---

Hello,

**Puppies in holding (#55042 & 55043)**

These puppies can no longer be housed together. Tonight the male was growling at and biting the female as she was screeching (he did not seem like he was playing). I could hear her from the tech office and had to run into holding and pull him off of her. She has a new wound on her right ear, but it's pretty minor. This is now the 2<sup>nd</sup> time I've caught the male being aggressive towards the female. There was no food in their kennel, so I am unsure what provoked this.

**Butters (#52121) in A7**

Butters was going nuts in his kennel when I was feeding the dog next to him tonight. He does look thin and when I weighed him, he has lost 4 pounds since January. Please feed 2x daily. I will add him to the list on the door and hang a sheet on his kennel.

Thanks,  
Kayla Peterson
