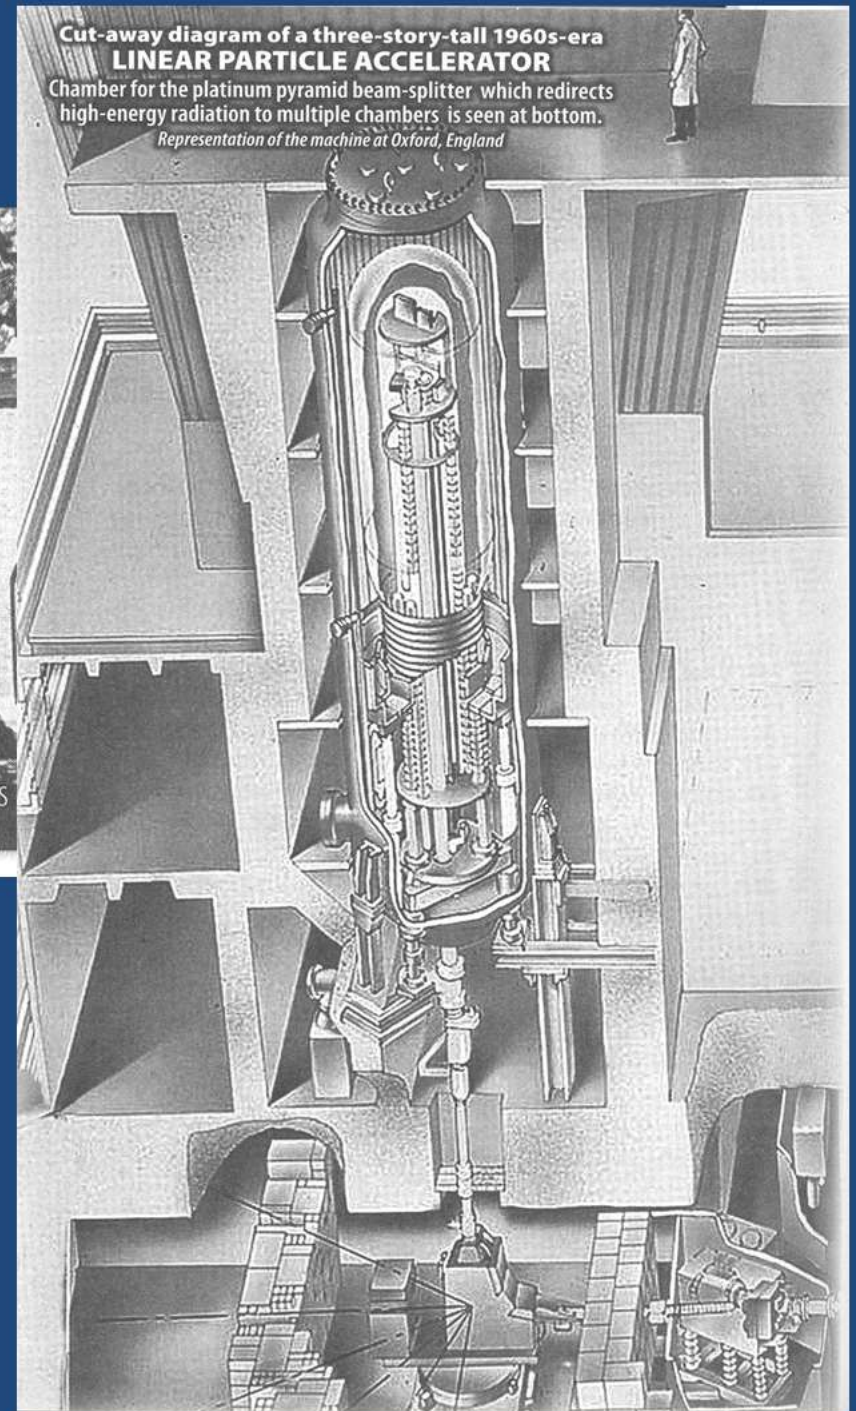

Infectious Disease Laboratory

U.S. Public Health Service Hospital, New Orleans

PHOTO BY ROMNEY STUBBS, 1997.

Probable site of Dr. Sherman's death.

