Average Response Time (Tone to Arrival at Scene) 9.7 minutes*

*Note: This month's response time is a lot shorter than previous months. This number is mostly dependent on how far we need to go to get to a scene. We did not have any calls that took over 22 minutes to get to, thus a better response time. See our website for more information in the FAQ section.

**Note: No-transport figures are for every time the service gets called. Many of these are standbys, canceled calls, and no patient found/presented. Our Medical Director's stats give us a no transport rate of 26.0% over the last 2 quarters.
