

CAPABILITY STATEMENT

CORE COMPETENCIES

eda consultants inc. is a state-certified Disadvantaged Business Enterprise (DBE) that has provided professional surveying, land planning & civil engineering services throughout Florida for over 40 years. We offer a full range of expert professional services under one roof to a wide variety of public and private sector clients. Our clients include municipalities and governmental agencies of different sizes, as well as private developers and landholders. The daily collaboration of these disciplines expands our range of knowledge and helps provide precise and timely services to our clients in the areas of:

SURVEYING | LAND PLANNING | ENGINEERING

DIFFERENTIATORS

- Established in 1976, eda is the oldest multi-disciplinary firm in Alachua County providing engineering, surveying and planning services in North Central Florida
- eda registered engineers, surveyors, and planners have over 150 years of combined work experience
- eda utilizes specialized Ground Penetrating Radar (GPR) and electronic detection equipment to create an accurate representation of underground utilities. This service provides valuable information regarding subsurface conditions
- eda specializes in 3D Laser Scanning, a cutting-edge technology which can accurately measure up to one million points per second. This is extremely valuable for very detailed surveys of complex structures, in-accessible utilities, and hazardous conditions. eda has the expertise to prepare 3D models of your project to allow design professionals to virtually visit a site or to support Building Information Modeling (BIM).
- eda has four dedicated survey field crews, allowing us to mobilize quickly and work efficiently

PAST PERFORMANCES

TOWER ROAD/SW 75TH STREET

Client: Alachua County, Alachua County, FL

Service Provided: SURVEYING

Topographic survey of the right-of-way (ROW) of approximately 3 miles of Tower Road from the northerly line of Archer Road to the northerly line of SW 8th Avenue. The survey also extended 75 feet beyond the Tower Road ROW at 18 major intersections and spot elevations were obtained for an additional 20 feet outside the ROW to provide contours to assist with drainage calculations.

NW 23RD AVENUE/NW 16TH BLVD./NW 16TH AVENUE

Client: Alachua County Public Works, Gainesville, FL

Service Provided: SURVEYING

Right-of-Way and topographic survey of approximately 4 miles of county right-of-way for roadway design from NW 55th Street to NW 13th Street; including spot elevations and utility locations.

GAINESVILLE REGIONAL AIRPORT ACCESS ROAD

Client: Gainesville Alachua County Regional Airport Authority, Gainesville, FL

Service Provided: SURVEYING

Topographic survey of the approximately 3,200 foot access road at the Gainesville Regional Airport from Waldo Road to the main terminal, including spot elevations, above and underground utility locations, and wetland locations.

GAINESVILLE REGIONAL AIRPORT MASTER PLANNING

Client: Gainesville Alachua County Regional Airport Authority, Gainesville, FL

Service Provided: LAND PLANNING/ENGINEERING

Land planning services included the preparation of an Airport Master Plan update which included an inventory of all existing facilities, environmentally sensitive areas and potential aeronautical and non-aeronautical development areas within and around the approximately 1,800 acre airport property. The plan also involved a master development plan to assist the airport in marketing developable properties fronting Waldo Road and the new Main Access Road.
