

SMALL WIND TURBINES MEETING

Get the Details on Small Wind Projects for your Farm and Home!

Small Wind Turbines (20 kW to 40 kW) could be part of your future! Here's why: The Rural Wind Energy Development Act (S.673) proposes a 5-year Federal Tax Credit of \$1,500 per ½ kilowatt (kW) of capacity to purchasers of small wind systems. The plain arithmetic: If a 20 kW system costs \$75,000 installed, this tax credit generates \$60,000 .

That's 80 percent of the total cost!

Thursday, June 21, 7 p.m.
at Max's Grill, Olivia

- **Dave Winkelman**, a Brainerd area contractor (W.E.R.C.) will speak on constructing Small Wind Turbine Projects throughout West Central MN.
- **Glen Jacobsen** will share details on his 20 kW project currently being built on his rural Bird Island farm.
- **Matt Ketelsen**, agricultural aid for Senator Norm Coleman, will give an update on S.673.
- Updates on wind energy issues of the recently adjourned Minnesota State Legislature.

Sponsored by the Renville County Agriculture/Renewable Energy Committee, ProAg of Renville County, Renville County Farm Bureau, and Renville County Corn/Soybean Growers.
