Have a look and style:The attractive appearance can always catch people's eyes at a glance. The romantic blue brings a refreshing feeling, as if you are in a wide ocean, feeling the extension of the space. The delicate touch of the table top has a wood grain texture, and every touch you can feel the relationship with nature. The intimacy of picking up.

MODERN AND
FASHIONABLE COLORS

FUNCTIONSMITH, INC.
MANILA • GUANGZHOU

Side door of auxiliary cabinet:The side door of the auxiliary cabinet can be opened to facilitate the placement of the host and plug-in cables. The partition in the middle increases the availability and can store packages.

Carbon black aluminum alloy edge banding:The noble and low-key cold feeling, the hand feels smooth, and the edge sealing process is meticulous. It creates a noble atmosphere in a low-key manner.

Press the lifting socket:When you don't need to use the socket, you can press it down, so that the entire desktop will be flatter and more beautiful. Raise it when you use it, and there will be no trouble of messy wiring like ordinary power strips.

FUNCTIONSMITH, INC.
MANILA • GUANGZHOU

CALM AND STEADY EXTRAORDINARY

Sub-cabinet function: The auxiliary cabinet drawer is equipped with a mechanical code lock, which is locked with four digits. When the code is forgotten, it can be opened with a matched key and the code can be reset. With a cooling fan, it effectively helps the host cool down.

EDGE BANDING

Alumina material edge banding: It is the most simple decoration as well as edge banding. When the light shines through, the reflective characteristics of aluminum will make the entire desk more dazzling. The refreshing touch makes every contact feel fresh and pleasant. The aluminum edge sealing is like an indispensable seasoning in delicious dishes, adding the finishing touch.

Oxidized aluminum alloy joint: The joint position is round and smooth, and you will not feel pain because of the sharp corner of the table if you accidentally hit it.

LIGHT STRIP CLOSE-UP

MFC sheet: EZ-W08 snowflake white

Close-up of the light strip: After adding the light strip, it will be more stylish. The warm yellow light shines on the cabinet, and the warm atmosphere will be more prominent. The addition of aluminum edge-sealing makes the whole cabinet present a sense of exquisiteness, echoing the warm yellow light strip, with a layer of warm light glowing slightly. Extremely elegant.

NATURAL WARMTH
DELICATE TOUCH

There is beauty and style: modern and stylish minimalist design, natural lit wood grain texture. The warm wood tone harmonizes with the pure white, forming a gentle and hearty style. The warm sun shines in in the afternoon, and the warm temperament is fully displayed. The addition of the oxidized aluminum alloy edge will make the whole body more clear, warm and cold, and fresher.

SIDE CABINET

FUNCTIONSMITH, INC.
MANILA • GUANGZHOU

MFC: EZ-W08, EZ-W13

MFC sheet: EZ-W08 snowflake white, EZ-W13 european maple

There is beauty and style: There are high and low, light and heavy. Responding to each other and balancing each other, this kind of side cabinet collocation will not grab the focus of the space, but will add a wonderful sense of hierarchy to the space. The warm tones also add a pleasant brushstroke to the overall space. The wood grain is natural and fresh. It seems to be in the middle of nature, warm and comfortable.

Storage space: Large storage space and multi-layer separation can classify documents well. Documents or objects that need to be protected can be placed in an encrypted cabinet for protection. Equipped with a new type of code lock, the four-character lock is more secure, even if the code is lost, it can be opened with a matching key and reset. Safe and convenient.

FASHION SPLICING ENHANCED LAYERING

FUNCTIONSMITH, INC.
MANILA • GUANGZHOU

During the meeting:the desktop is spacious, and the conversation is more relaxed in an instant. The color is distinct, the modern fashion is strong, and the sense of hierarchy is strengthened. There is ample space for knees under the table, which avoids the embarrassment between the legs and focuses more on the meeting. The socket adopts a pressing lifting socket, which avoids the trouble of finding a power source when electricity is needed, and is neat and clean and more professional. Press the lifting socket for wireless charging, which is smarter and more convenient.

MFC sheet:EZ-W04 ray shadow oak , EZ-W10 Polar lights blue

During the meeting:the pure white conference table will be more simple overall. There is no other extra color to add, but it will be more capable and crisp. Simplicity can better reflect its sophistication, and existence is decoration. While having a pleasant meeting, it can also be pleasing to the eyes. In addition, pressing the lifting socket is also an important reason for improving the aesthetics. It avoids the clutter of using power strips, and can be wirelessly charged, which is smarter and more convenient.
