

CAPABILITY STATEMENT

FLYING HIGH
PRODUCTIONS, LLC

CORE COMPETENCIES

Flying High Productions, LLC is here to help with all your drone services needs. We will help you collect real-time aerial data, enabling you to make more informed decisions on site planning, construction progress or delays and asset allocation. Our history comes from working in a highly regulated industry so attention to detail is how we run our business with a safety-first mentality. We can work at the local, state and national level.

Our **high-resolution cameras** capture photography in clear detail and color, and can create high-resolution maps of your projects. You can see elevation changes, take measurements of stockpiles or area, create a 3d model of your project, and so much more. We can inspect items from a safe distance using our zoom lenses, and take shots or video in tight spaces without losing any quality with our small drones equipped with high-resolution cameras.

KEY DIFFERENTIATORS

- We pride ourselves on our redundancies for planning with multiple drones, batteries, field charging capabilities, and staff to cover any sized job.
- We are a dependable company that can provide services year-round and never leave you mid-project.

PAST PERFORMANCES

We have worked for various clients providing all types of aerial imaging, ranging from progress photos, marketing videos, aerial mapping, site inspections, and post storm restoration among others. Some of our clients include:
