

CAPABILITY STATEMENT

Development Solutions

SBA WOSB **OSHA**
Woman Owned Small Business

CORE COMPETENCIES

At Catfish Development Solutions, we are a complete site development company with a specialization in drainage. We are capable of handling various levels of construction phases associated with our specialty. Such tasks include: **road, highway & bridge construction, swale regrading, drainage diagnosis, clearing, grubbing, demolition, hauling and other utility work.** We strive to be the preferred resource when it comes to site development, and drainage diagnosis. We hold "0" lost time injuries, putting safety first on any job site. Completing work safely and efficiently is our main goal.

Catfish was established back in August 2017, however, our employee's (crews & supervisors) extensive experience goes back about 20 years.

The owner, Rachel Holcomb, is a former marine and service connected disabled veteran – she manages all aspects of her business on a daily basis. She has a bachelor's degree in Administration and Management, which allows her to deliver superior services through effective administration scheduling management, safety, quality control, and quality assurance.
