

iAttendance

Cloud-base service for Security check

The LE Company

July 2020

Security system today

Traditional biometrics security system today

Local server

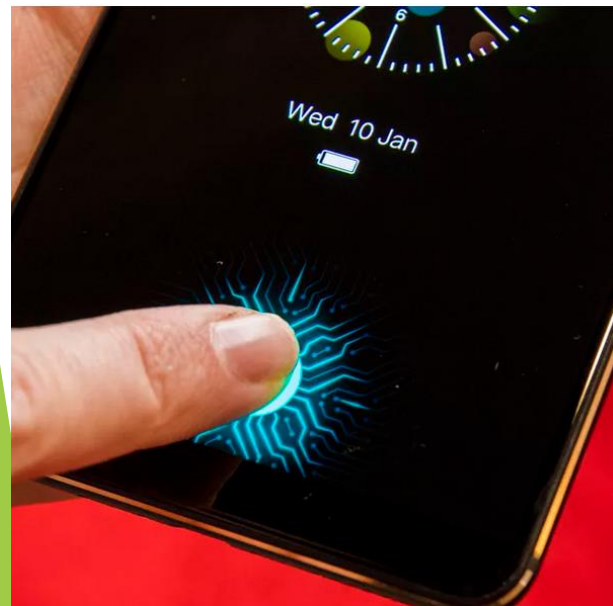

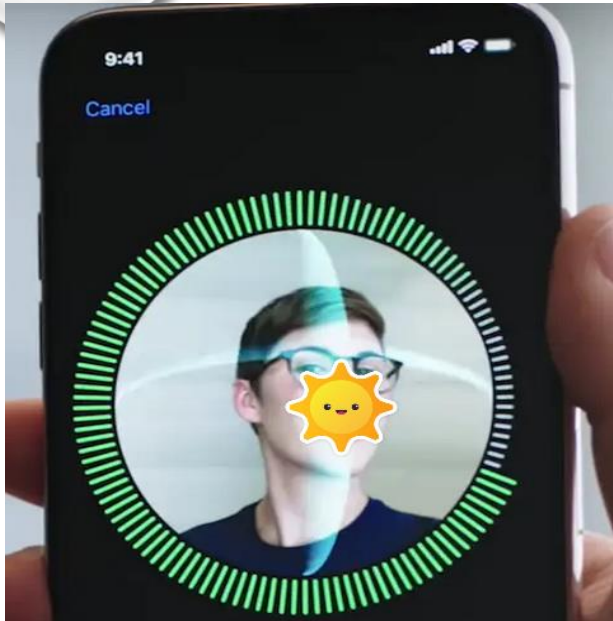

- Less flexibility, mobility
- Request specific biometrics devices
- Request to maintain a server

Security system today

- SME companies need to install some biometric devices to check their users/visitors attendance.
- If there are multiple biometric devices, request to manually access all the devices to query staff's time log or to maintain a central server for all biometric devices storing time log data
- The company needs maintain their costly infrastructure
- Fingerprint with multiple users using raises hygiene concern

iAttendance

iAttendance tries to slowly replace traditional biometrics security system (*not for all cases*) by re-using built-in biometrics devices in smart phone

Cloud server

- More flexibility, mobility
- Not request specific biometrics devices
- Not request to maintain a server

iAttendance

- **iAttendance** is an online service (<https://iAttendance.co>) that allows companies to manage their staff attendance without any infrastructure requested
- Visitor/staff simply scans QR code to check-in/check-out
- Company's admin can add/remove staffs and generating the report from the dashboard

[Check in](#)

iAttendance

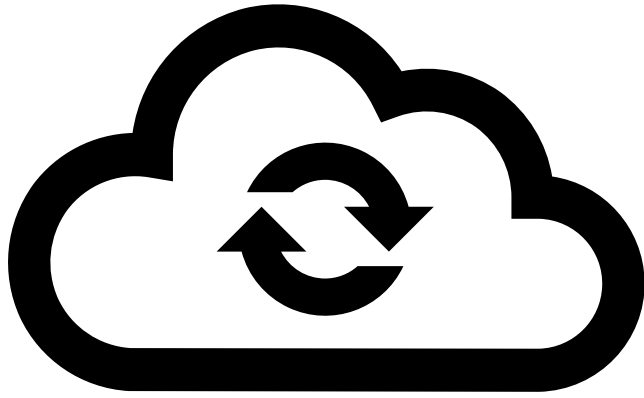

- Supports multiple methods of attendance check:
 - ✓ Simple user ID & password attendance check
 - ✓ Fingerprint attendance check
 - ✓ Fingerprint attendance with photo capturing on the spot
 - ✓ Face recognition (support later)
 - ✓ Dynamic QR code attendance check (support later)
- Flexible to switch between different methods
- Company needs not worry about infrastructure
- High availability, 24/7 accessing
- High security

Why you need iAttendance ?

- No need to have fingerprint scanner separately. Utilizing built-in fingerprint scanner in smart phone
- Help company/factory to manage staffs time log or attendance check
- User's attendance check in ad-hoc/planned events
- Gates/Premises access control (*request extra hardware*)
- Crowd Management
- Real-time attendance monitoring

How it works

iAttendance cloud server

Customer office

How it works

Visitor/staff uses phone to scan QR code of an organization to check-in, check-out. User can enable biometric authentication on the phone