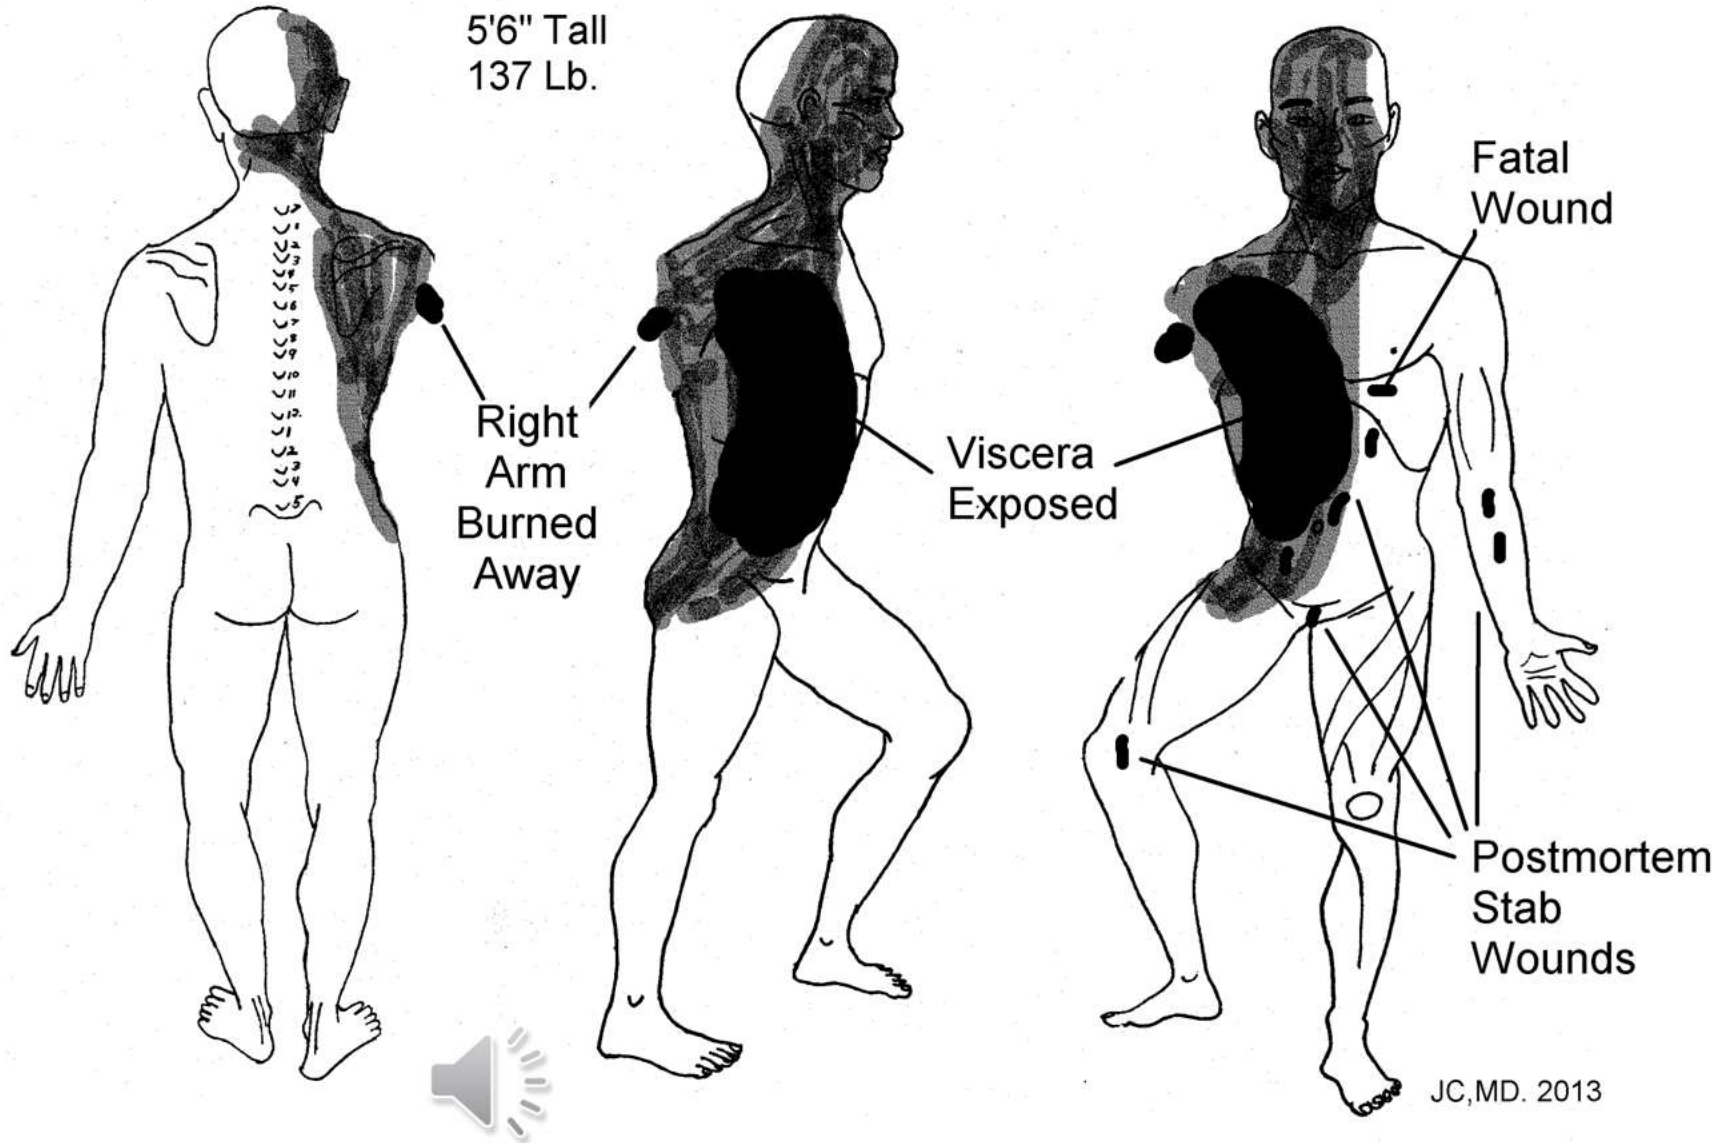

**Cut-away diagram of a three-story-tall 1960s-era
LINEAR PARTICLE ACCELERATOR**

Chamber for the platinum pyramid beam-splitter which redirects high-energy radiation to multiple chambers is seen at bottom.

Representation of the machine at Oxford, England

Diagram of the Injuries of Mary Sherman, MD. Age 51
Drawn from Autopsy Description of 21 July 1964

Dr. Sherman's
Apartment was on
the second story
in the back of this
patio.

Her burned body
was found there.

The Project is Halted!

The Linear Accelerator at the US Public Health Service was quickly dismantled under military guard.

But unanswered questions remain...

1. What happened to the carcinogenic virus “Product?”
At liquid nitrogen temperatures it could last indefinitely...
2. Was Dr. Sherman able to develop a super-potent carcinogenic virus that would “take” in un-radiated humans?

The Mysterious Death of Jack Ruby - 3 January 1967

He was diagnosed with a “cold” by the jail physician.

He was kept a long time on the x-ray table at the jail.

He was injected with an unknown substance at the jail.

