

## ALPHA ENVIROTECH CONSULTING, INC.

# CAPABILITY STATEMENT

Alpha Envirotech Consulting, Inc. (AEC) is an engineering consulting firm providing a broad range of professional services in environmental engineering, science, and policy. Our commitment to environmental stewardship empowers commercial/industrial clients and government agencies with innovative and effective solutions.

## CORE COMPETENCIES

### Site Assessment

Our project team can properly assess contamination in soil, groundwater, sediment and surface water, and evaluate indoor air vapor intrusion related issues.

### Wetland & Wildlife

AEC provides wetlands delineation, determination, & permitting, listed species surveys & permitting, expert witness testimony, NEPA compliance studies, PD&E's, natural resource assessment, and GIS analysis & mapping studies.

### Engineering

Our engineering team can provide a wide range of environmental remediation and other engineering consulting services.

### Land Development

We provide Phase I&II ESA, Corridor Studies, contamination testing, wetland & surface water permitting, asbestos, leaded paint, mold assessment, SWPPP, SPCC Plans, & Dewatering Plans.

### Construction

We provide air, storm water, and groundwater permitting, compliance inspections, LEED and WELL building services, Health & Safety Plans, Environmental Protection Plans, and Construction Management Services.

## PAST PERFORMANCES

- Phase I & II Environmental Site Assessment
- Assessment and Remediation for petroleum contaminated sites
- Wetland and Permitting Services for roadway and bridge projects
- Sediment Assessment for creek restoration project
- Contamination Assessment, Permitting & Compliance, Health and Safety Services for utility pipeline projects
- Environmental subcontractor for federal design-build projects
- Noise, Vibration, SWPPP Monitoring/Inspections for construction
- LEED and WELL Building Certification Services
- Title V Air Permitting & Compliance Support

## DIFFERENTIATORS

- We focus on client's short term and long term goals.
- All AEC employees have advanced degrees. We solve complex problems.
- We are actively involved in community development and redevelopment initiatives.
- We help clients achieve and exceed sustainability goals by eliminating wasteful practices and promoting ecological health, resulting in cost savings.
