

Indianapolis
Oral Surgery &
Dental Implant Center

Greetings,

My name is Dr. Larry Falender, and I am an Oral Surgeon in Indianapolis, IN specializing in TMJ/TMD. I wanted to reach out to you regarding referrals for TMJ/TMD treatment. We would like the opportunity to help you understand this problem, and how it is easily differentiated from other pain of the head and neck. A large number of patients who complain of headaches, ear, neck or jaw pain, tinnitus, subjective hearing loss and vertigo actually have TMD (Temporomandibular Joint Disorder), and misdiagnoses can significantly delay resolution of the problem.

My practice uses the patented; FDA approved drug-free, non-surgical, permanent solution to TMJ problems. Patients that present with Tinnitus/Ringing in the ears (Meniere's Disease) have also seen a significant reduction in symptoms. It is an effective and affordable treatment with most patient achieving 85-95% reduction in symptoms. After successfully treating many TMD patients over the past few years, I have found that most patients with TMD symptoms begin their search for relief at Primary Care Clinics, ENT practices, Dentists, Audiologists, and Immediate Care Clinics. Many of these are initially misdiagnosed with ear problems or migraine headaches.

If you have never referred to us before, I would like to schedule a 15-20 minute "Virtual Lunch & Learn" with your office to learn how to distinguish the symptoms of TMD from other causes. Please call to schedule the lunch and learn at (888) 242-7460, and don't hesitate to reach out to me with any questions. I am always available to help.

Kind Regards,

Larry Falender DDS