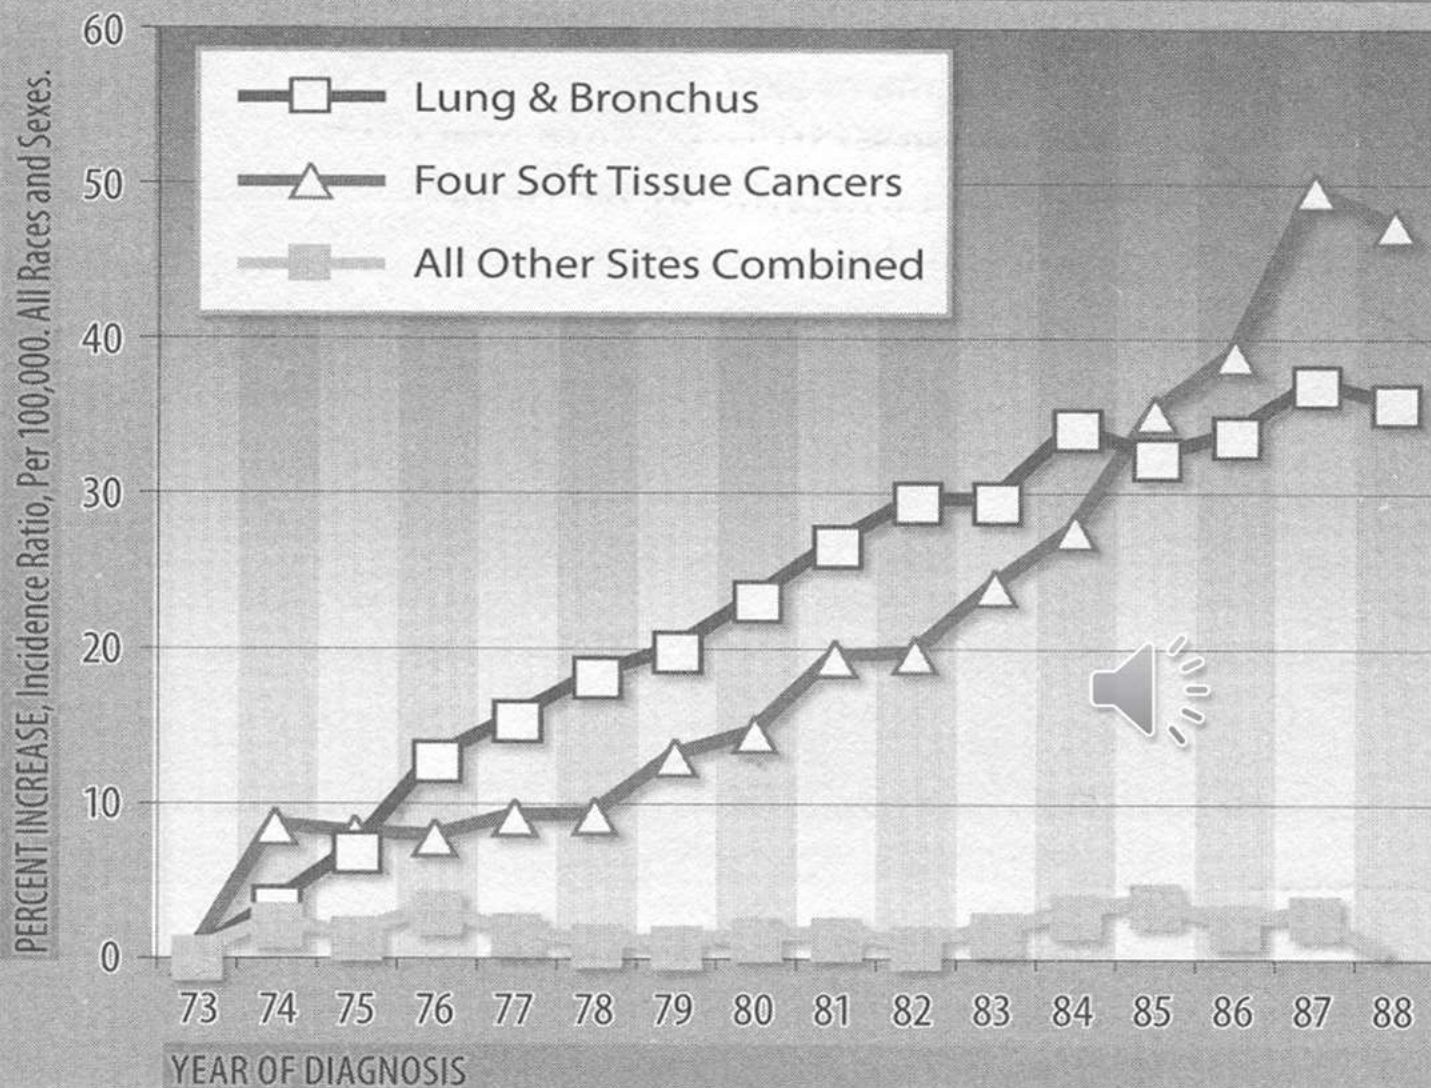

He died of massive carcinomatosis about a month after the injection.

See “The Mysterious Death of Jack Ruby” in Crossfire by Jim Marrs. 1989, pp. 429-433.

The Cancer Epidemic

Percent Increase Versus 1973

Graphs by Edward T. Haslam based on data from Ries, LAG., Hankey, BF., Miller, BA., Hartman, AM., Edwards, BK. *Cancer Statistic Review, 1973-88*, National Cancer Institute

Ongoing Research Into SV-40:

SV-40 DNA “snippets” are frequently found in many tumor types.

Mesothelioma is associated with SV-40.

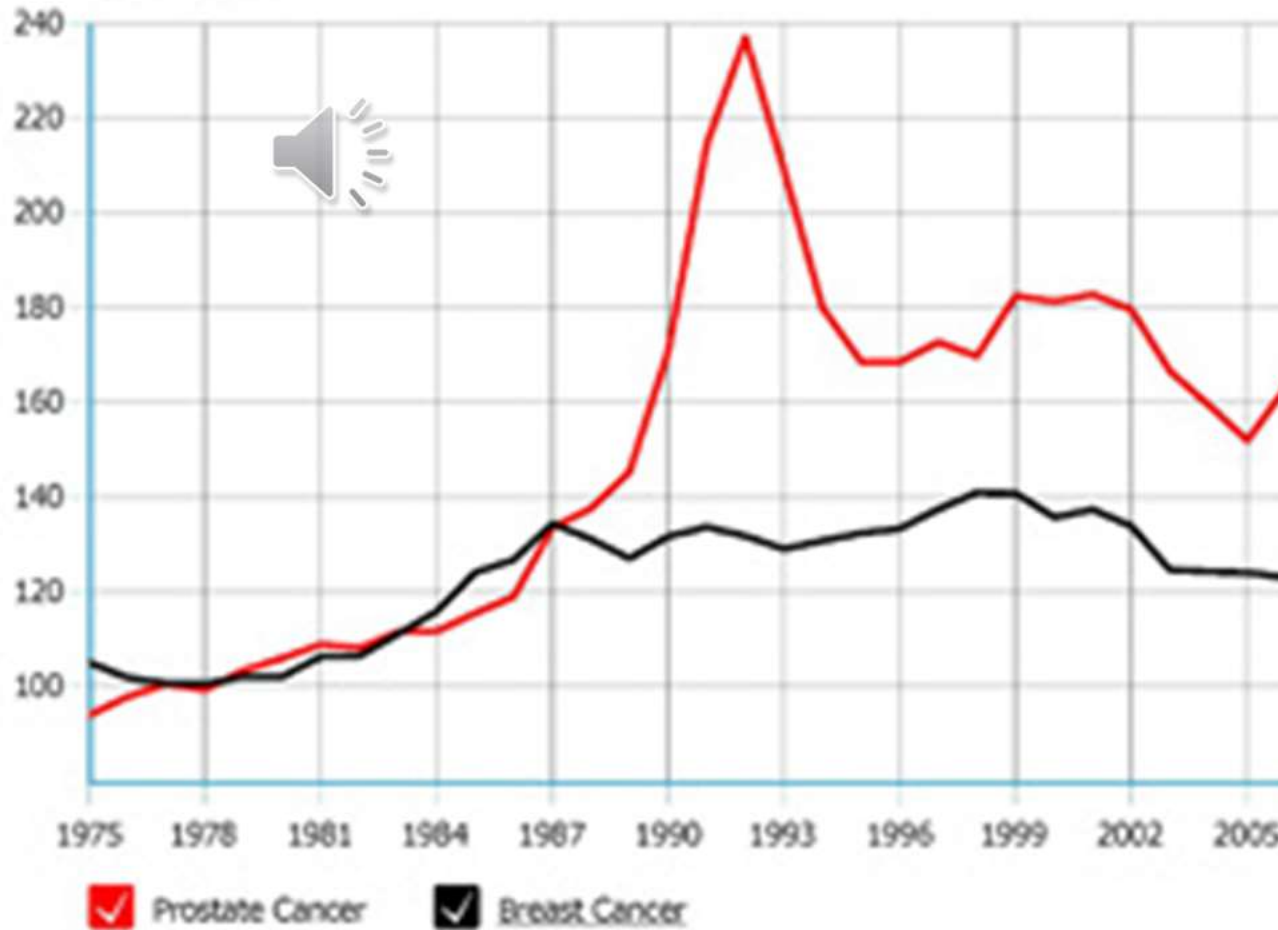

SV-40 is likely spread by the fecal-oral route.

“Epidemics” of carcinoma may occur in poorer countries.

Breast and Prostate Cancer Incidence

Rate Per 100,000

Prostate Cancer peaked about 30 years after 1960.
Breast Cancer rates show a broader peak 20 to 40 years after 1960.
But neither peak has returned to 1975 levels.

