- **Digital Solutions**
- **Web Development**
- **Mobile Apps Development**
- **Networking**
- **Cloud Computing**
- **IT Software & Equipment Supplier**

Let us help you today with your technology solution needs of tomorrow!

Let us manage your current LMS or design and implement a custom LMS!

Learning Management Systems (LMS) are cloud-based web platforms used to deliver and track online and classroom instructions.

- In today's remote environment, you're going to need a cloud based secure platform to deliver instructions, track and manage employee/student completions and data reporting.
- With LMS you get a custom learning management platform with our custom content or bring your own content. We'll assess every aspect of your customer's learning needs to build the most innovative and user-friendly solution for your business.
- Our cloud based web solutions are hosted on AWS GovCloud infrastructure and implement enterprise security best practices to defeat potential cyber security attacks. Our scalable cloud solution is based on Moodle, an open-source virtual learning environment, that meets the commercial of the shelve (COTS) requirements.

Successfully Created AWS Cloud Hosted Learning Management Systems (LMS) For The Following Clients:

NPower Inc. | Aroura LLC | EEE Publishing

COMPANY DATA

DBE, MBE CERTIFIED

NAICS: 541512, 611420
