

Copponex Group

est 2014
excellence in contract service

We are committed to building your trust with our quality work. Thank you for bringing our project management skills and extensive construction experience to your next project. We look forward to installing your new equipment! The following provides information to help this be the best installation process you have ever experienced.

UTILITY LOCATE

Our team will place a request through the local **Utility Protection Service**.

This service will only locate utilities running from the street to the meter.

Private Lines are the responsibility of the property owner and we recommend a private locator **will need to be called**.

SITE READINESS

Our trucks/ skid steer equipment will need a minimum of 8' in width for adequate accessibility. and your site should have approximately 1-2% slope.

(Allowable slope will depend on size and shape of unit). If your fence has the **minimum 8' in width** for access, there will be no need for you to remove it prior to the installation process.

SHIPPING & DELIVERY

The equipment normally delivers on a **standard 52' tractor-trailer** on pallets ranging in size from 4'x4' to 7.5'x16'.

Weights will range from 3 lbs to 2200 lbs. We will be meeting the truck and handling this for you.

DISPOSAL OF WASTE & PACKAGING MATERIALS

Your installation price includes the removal of packaging materials. If there is a **preference on placement**, please advise us before arrival.

You will be contacted to review the above items. When adhered to and addressed prior to the installation, we will achieve our goal of providing you with the best possible experience. Any concerns can be addressed via phone or at the pre-construction meeting prior to product installation. Thank you again for the opportunity to serve you!

For questions regarding your installation please do not hesitate to reach out to our office at (770) 421- 5252.

Thank you,

The Copponex Group
