1000T GH

Mounted Tandem Disk Harrow

**Easy operation and
low maintenance.**

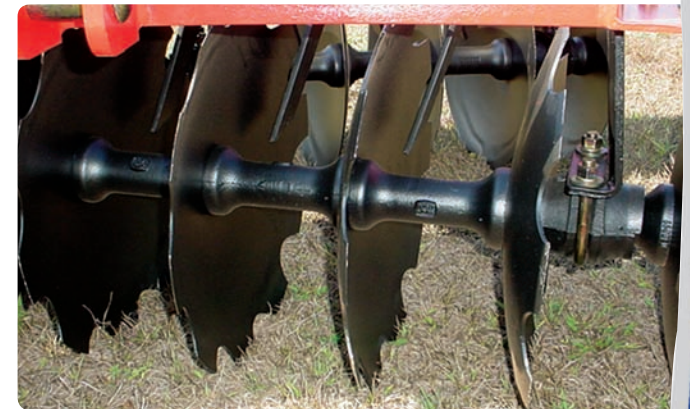

The model **1000T GH** mounted type tandem disk harrow is designed for supplementary soil preparation jobs, such as breaking clods, leveling and the incorporation of lime, fertilizer, herbicides, fungicides and other agricultural chemicals into the soil. Also it is very effective for control of weeds and weed seedlings.

Standard Features:

- Equipped with Category II brackets for universal three point lift arrangement.
- Rugged 1" (25.4mm) square steel disk gang axles.
- Split collar, anti-friction, regreasable or oil bath bearings.
- Disk blades are heat treated boron steel, notched on front gangs and plain on rear gang.
- Adjustable, heavy duty disk scrapers.

Notched and plain disc blades, produced with rigorous standards, they offer superior resistance to the wearing and impacts.

**FRICION BEARING
AND CAST IRON
SPACER SPOOLS.**
