## Integrity

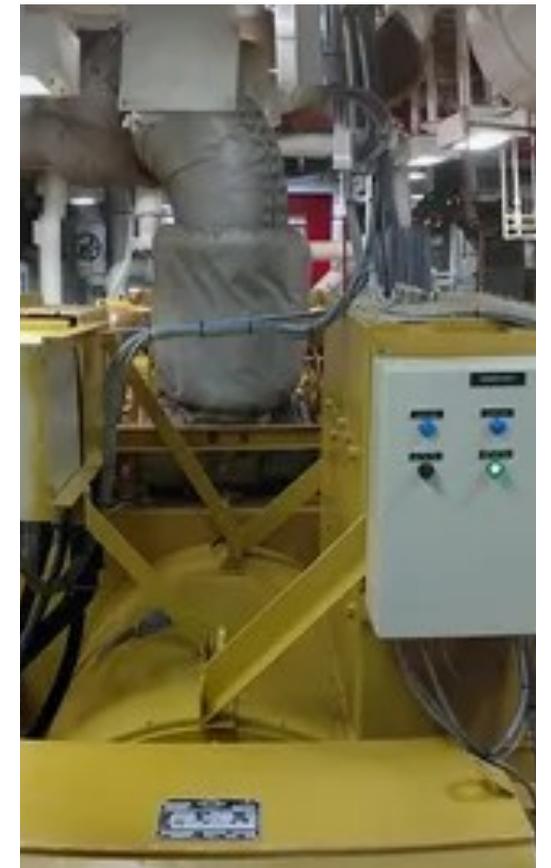

---

Dynamic Power Systems & Controls, LLC are entirely committed to fulfilling all of our customer's requirements, to the fullest. DPSC takes great pride in all aspects of the processes from start to finish to ensure your company and your customers are more than satisfied with the final product and services that we deliver.

## About Us

---

Dynamic Power Systems & Controls, LLC (DPSC) established in November 2017 is a Control Systems Integrator, specializing in the manufacturing of electrical control systems and specific class-related control panels. Our services include Electrical System Integration from Generator Controls, Variable Frequency Drives (VFD), AC drives, DC drives, Motor control, Automation and Process control. DPSC also provides services such as Installation of Integrated Products, Testing, On-site System Start-Ups, Documentation, Project Management, and Service. DPSC extends to our customer's 24-hour technical support. Our capabilities allow us to serve a broad variety of project types and industries both US-based and overseas.

## Complete Manufacturing

Our manufacturing capabilities are second to none. We take the greatest pride in our workmanship and guarantee customer satisfaction. Whether we are manufacturing control panels, automation control, monitoring systems or special request items we will always strive to meet or exceed your requirements.

## Oilfield Services

At DPSC we are committed to providing professional drilling system services. We provide complete electrical services for the entire rig including and not limited to generator controls, SCR, DC Drives, AC Drives, motor control centers, automation, and diagnostic services. We also provide field services along with full electrical project management for new and upgraded drilling systems including rig ups.

## Marine Services

At DPSC we are committed to providing professional marine services. We provide complete electrical services for the entire vessel including and not limited to generator controls, switchboard diagnostics, propulsion systems and all distribution systems. We also provide full electrical project management for new and updated marine systems.

## Retrofit of Existing Systems

At DPSC, we have many years of experience with controls, power & automation upgrades and retrofits. Upgrading and retrofitting to modern technology is a proactive plan to minimize downtime and decrease production losses while providing increased system performance, prolong the life of capital equipment and keeping up to date with current technologies. Contact DPSC to review your automation upgrade and retrofit service requirements and needs.