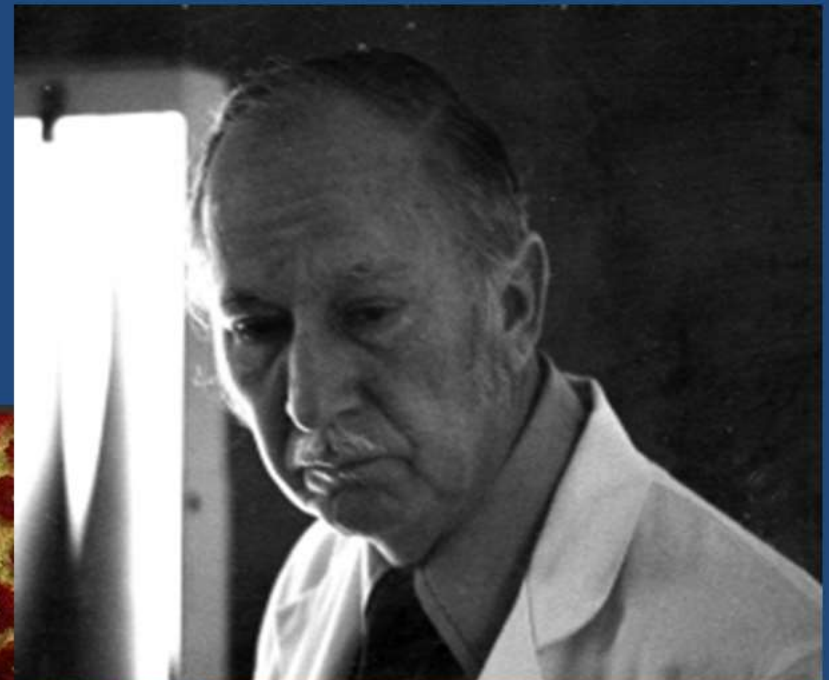

"Her attractive apartment reflected her tastes and many interests. She had always been an excellent cook and although she did not have time to indulge this favorite hobby, she always enjoyed good food and good wines."

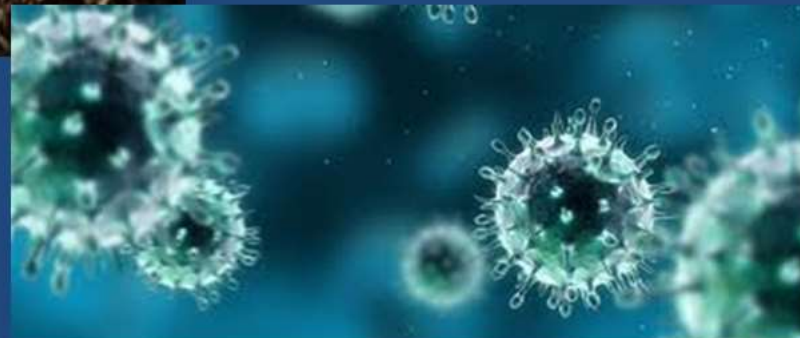

from Campbell CJ, J bone joint surg am, 1964 dec 01, 46(8):1824-1826.

Crawford J. Campbell, MD. Died in June 1983 of fulminant prostate cancer...

He was only 69. There is no family history of prostate cancer.

Was he exposed to the weaponized virus in 1963-64 by eating foods kept in her apartment refrigerator - the transfer point for the viral cultures?

Bill Gates – TED TALK - epidemics simulation 2015

The image shows a YouTube video player interface. At the top, there is a dark navigation bar with the YouTube logo, a search bar, and icons for video, grid, notifications, and a profile picture. The main content area features a large red thumbnail with three white icons: a mobile phone with a Wi-Fi signal, a test tube, and a chemical structure. Below the icons, the text reads "ADVANCES IN SCIENCE & TECHNOLOGY" followed by a quote: "But in fact, we can build a really good response system." The TED logo is in the bottom right corner of the thumbnail. At the bottom of the player, the video title "Bill Gates: The next outbreak? We're not ready" is visible, along with "Up next" and an "AUTOPLAY" toggle.

- From **Geoengineered Transhumanism**

- Elana Freeland:

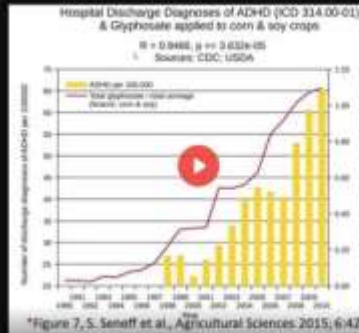

Graphene Based Hydrogel is basically an **AI-controlled neuroelectronic swarm intelligence system**. Before entering the body it is a non-metallic chemical agent, but with the body heat and contact with hydrogen, it becomes extremely biomagenetic and capable of absorbing energy from electromagnetic waves in the 5G band, thus oxidizing rapidly and acting as a free radical that can quicken **THROMBOSIS (blood clotting), myocarditis, and pericarditis in 5G environments**. Graphene is programmable - for example , how it seeks out vital organs (brain and heart) according to their frequency, electromagnetic fields, temperature, etc. **Graphene produces a magnetic filed mental fog that prevention the inoculated from thinking clearly or comprehending what they are reading or seeing.**

Abstract
Background: Brain tumors are the second most common cancers in the pediatric age. Herbicides may play an etiologic role, but literature results are conflicting. This review provides a systematic overview, meta-analysis, and IARC/WHO consideration of data on parental exposure to pesticides and childhood brain tumors.

Parental Pesticide Exposure and Childhood Brain Cancer: A Systematic Review and Meta-Analysis Confirming the IARC/WHO Monographs on Some Organophosphate Insecticides and Herbicides

Joseph Heutskamp ^{1,2}, Aziz Khan ³, Francisco Posseltiere ^{4,5,6}, Consuelo Li Tang ^{7,8,9,10}

PMD: 34942202 | PMCID: PMC43180259 | Free PMC article

Abstract

Background: Brain tumors are the second most common cancers in the pediatric age. Herbicides may play an etiologic role, but literature's overview, meta-analysis, and IARC/WHO's childhood brain tumors.

Methods: We searched PUBMED, SCOPUS, December 2016 that assessed childhood/ adulthood a meta-analysis addressing and residential exposure. A total of 138 (68,176 cases and 25,443 controls) were in

Results: Parental exposure to organophosphate insecticides was associated with an increased risk of childhood brain tumors (OR 1.07-1.49, $P = .41$ -19). The same occurs with residential exposure to pesticides (OR 1.07-1.49, $P = .41$ -19).

Conclusions: There is an association between parental and residential exposure to organophosphate insecticides and herbicides and childhood brain tumors.

Other toxic pesticides that one should know about (particularly, if living in the UK)

health, according to research published in the *Journal of Hazardous Materials*. While this is the first study to investigate how these chemicals harm the liver, there is increasing evidence that neurotoxicants, otherwise notorious for their effects on pollinators and aquatic life, can cause direct harm to human health. As the U.S. Environmental Protection Agency (EPA) continues to protect the pesticide industry from any measure of meaningful regulation around these hazardous products, the job falls to advocates to place pressure on elected officials to make the changes necessary to safeguard long-term health and well-being.

ATRAZINE

OR

Why is a BANNED PESTICIDE still in the UK FRESH WATERS?

Atrazine: Science Under Siege

Atrazine. It's in our lakes, streams and drinking water at levels that make a difference to human health. Scientists link exposure to increased risk of birth defects, infertility and juvenile cancer.

Who's responsible? The Syngenta corporation — the world's largest pesticide company. They're working overtime to promote and protect their flagship product in the US, despite the fact that it's long been banned in their home country of Switzerland. Syngenta has intimidated scientists, pressured regulators and paid an economist to manufacture faulty studies — all to keep an unnecessary product on the market.

Application d'oxyde de graphène dans la préparation d'aliments pour insectes lépidoptères et diptères

Abstrait

L'invention décrit une application d'oxyde de graphène dans la préparation d'aliments pour insectes lépidoptères et diptères. Dans lequel le rapport masse sur volume (mg/mL) de l'oxyde de graphène à la nourriture pour les insectes lépidoptères et diptères est de 500 : 1-2 000 : 1. L'aliment est préparé par le procédé suivant : préparation d'une solution d'oxyde de graphène, préparation d'un milieu de culture et dissolution du milieu de culture dans la solution d'oxyde de graphène pour préparer l'aliment à base d'oxyde de graphène pour les insectes diptères. Les aliments pour insectes lépidoptères et diptères à base d'oxyde de graphène peuvent raccourcir la période de croissance des insectes, améliorer le taux de survie des larves, augmenter le poids des larves et des pupes et réduire considérablement le temps et les coûts de production dans le processus d'application pratique.
